# ABOUT US

We are an agile and innovation-driven team with deep expertise in advanced communication technologies. We turn our know-how into tangible value by delivering innovative, market-driven solutions. By positioning communication technologies at the heart of digital transformation, we enable organizations to achieve sustainable improvements in occupational health and safety while significantly enhancing operational efficiency.

Product Development, Software and Hardware Solutions

Mission-Critical and Operational Communication Technologies

+20 Engineering Team

Energy, Telecom, Logistics, Education, Healthcare, Finance, Public Safety and Law Enforcement, and Public & Private Sectors

Geleceğin İletişim Dünyasına Çözüm Üretiyoruz.

# PRODUCT PORTFOLIO

To complement our in-house software solutions, we act as the authorized distributor in **Turkey and the wider region** for leading industry players delivering hardware and software that enhance enterprise communication systems.

Mobile Computer

Barcode Scanner

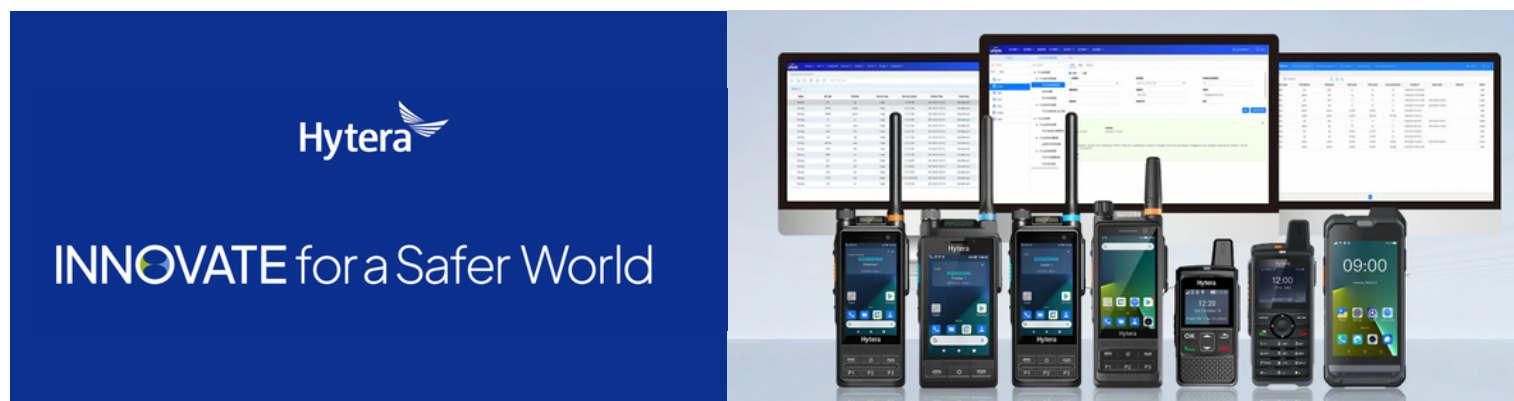

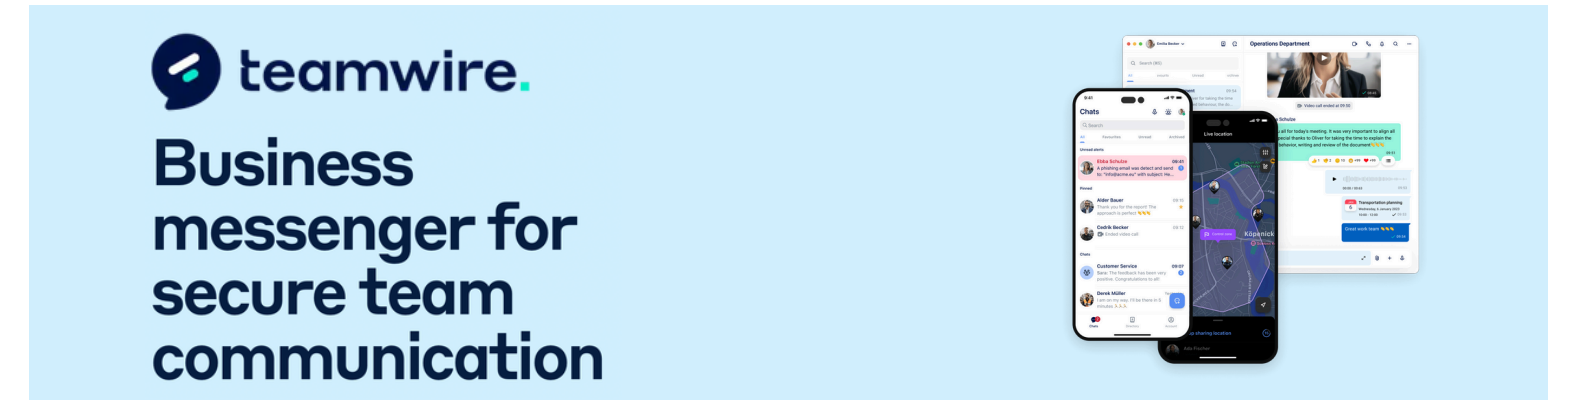

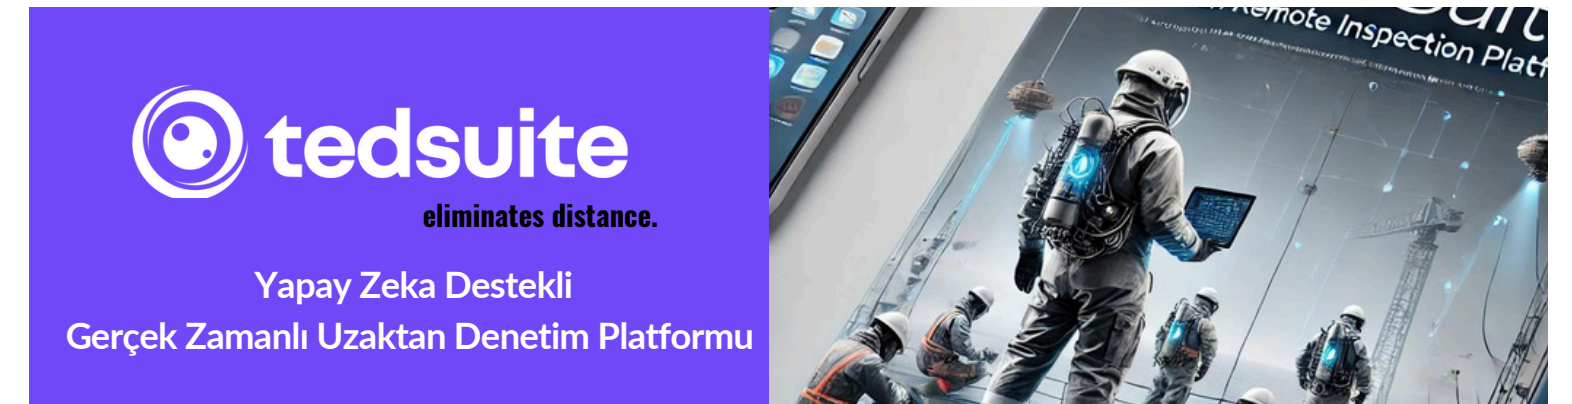

RFID Reader

iOS Scanner

Software Solutions

**ProPTT2**  
Professional Push-To-Talk

## The next generation of Push-To-Talk

01

On-Premise and Cloud-Based Professional Push-to-Talk Systems, Voice, Live Streaming, Location, Messaging, Emergency and Lone Worker Features

02

Available on iOS/Android, Windows and Linux across all major operating systems, Supports P-LTE, MPN and 5G technologies. Designed for mission-critical, public safety and emergency response operations

03

Real-time Full HD video sharing between enterprise and professional users. End-to-end security with encryption, authentication and access control

04

With its proprietary technology, it enables hybrid communication by integrating push-to-talk voice communication with traditional radio systems

05

Disaster communication infrastructures and satellite-based push-to-talk voice support  
Mission-critical grade reliability and high availability architecture

## AI-Powered Real-Time Remote Inspection Platform

An AI-powered process inspection platform specifically designed for unstructured and unplanned work environments, ensuring that tasks are carried out in compliance with defined procedures and enabling sustainable operational efficiency.

- AI-based risk detection and real-time alerts
- Computer vision-powered safety compliance
- Audit-ready, tamper-proof evidence
- Remote supervision and intervention
- Data-driven analytics and risk scoring
- Enterprise-grade scalability
- Scalable architecture suitable for enterprise
- AI-based risk detection and real-time alerts before incidents occur
- Through its fully compatible body-worn camera application, long-duration recordings are centrally stored, creating tamper-proof and non-erasable evidentiary records.

