

TEIJIN

TEIJIN FRONTIER CO., LTD.
<https://www2.teijin-frontier.com/english/>

Life Evolves With **Fibers.**

Opening up new possibilities for fibers by combining our **power to create** with our **power to connect**.

Teijin Frontier is a trading company that specializes in fibers and possesses the ability to create products ranging from textile materials to finished goods and the power to organically connect customers, suppliers and markets. In accordance with our corporate message, "Life Evolves With Fibers," we will combine these two abilities as we continue to provide optimal solutions and new value.

Corporate Philosophy

We always create new values
that contribute to a healthy environment
and a prosperous future.

Creating Solutions to Support the Society of the Future, Daring to Advance with Our Frontier Spirit.

Teijin Frontier is a company that fuses two differing origin stories—as a manufacturer and as a trading company. We have a dual perspective: remaining committed to creating unprecedented products and services, and staying ahead of global trends to swiftly respond to the needs of the market. Our strength come from the synergy generated by these two perspectives of our hybrid organization; something unparalleled in the textile industry.

Our modern lives continue to progress at a dizzying pace, yet society faces a great deal of issues, including environmental issues. It's our belief that fibers can create many solutions to solve these social issues.

For example, in an effort to contribute to realize a sustainable society, we recycle our materials for use in clothing, interior design, and in construction materials. We further offer society safety and security

with the reinforcing materials we provide for use in concrete and tires. Moreover, in response to the advent of an aging society, we also supply products to support the healthcare and nursing care sectors.

This is how fibers are used in every aspect of our lives. It's our belief that our value as a company is in how we advance people's lives through the fibers we manufacture—our very corporate message is "Life Evolves with Fibers." We will continue to work towards the evolution of people's lives while harnessing this driving force by working with, not only our worldwide corporate network, but also with external partners with the latest knowledge in their fields and with government and academia.

We shall dare to advance into the future with our daring frontier spirit and come up with the many solutions that we are certain can support the society of the future.

Yasunari Hirata
President and Chief Executive Officer

Our Strengths

Creating new value through our combined capabilities as a trading company and manufacturer.

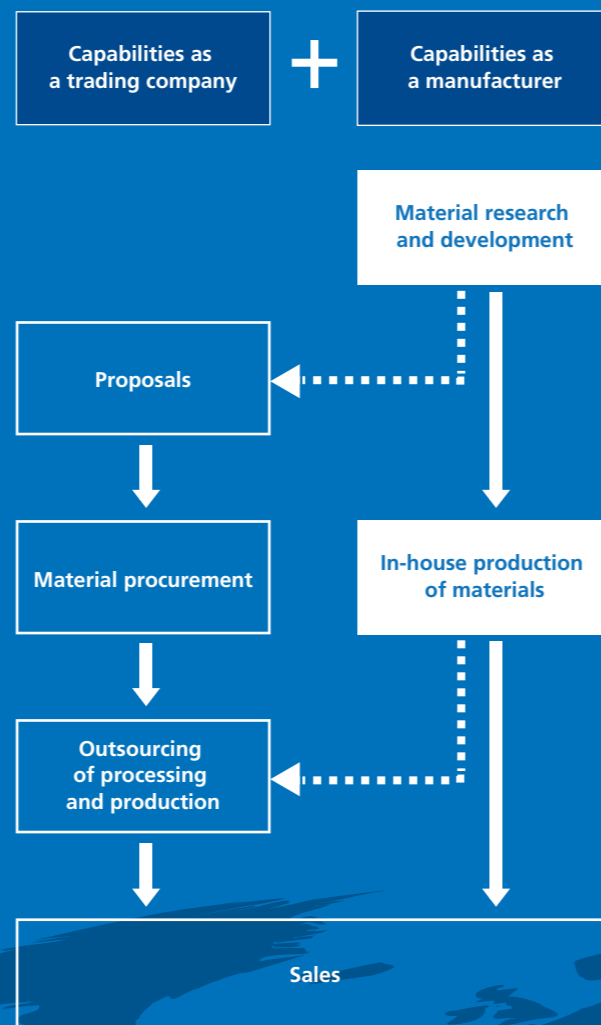

Teijin Frontier is fusing its conversion capabilities with its technological abilities, which cover all processes from material development to product manufacturing while creating new businesses in a wide variety of fields, including “textiles & apparel” and “industrial textiles and materials.”

