1. Overview

The **PPIE Implementation Program** (2020-2023) of the Ludwig Boltzmann Gesellschaft Open Innovation in Science Center is funded by the Austrian National Foundation of Research, Technology and Development, and intends to support researchers and their organizations implementing meaningful and active involvement of patients and the public in research. This first pilot call has a total budget of max. EUR 600,000.

</tr>
</thead>
<tbody>
<tr>
<td><strong>Short description</strong></td>
<td>Implementation activities that foster active and meaningful patient and public involvement in research.</td>
</tr>
<tr>
<td><strong>Funding available</strong></td>
<td>Max. EUR 60,000 per project</td>
</tr>
<tr>
<td><strong>Funding rate</strong></td>
<td>100%</td>
</tr>
<tr>
<td><strong>Project duration</strong></td>
<td>6-12 months</td>
</tr>
<tr>
<td><strong>Cooperation partners</strong></td>
<td>Not necessary for application</td>
</tr>
<tr>
<td><strong>Eligible applicants</strong></td>
<td>Representatives of following organizations located in Austria:</td>
</tr>
<tr>
<td></td>
<td>- Public Research organizations</td>
</tr>
<tr>
<td></td>
<td>- Public Universities and Universities of Applied Sciences (FH)</td>
</tr>
<tr>
<td></td>
<td>- Private universities</td>
</tr>
<tr>
<td><strong>Eligible costs</strong></td>
<td>Honorarium for patients and the public</td>
</tr>
<tr>
<td></td>
<td>Travel costs for patients and the public, and researchers</td>
</tr>
<tr>
<td></td>
<td>Other goods and services:</td>
</tr>
<tr>
<td></td>
<td>- Catering etc. and collaboration software</td>
</tr>
<tr>
<td></td>
<td>- Room rent for meetings and workshops</td>
</tr>
<tr>
<td></td>
<td>- Small equipment</td>
</tr>
<tr>
<td></td>
<td>Subcontracting for third parties</td>
</tr>
<tr>
<td></td>
<td>Overhead costs up to 20% of all cost categories</td>
</tr>
<tr>
<td><strong>Non-eligible costs</strong></td>
<td>Personnel costs for researchers</td>
</tr>
<tr>
<td></td>
<td>Research and office infrastructure</td>
</tr>
<tr>
<td></td>
<td>Costs for patents and licensing, and research software</td>
</tr>
<tr>
<td><strong>Payment rates</strong></td>
<td>Lump sums - 80% payment in the beginning and 20% at the end of project</td>
</tr>

**Important information**

| Total budget of call             | Max. EUR 600,000 |
| Submission deadline             | 31st October 2020, 5pm CET |
| Application language            | English |
| Contact person                  | Mag. Dr. Raphaela Kaisler, MSc |
|                                 | Tel: (01) 513 27 50 - 62 |
|                                 | Email: ppie@lbg.ac.at |
| Website                         | https://ppie.lbg.ac.at |
| Application platform            | https://calls.lbg.ac.at/login |
2. Aim of the call

Research shows that early and continuous involvement of the public and patients has a positive impact both on conducting more patient-centered research and on the impact of research. Involving the public in research enables people with lived experience and improves the quality and impact of research (Staley, 2009). Engaging citizens and patients in research co-design is one of the key tools to drive innovation processes within the European research landscape (Mazzucato, 2019). In order to ensure that research is highly relevant to the public, there is a need for meaningful involvement of end-users with the aim to reduce ‘research waste’ and bring science and society closer together (Glasziou 2016; Chalmers 2009). Involving the public in research empowers people with lived experience and improves the quality and impact of research (Staley, 2009).

PPIE stands for ‘Public and Patient Involvement and Engagement’ in research. The PPIE Implementation Program aims to involve citizens and patients in research processes and activities according to the definition of the National Institute of Health Research (NIHR, UK):

"User or public and patient involvement in research means doing research ‘with’ patients and the public so they are not just participants in the research. This requires users to have a say in the decisions made about research, so that the methods and outcomes are more appropriate to research participants and patients."

LEVELS OF INTERACTION

The degree of interaction between researchers, patients, and the public is measured by the ways in which they are involved. This can include patients and the public taking part in research studies, patients actively providing and disseminating research to the general public through different formats, or even patients and the public becoming actively involved in the research process. We distinguish between three levels of activities (INVOLVE NIHR, UK):

- **PARTICIPATION**: Citizens and patients take part in research studies.
  
  E.g., being recruited in clinical trials, completing questionnaires, participation in interviews and focus groups.

- **ENGAGEMENT**: Information and knowledge about research is provided and disseminated.
  
  E.g., dissemination of research to public (via media, social media), raising awareness of research through media, science festivals and open days at universities and research centers.

- **INVOLVEMENT**: Citizens and patients are actively involved in research.
  
  E.g., as grant holders and co-applicants, through identifying research opportunities, agenda setting, members of project advisory and steering groups, co-developing patient information or materials, undertaking interviews with participants, and carrying out research.