 **tedsuite**  
eliminates distance.

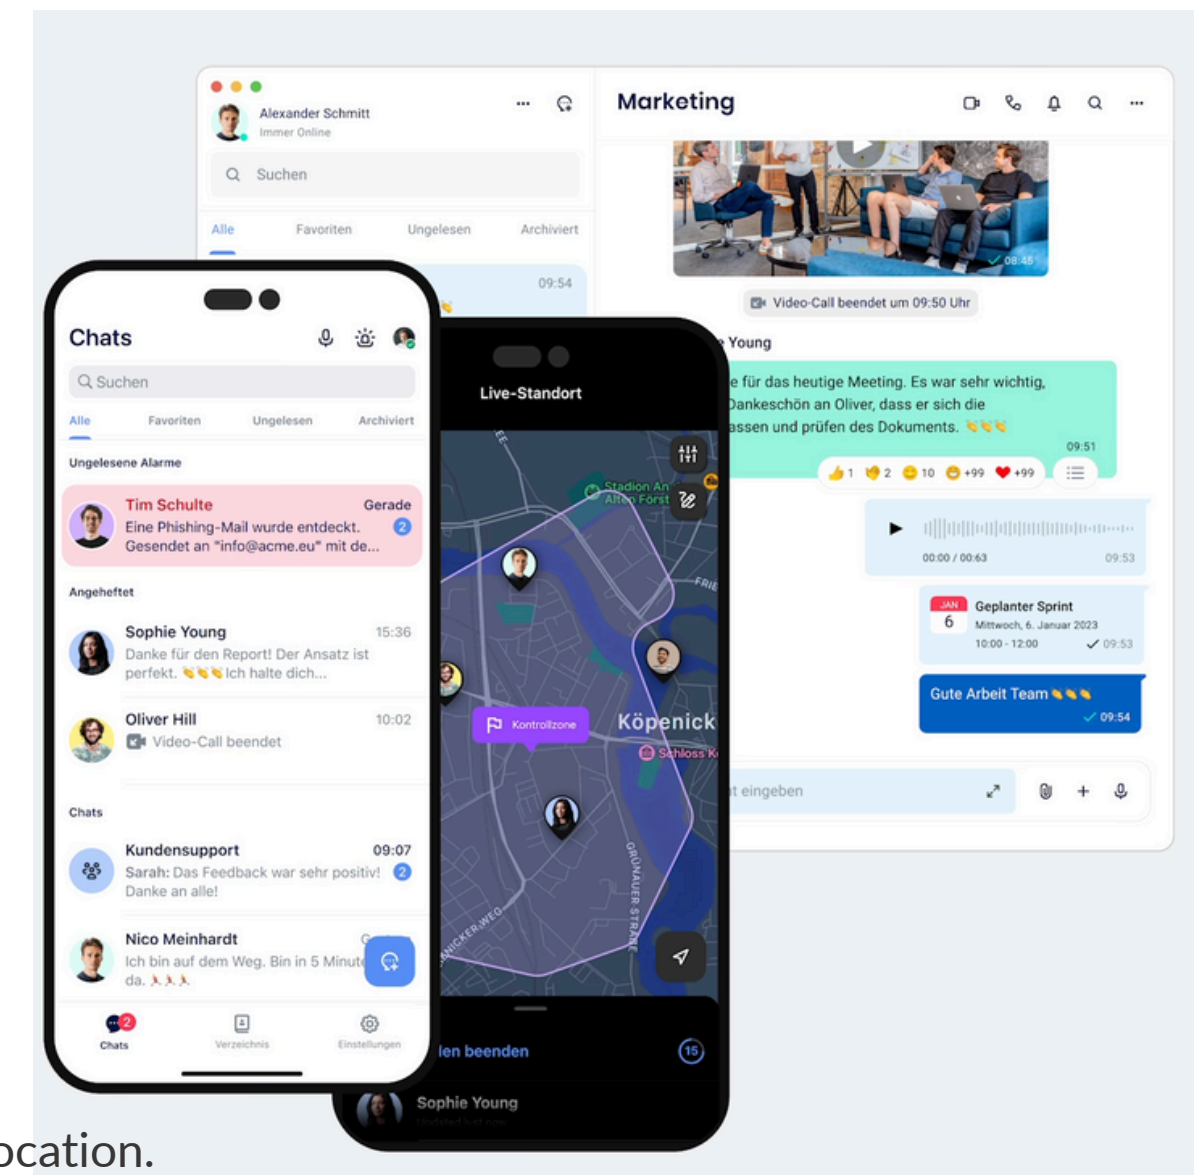

## Simple, Secure and Everything you need for critical communication

For critical infrastructure, public safety, law forces, and authorities.