A corporate entity capable of consistently managing the value chains of its businesses

Teijin Frontier is a corporate entity that is capable of managing its entire value chain, which includes the procurement of materials and the processing, production and sale of goods. We possess strong capabilities as both a trading company and as a manufacturer, which enables us to provide optimal solutions that fulfill customer needs during all business stages, from upstream to downstream. We fully utilize our development and manufacturing capabilities, which include the development and proposal of cutting-edge materials that achieve the highest levels of functionality; flexible and swift procurement, processing and commercialization; speedy product development that fulfills customer needs; production of original and advanced materials at our mother factory; the maintenance of a stable supply system; and the utilization of partner factories, which is made possible through our technical guidance. Furthermore, we provide valuable solutions by leveraging our understanding of needs and trends in a wide range of markets, which we cultivated through our broad access as a trading company; our supply chains, which enable us to flexibly procure products, even when they were not produced internally; our optimally located production; our global OEM network; and our sophisticated logistical capabilities.

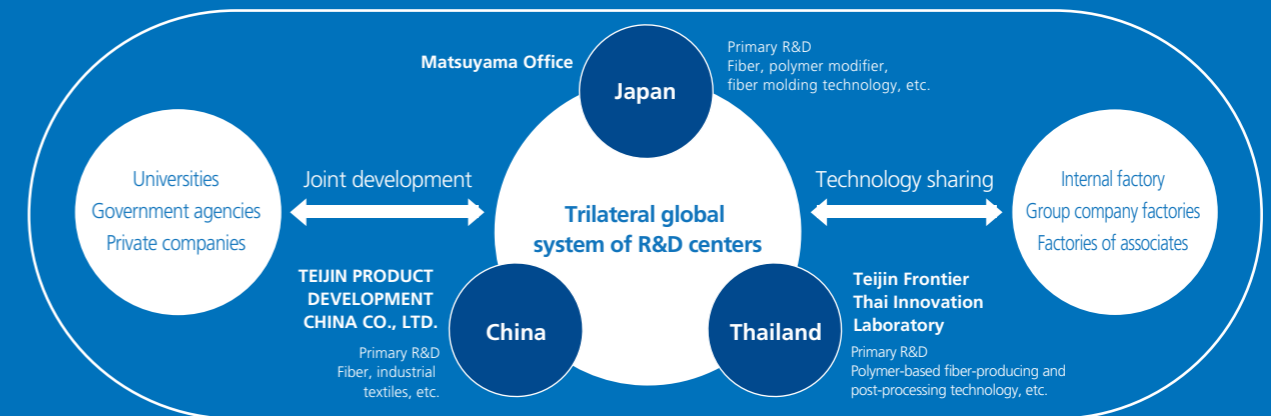

Teijin Frontier's capabilities

Manufacturing that creates new products and businesses

Based on our ability to cultivate technologies through our research facilities and at our factories, we are developing materials and products that are competitive in the market. This development is being conducted on a global scale, with R&D centers in Japan, China and Thailand. With support from our own internal production plants, and those at Group companies, we are focusing on researching and developing unique and superior new materials and technologies.

To respond to recent and rapid technological advancement, we working to establish technological collaboration with universities, government offices and private companies. Through these efforts, we are accelerating research and development and creating new products and businesses.

Opening up new markets and businesses

Developing products that fuse high-performance fibers with sensing technology

We are developing wearable solutions that combine our NANOFRONT™ nanofibers with motion sensing and vital sensing technologies. These solutions can be used in a variety of fields and locations, including sports, work sites, rehabilitation and health management.

Developing a solutions business that packages together emergency goods together

We are developing our MARUGOTO BOSAI™ brand, which provides all-encompassing damage reduction measures by combining our disaster prevention goods with those of other companies. This brand packages these goods together for use in private homes, hospitals, nursing care facilities and other areas in the event of possible disasters.

