NEW STYLE MODERN HOMES

Finally a home you can afford "i.Home"

- Price start from ?

We build your home in six days, so you can rest in it on the seventh.

When Technology meets life...

- ELEGANT SIMPLICITY Designer Youcef Aden gives minimalism soul.

- Youcef Aden, in collaboration with London architecture firm ...., has thought through every space to perfection—opening up the landscape with dramatically framed views. You will hardly know where your home ends and the gardens begin. This connection to the location is evident everywhere, from the capacious lobby, to the roof-top terrace, to the best smart home there is, fully loaded with the latest technologies.

Some of the technologies used

Transparent TV

The transparent tv designed by Michael Friebe is a marvellous piece of technology that combines conventional LCD and the latest TOLED display technology. This allows to create non-transparent / solid moving pictures with rich colour reproduction and full contrast range from solid black to pristine white.
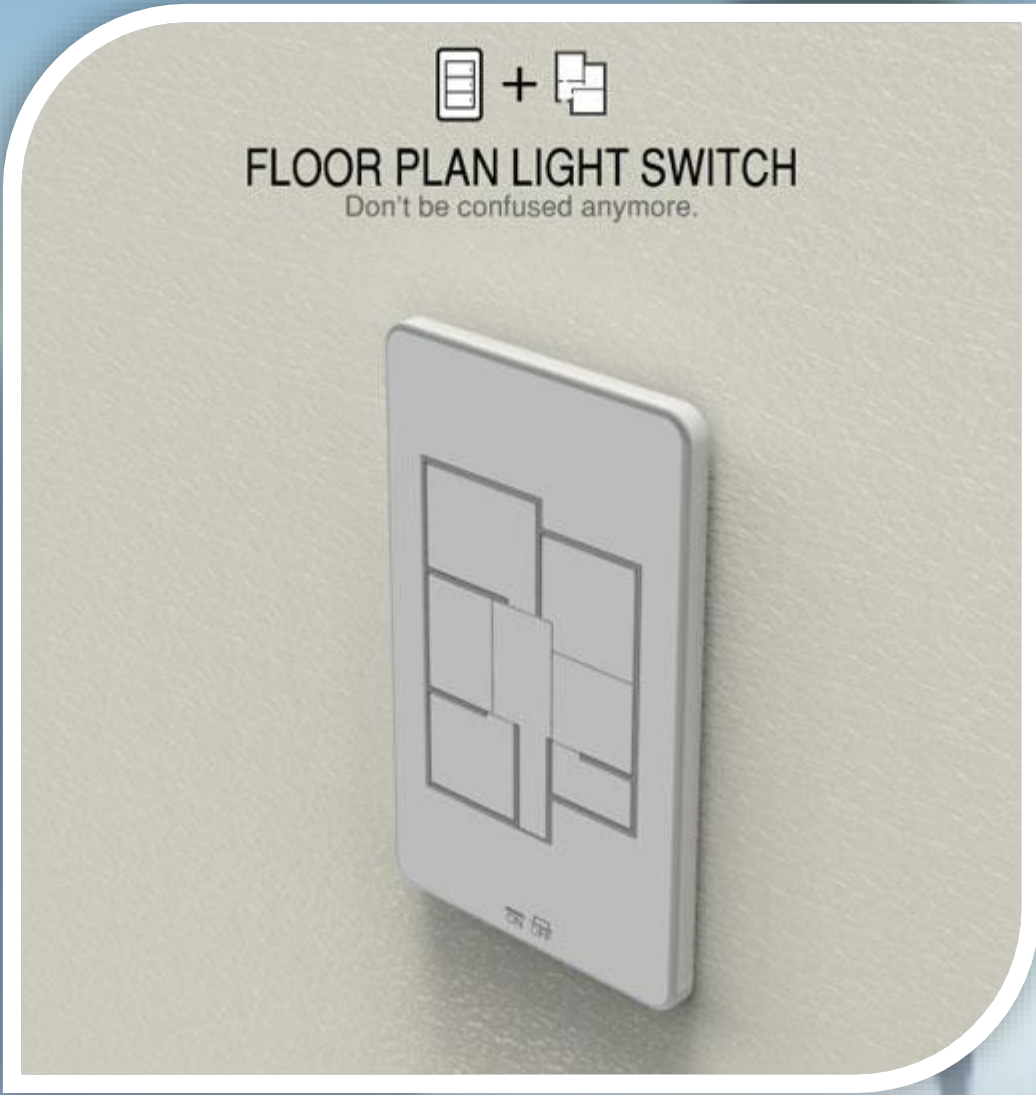

Floor Plan Light switch

Have you ever had a problem with forgetting which light switch stands for what light? Taewon Hwang came with the great idea of creating a master light switch with a simple design that shows you what lights you are turning on or off.

Self-sterilizing Door Handle

A "self-sterilizing door handle" to help prevent the spread of the new influenza virus which is transmitted by hand contact.

Door Handle With Self-sterilization System

How the UV Lamp Works

When the handle is used, the switch springs upwards and the lamp is turned off.

When the handle is not in use, the end of the door handle pushes down on the switch and keeps the UV lamp on.

USE
Button is up.
turn off the UV light.

USUAL
Button is down
turn on the UV light.

problem

01   02
03   04   However, hand washing is not a perfect solution.

