LA TABLE
DU CHEF

VIP CARD

royaltiz

1

Overview

1.1. **Our mission**

The mission is simple: give access to unique experience by allowing each NFT holder to reserve an "out of the ordinary" table in the establishment of a great starred chef.

1.2. **The problem we are looking to solve**

Usually, the Chef's Table is not bookable by the public because the chef only shares it with his friends or certain VIPs (Presidents, ministers...). This table is always located in a special place (within the kitchen, in a secret room, in a special suite...) and the chef always spends time there to share a drink or just a good moment with his guests. For the first time, thanks to the NFT, this incredible moment is open to you.

1

Overview

1.3. **How does it work ?**

Table du chef is a platform where anyone can register to mint and collect table reservations. It is really easy to use even for non cryptocurrency users.

1. Register (KYC) / Connect your wallet
2. Buy a Pass to be able to buy reservation' NFTs (with ether or CB)
3. Buy and collect reservations
4. Activate your reservation and eat at the chef's table

2

The Platform

4.1. **Overview**

The Dream
Holders of the pass can mint, sell and collect the most exceptional tables.

The Engine
The platform, supported by the Ethereum Blockchain, allows transparent and secure exchanges. Transactions are performed automatically by smart contracts.

The Fuel
Ethereum cryptocurrency.

2

The Platform

4.2. **On the menu**

F. Anyone can :
    a. Register
    b. Buy a pass

G. PASS owners can :
    a. Mint and Sell reservations

H. Administrators can :
    a. Moderate the platform (accounts)

2

The Platform

4.3**. States of reservations**

The specificity of NFTs recharges are the 3 states they can have :

1. Waiting for activation
This is the default state of all NFTs reservations.

2. Activated
When an owner of a recharge activates his reservation (by calling the concierge and signing the action with his wallet)

3. Souvenir
When the reservation date has passed (the next day).

2

The Platform

4.4. **Gallery**

There will be a gallery and user will be able to class NFTs according to the following criteria :

- Pass or reservation
- Reservation state (In waiting, activated ou souvenir)
- Chef's name
- Restaurant
- Between date and date
- Stars number
- Town
- Country

2

The Platform

4.5. **Use & support**

Today, one of the major problems of applications using the Blockchain is their difficulty of use and understanding. Indeed, to the same extent as the internet in the early 90's, the Blockchain is poorly understood and its use is complicated. To address these issues we will work with specialists in user experience to ensure a simple and intuitive adventure on the platform.

Accessibility to our platform is a key to the success of this project. That's why we will develop our platform as a Progressive Web App (PWA). This type of application can be opened on any type of device that has a search engine.

3

Tokenomics

All NFTs will be available on the Opensea, Rarible and Looksrare platform after being minted.

Q&A

What is "La Table du Chef"?
"La Table du Chef" provides access to a unique experience by allowing each NFT holder to book an "out of the ordinary" table in the establishment of a starred chef.

Usually, the Chef's Table is not bookable by the public because the chef only shares it with his friends or certain VIPs (Presidents, ministers...). This table is always located in a special place.

Why do we sell Table du Chef Passes?
The Chef's Table Pass is necessary and mandatory to reserve a table in one of the many starred partner restaurants. The Table du Chef experience is only available to Pass holders.

Is a supply of 6000 Pass too much ?
It is minimal and very exclusive. We have a panel of about a hundred starred chefs who will offer Chef's Tables all year long to be booked via Royaltiz website. This is an average of 50,000 possible bookings per year. Each person who wishes to book a table for this unique experience will have to own a Chef's Table Pass or acquire this pass from one of the lucky holders.

What is the advantage of buying this pass via the Exclusible drop?
The main advantage is the price. The Exclusible drop offers 3000 Chef's Table Pass for a price of 0.2 ETH. Then the remaining 3000 Pass will be sold on Royaltiz website for 0.4 ETH.

Can I buy an NFT Chef's Table if I don't have a Pass?
Yes, the NFT can be bought and resold on the secondary market. But the booking of a table will be possible only after checking the holding of the Pass by our concierge.

How does this concierge service work?
Accessible on Royaltiz website by a Whatsapp business, this concierge service will allow you to book available dates for each Chef and to confirm that you have the Pass for the booking.
A dedicated contact will also answer all your questions by phone or email.