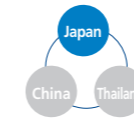

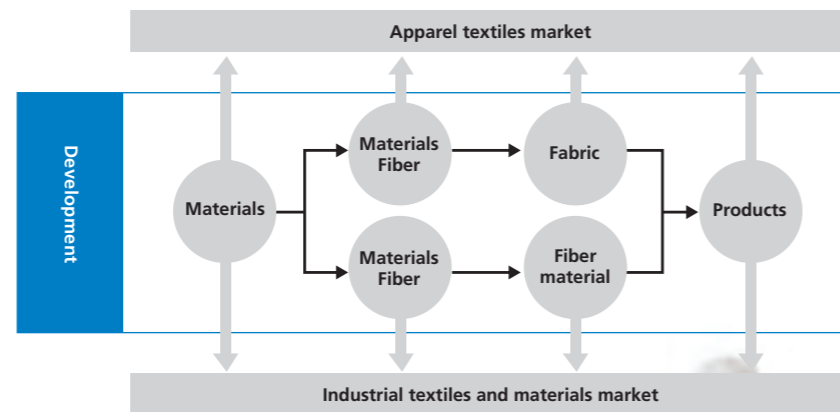

Technological Capabilities

Developing original materials that fulfill market expectations.

As a corporate group specializing in textiles, Teijin Frontier is developing products such as new materials that utilize advanced technologies and high-performance fibers that add new functionality to existing products. Supported by our trilateral global system of R&D centers, we also provide original materials that fulfill market expectations.

Development made possible at all stages, from materials to products

Teijin Frontier technology is characterized by fundamental technical capabilities related to fibers, consistent and competent performance ranging from material procurement to product evaluation and product development that is possible throughout all operational stages. We are building a development system that is capable of flexibly responding to individual customer demand in terms of both "textiles & apparel" and "industrial textiles and materials."

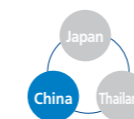

Japan

Promoting R&D resulting in original materials

As a fundamental development base and R&D center, our Matsuyama Office is involved in developments ranging from new polymers to cutting-edge fiber forming technologies, with a focus on the polyester fiber production technologies we have cultivated over many years. We are also developing original materials with substantial competitive power.

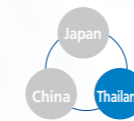

Teijin Frontier maintains manufacturing and processing facilities that handle a variety of components and products, including nonwoven fabric products such as filters and fibrous structures, and rubber reinforcing materials, as well as equipment used for related measurement and evaluation. With these resources, we are researching and developing products with new characteristics that are in demand in a variety of fields, including fiber.

China

Comprehensive development process that covers product development, trial production and product evaluation

Teijin Product Development China Co., Ltd., our R&D center in China, is responsible for a variety of development related to "textiles & apparel", "industrial textiles and materials" and other products, as well as evaluation technology. At the same time, it focuses on developing original industrial textile and material products while applying technology and expertise it cultivated through research and development related to apparel textiles.

Thailand

An R&D center creates new functionality

Our Thai Innovation Laboratory, which is located within the Thailand Science Park, is our R&D center for the Southeast Asian region. It is responsible for developing spinning technologies primarily utilized to create polymers used in polyester fibers, functional processing technology and environmentally friendly fibers. As an additional responsibility, it also focuses on training human resources who will contribute to research and development.

Developing a diverse range of businesses ranging from materials to finished products.

Supported by our capacity for technological development, we are conducting global rollouts of clothing products and other materials that are used in a wide variety of garments that are necessary in many situations encountered in our daily lives, including our original Fibers and fabrics.

Fibers

Teijin Frontier is developing a diverse range of high-performance Fibers that are adjusted to fit a variety of needs and applications. We also offer environmentally friendly Fibers that contain recycled and plant-derived materials.

Fabrics

With foundational support from our original textile materials and our capacity for technological development, we are creating sophisticated textiles with high added value in apparel-related fields, including fashion, casual wear, sports-wear and uniforms.

Products (OEM/ODM)

We are conducting a wide range of product development that includes the production of brand-name products (OEM) in the fields of fashion and sports apparel, as well as production that includes a design phase (ODM).

Development of wearable cosmetics

Raffinan™, Japan's first wearable cosmetic

Taking care to protect skin health, we have used our fiber technologies, which we cultivated over many years, to develop and sell Japan's first wearable cosmetic.