Recently, many lives were lost around the world due to the new H1N1 influenza. Governments worldwide are emphasizing the importance of hand washing as a method of personal hygiene to prevent the spread of the new influenza. In fact, most diseases are spread through hand contact and we can prevent many diseases simply by washing our hands thoroughly. The new influenza is no exception, and hand washing is very important. However, hand washing is not a perfect solution.
Firstly, many people know that it is important to wash their hands, but they are often lazy about it. Secondly, even thoroughly washed hands become contaminated with germs with time or if we need to use an object that is shared by many people.

use

When the handle is not being used, the UV lamp continuously sterilizes it to maintain a clean condition.

The UV lamp turns off when the door handle is being used.

The brighter way to save energy.

Meet the 3rd gen Nest Learning Thermostat. It's slimmer and sleeker with a bigger, sharper display. And it saves energy. That's the most beautiful part.

Your thermostat controls half your energy bill - more than appliances, more than electronics. So shouldn't it help you save energy?

FIRE ALARM

This is going to be easy.
You can set up your Nest Protect in just minutes using your iPhone, iPad, or Android device.
And Nest Protect is now even easier to install.

Smart shower

e-Shower Connects Your Shower To The Internet Of Things (And Bathing)

The shower accoutrements will be connected. In fact, everything from your phone to the TV will talk to your e-Shower head, it will have everything to say about your day ahead.

Smart Home

Your i.Home Knows your moods, by using the technologies around you, helping you to happy life.

Smart Light

While the LED revolution may be over, the story of intelligent lighting is just beginning.

Homes who integrate sensing, networking and control into software-based platforms will lead the way.
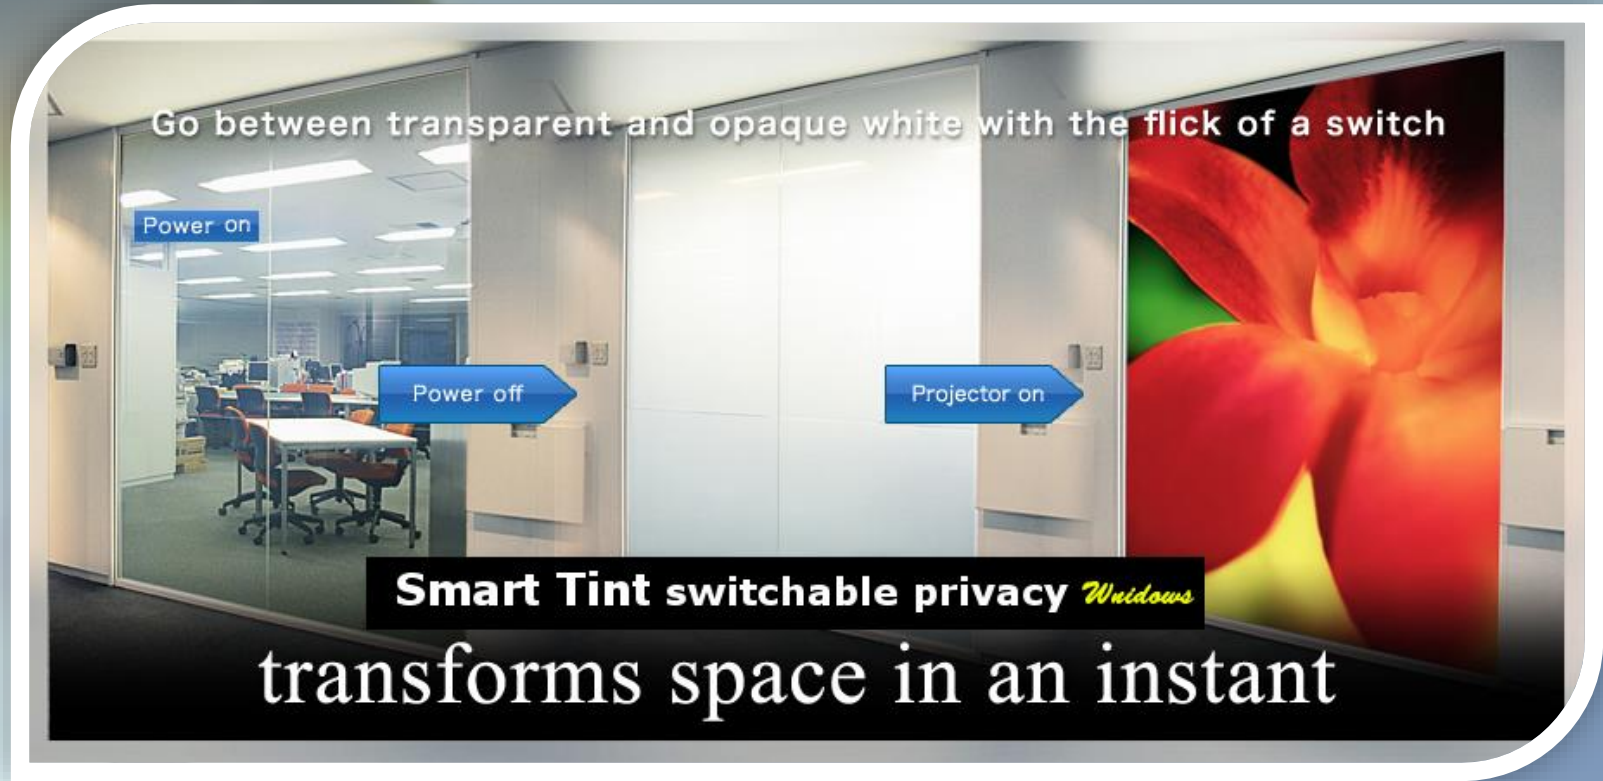

Solar Panels technology