Depending on the activity and degree of involving patients and public members in research, several levels of interaction can be differentiated: from purely receiving information about research projects (passive) to getting involved in research decision-making and becoming equal collaboration partners (active). From the perspective of a researcher, introducing PPIE components into research projects and research governance may increase the general empowerment of those who are affected by research and introduce a shift of power and ownership towards patients and the public.

The PPIE Implementation Program aims to support implementation activities with patients and the public in the area of ‘active involvement’ across the different phases of the research cycle (from setting the agenda to interpreting data).

3. Applicants

3.1. Eligible applicants

Representatives from organizations with their headquarters located in Austria and research conducted that benefits Austrian citizens and society are eligible to apply for the PPIE Implementation Program:

- Public research organizations or research institutions
- Austrian Universities and Universities of Applied Sciences (FH)
- Private universities

Representatives are asked to attach a ‘Letter of Support’ signed by their legal representative of the institution in the submission. Please find a template in the appendices.

Representatives of all ages, gender, ethnic background, and career levels within a research institution (e.g., research administration, bachelor and master students, principal investigators, head of institutes, etc.) are welcome to apply.

3.2. Cooperation partner

Cooperation with partners is not necessary for submission of an application but may be useful. For example, patient organizations or NGOs may be listed and budgeted as subcontractors if needed; however the research organization must submit the application. Note that cooperation agreements will be negotiated with the research organization not persons.

4. Selection process

4.1. Assessment criteria

The proposed involvement activities have to meet the following **formal assessment criteria** (quality of involvement):

- **Level of involvement**: researchers develop and conduct research activities ‘with’ patients and the public involving them meaningfully once or more often in research activities. Patients and the public may be equal partners in activates or ‘co-researchers’ acting on a level playing field.

- **Study level**: proposed activities must be included in minimum one phase of the research cycle (define research question – design research method – collect data – analyze and interpret data – disseminate findings) and/or project governance

Following assessment criteria further assess the **quality of the application** taking the above formal criteria into account:

- **Impact**: the proposed activities add value to the research conducted or planned, are relevant for society, and/or benefit certain target groups or patients or the wider public

- **Implementation**: the implementation plan is adequate to the proposed activities (e.g., method, number of people involved, frequency of involvement, diversity of group, level of involvement)

- **Feasibility**: the proposed activities can be implemented in the foreseen project duration and budget allocated

Not as part of the evaluation, but in order give feedback to the applicants and to learn from the process, the experts are also asked to indicate how understandable the application was written.

4.2. Assessment of applications

After submission the application will be checked based on the formal assessment criteria by LBG PPIE team:

- Eligibility of applicants
5. Costs

5.1. Eligible costs

Applicants may apply for minimum EUR 20,000 and up to EUR 60,000 (including overhead costs) during a project period of minimum 6 to maximum 12 months for patient and public involvement activities. Planned activities must be directly linked to and occurred in patient and public involvement activities in research. Please find a detailed description of costs in the Implementation Guideline (see appendix).

Following costs categories are eligible for support:

- **Honorarium**: compensation of expenses for patients and the public concerning their time and contributions spent in the project (via ‘Contracting of Work’, in German ‘Werkvertrag’)
- **Other goods and services**: e.g., catering, printing costs, ads, room rents if needed to deliver the activity, communication and collaboration software, small equipment if needed (e.g., digital recorders, video camera)
- **Travel costs**: travel expenses (second class public transportation) of patients, the public and researchers involved in the activities
- **Subcontracting**: third party services to deliver the activity (e.g., moderation of workshops), Note: if you plan subcontracting abroad than add 20% VAT for budgeting for this activity
- **Overheads**: max. 20% of all cost categories listed above to cover in-kind contributions from researchers, supervisors, coordinators,

5.2. Non-eligible costs

Non-eligible costs include:

- Personnel costs of researchers and other administrative personnel
- Costs for patents and licensing
- Research software
- Research and office infrastructure (e.g., microscopes, laptops, printers, etc.)

5.3. Payment

80% of the approved budget is paid in form of a ‘lump sum’ payment at the beginning of the project. The rest of the payment (up to 20%) is paid after submission and approval of the report at the end of the project period. All expenses need to be collected and kept as ‘original’ invoices at the institution and a final list of occurred expenses must be provided with the report in order to receive the rest of the occurred costs. Please find a detailed description of payments in the Implementation Guideline (see appendix).
6. Submission

Applications must be submitted online via the LBG calls platform (https://calls.lbg.ac.at/login) until 31st October 2020 at 5pm CET. Applications received via e-mail or post will not be checked for eligibility and assessed by the panel of experts.