Teamwire is a GDPR-compliant collaboration platform designed for critical missions with the highest security requirements.

Perfect for failsafe mission-critical communication & Full data sovereignty and data protection compliance. Comprehensive protection against attacks

- **1:1 chat:** Direct, secure, and encrypted communication between individuals.
- **Group chat:** Efficient coordination in teams, projects, and organizational units.
- **Broadcast:** Make announcements and share information with this one-to-many communication method.
- **Attachments:** Send all kinds of photos, videos, and files.
- **Video calls:** Voice and video calls with up to 30 participants for real-time coordination and live images.
- **iOS and Android:** Optimized for smartphones and tablets.
- **Desktop:** Windows, macOS, and Linux: Use all features on your computer.
- **Browser-based web client:** Quick access via any browser. Simply log in. No download, no setup.
- **Apple CarPlay:** Use Teamwire safely on the go: Receive and reply to messages via Siri.
- **No address book access required:** Privacy-friendly use without private contacts.
- **No telephone number required:** Quick and easy setup via email address, no access to numbers.
- **Alerts:** Draw attention to an emergency immediately with a message visually highlighted in red.
- **Panic button:** Send alarm messages with clear visual and audible alerts. Include a voice message and the location.
- **Push-to-Talk:** Send and receive Push-to-Talk messages.
- **Audio messages history:** Push-to-talk messages are automatically saved in the chat for tracking.

# unitech

- **Unitech** is a global manufacturer of internationally certified (AER, MFi) rugged mobile devices, including smartphones, mobile computers, portable printers, barcode scanners, and tablets.
- Its solutions are designed for professionals operating in Utility, Government, Retail, Critical Communication, and Public Safety environments, where reliability and durability are mission-critical.
- Unitech devices comply with international ruggedness standards such as IP67/68/69 and MIL-STD-810G/H, ensuring resistance to water, dust, shock, vibration, and extreme temperatures.
- They are well suited for public safety, emergency response, and field operations, supporting critical communication solutions including Push-to-Talk (PTT) and Mission-Critical Push-to-Talk (MCPTT).

**GLOBAL OPERATION & STRENGTHS**

- 15 International offices
- 1979 Founded
- 80+ Avg revenue US\$ million
- 402 Employees
- 2022 Listed to the Taiwan Stock Exchange
- Premium market Position **TOP 1** Taiwan Market
- Premium market Position **TOP 9** Global Market

**Taiwan.**  
Strategic Business Units. Global provider and manufacturer of AIDC & RFID technologies.

## Professional Communication Technologies and Solutions

### Industrial Applications

Hytera provides an open and inclusive platform that supports specialized industrial applications and MDM solutions for sectors and use cases such as the energy sector, secure access control, logistics, public utilities, and physical security.

### MCS Support

Fully compliant with 3GPP mission-critical standards, Hytera MCS devices deliver reliable and secure communication services. The convergence of MCS and legacy PMR systems paves the way for mission-critical communications.

### Multimedia Services

Hytera offers a wide range of multimedia services tailored to the needs of industrial users. These services go beyond voice-centric communication and include capabilities for video, data services, and multimedia distribution, delivering a rich and comprehensive communication experience.

### High Reliability

With an IP68 rating, Hytera industrial smart devices are built to withstand water, dust, shock, extreme temperatures, and accidental drops of up to 1.5 meters. They ensure reliable performance in harsh environments, enabling uninterrupted communication and operations.

# RugGear®

- RugGear is an international company that designs and manufactures rugged mobile devices, smartphones, and tablets for professional use in harsh and hazardous working environments.
- Its products are specifically designed for professionals operating in public safety, industrial manufacturing, mining, logistics, and emergency services.
- These devices comply with international ruggedness standards such as IP67/68/69 and MIL-STD-810G/H, providing resistance to water, dust, shock, and extreme temperatures.
- They support critical communication solutions including Push-to-Talk (PTT) and Mission-Critical Push-to-Talk (MCPTT).