6.1. Application template

The online Application template includes following items:

- **Personal data**: applicant name, name and location of institution/organization, email contact, upload for the ‘Letter of Intent’ from institution/organization as PDF (max. 10 MB)
- **Demographic data**: gender, discipline, career level
- **Abstract**: in English and German (plain language; max. 150 words each)
- **Involvement activities**:
  - **Impact**: describe the societal and scientific impact (why; max. 300 words)
  - **Implementation**: describe the implementation and feasibility of planned involvement activities (what, who; max. 500 words)
  - **Methods**: describe methods and setting of planned involvement activities (how; max. 300 words)
- **Expected Learning**: describe how you will assess the quality of the involvement activities and reflect the planned activities to draw learning (max. 300 words)
- **Overview of involvement activities**: linked to the level of involvement, study level, and expected impact (table)
- **Budget and time plan**: provide a budget table and Gantt chart (upload as PDF, max. 10 MB)

Please find the Application template in accordance with the online version in the appendices.

6.2. Data management and protection

The implementation partners comply with the data protection regulations when designing, submitting and, if selected, carrying out their project. These particularly include the European General Data Protection Regulation (GDPR) and the Austrian Data Protection Act. In the submission and implementation of the project as well as in reports and publications, personal data are used anonymously. The implementation partners undertake to obtain declarations of consent from all persons involved in the project, which are suitable for the type of intended participation, which ensure the use of the contributions and results for the implementation partners and for the OIS Center of LBG GmbH.

7. Facilitation program

The PPIE Implementation Program (2020-2023) offers a facilitation program to successfully implement planned involvement activities. This facilitation program aims to support researchers, interested patients and the public in providing individual consultation, training opportunities, and peer support. Additionally, all successful projects are invited to promote their activities on the Homepage of the PPIE Implementation Program and at a stakeholder conference.

The facilitation program will start in September 2020 and will be available before, during and after the project period until the end of 2023.
7.1. Consulting

Interested researchers, patients and the public can use our pre-check tool (https://ww2.unipark.de/uc/precheck) to assess their current PPIE activities and are welcome to seek individual consultation regarding

- the pilot call,
- project coaching for PPIE activities, and
- other queries concerning patient and public involvement in research.

Please contact the PPIE team for an appointment via telephone or in-person (see contact).

7.2. Training

During the PPIE Implementation Program, several training opportunities will be offered online and in-person to upscale the reach in Austria:

- **Webinar series**: on specific patient and public involvement opportunities and challenges
- **Expert workshops**: international experts exchanging good practice examples in research
- **Ideation workshops**: ‘bring a PPIE case’ and discuss potential solutions in small groups of different stakeholders and researchers from various disciplines

7.3. Peer support

Successful projects and grantees will be invited to a peer support network sharing and discussing challenges and opportunities working with patient and public involvement in research. The peer support network will meet on a regular basis and has the opportunity to present and discuss their work among other peers and interested researchers, patients and the public.

7.4. Dissemination activities

Successful projects and grantees are invited to disseminate and promote their patient and public involvement activities on the homepage of the PPIE Implementation Program where information about the project can be shared (project page). In autumn 2022, a **PPIE stakeholder conference** including all successful projects is planned and will be co-led with the public in order to promote patient and public involvement activities in Austria.

8. Monitoring of implementation

8.1. Reporting

The project reporting includes **one report to be submitted at latest 2 months after end of the project period** describing the involvement activities and their impact as well as limitations and leanings. Please find a reporting template in the appendix.

To enable extended and direct learning from the activities, successful projects additionally present their results at the PPIE stakeholder conference.

8.2. Assessment of projects

All projects will be assessed according to the assessment criteria after the project ends. Researchers and all stakeholders involved in the PPIE activities will be asked to answer a **questionnaire** in order to give feedback and check the quality of involvement, implementation and societal impact of the PPIE activities. This information gathered from researcher and stakeholders will inform and shape the second pilot call that will be launched in September 2021. Please find the **Evaluation Questionnaire** in the appendix.
9. **Key Dates**

- **Call launched**: 1st September 2020
- **Call submission deadline**: 31st October 2020, 5pm CET (online)
- **Application assessment**: December 2020 - January 2021
- **Funding announcement**: February 2021
- **Project start**: March 2021

10. **Contact**

If you have any queries please contact us via e-mail under ppie@lbg.ac.at. Please find further information on our website at [https://ppie.lbg.ac.at](https://ppie.lbg.ac.at).

Contact the PPIE team:

- Mag. Dr. Raphaella Kaisler, MSc - Tel: (01) 513 27 50 62
- Thomas Palfinger, BA - Tel: (01) 513 27 50 68

11. **Appendix**

All call documents and templates can be downloaded from our website at [https://ppie.lbg.ac.at](https://ppie.lbg.ac.at).

Important documents for the **application submission**:

- Pilot call for PPIE
- Application template incl. budget and time table
- ‘Letter of Support’ template
- Implementation Guideline (in German ‘Umsetzungsrichtlinie’)
- Evaluator Guideline and ‘Terms of Reference (ToR)’

Important documents for the **evaluation of projects**:

- Implementation Guideline (in German ,Umsetzungsrichtlinie’)
- Reporting template
- Evaluation Questionnaire