Raffinan™

Key original materials

SOLOTEX™, a high-performance fiber

SOLOTEX™ is a fiber created using polytrimethylene terephthalate (PTT). It has a stretchiness that comes from its spiral, spring-like molecular structure and sports a soft texture. SOLOTEX™ is also easily blended with other natural and synthetic fibers.

DELTAPEAK™ series, high-performance textiles

Through our DELTAPEAK™ series, we have made it possible to develop woven, knitted fabrics that offer flat fabric surfaces that contain the lowest possible amount of distortion, superior functionality and high-quality texture.

ECOPET™, a material with reduced environmental impact

ECOPET™ is polyester products (fibers, textiles, garments, and goods) made from recycled sources: various types of polyester waste, through the mechanical or chemical recycle process. It enables the effective use of the limited natural resources.

By effectively utilizing natural resources, we are helping to substantially reduce negative environmental impact.

NANOFRONT™, a high-performance nanofiber

NANOFRONT™ is first nanofiber in the world to boast a diameter of 700 nanometers. It sports comparatively high levels of water absorption, absorbability of particulates, and anti-transparent, as well as a soft texture. Applications for NANOFRONT™ are expanding to include sportswear and underwear, as well as various daily commodities and industrial materials.

Global production bases for apparel fabrics and apparel

Our Japanese and overseas Group companies are collaborating to build global production systems for fabrics and apparel. Utilizing our development and production facilities in Japan, China and other regions in Southeast Asia, we are producing need-fulfilling products in optimal locations while working to expand our apparel business, which systematically provides a variety of commodities ranging from materials to finished products.

Providing high-performance materials and products that support both industry and our daily lives.

Teijin Frontier develops state-of-the-art materials and products that are essential to both industry and to our daily lives and makes them available in a wide variety of fields. We also ensure that our materials are procured and treated in the most appropriate locations. Furthermore, in the automotive field, we are establishing supply chains in Japan, China, the ASEAN region, Europe and the United States.

Environment and infrastructure

Contributing to environmental conservation and infrastructure development while supporting safe and secure living

Energy conserving heat shield film

Disaster countermeasure products such as shelters that can be easily installed

Safe building materials for earthquakes

Textile materials for civil engineering, including concrete reinforcing

Oil absorption materials useful for oil spills and waste oil treatment

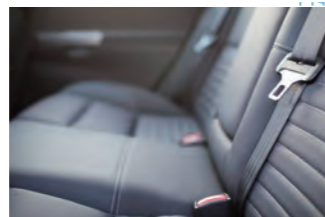

Products and materials including liquid filters and filter bags

Mobility

We provide products that leverage our expertise in production and treatment, our sophisticated quality control and our global network.

Fabric for airbags

Seat fabric and fiber used in seat belts

Unwoven molding materials used in automobiles, including wadding and sound absorbing materials

Reinforcing materials for automotive parts, including tires, hoses and belts

Living materials

We are enriching people's lives with high-performance materials and products that are helpful in variety of settings.

Tent materials and products that sport high functionality and sophisticated design

Interior fabric that meets a wide range of customer needs

Intricately designed carpet

Comfortable materials used in bedding and related products

Products that fully utilize the capabilities of nanofiber

Wiping cloth used in private homes and industrial applications

Healthcare

Using our high-performance materials, we contribute to people's health and beauty by offering a wide variety of commodities, ranging from sanitary materials to products related to sports, nursing care.

Nursing care products

Nonwoven fabric and staple fiber used in sanitary materials

Functional athletic supporters

Functional Mask

CSR Activities

Aiming to achieve a sustainable society.

Teijin Frontier develops businesses throughout its value chain, which includes research and development on materials, as well as their subsequent production and sale. We also promote corporate activities that fulfill a wide range of social responsibilities, including environmental conservation, personal safety, product quality, the working environment and human rights.

For more details concerning our CSR activities, please see our website:
<https://www2.teijin-frontier.com/english/csr/>

Environmental activities

Teijin Frontier Group Environmental Policy

1. We promote environmentally friendly business and contribute to the preservation of the planet by providing product and service solutions aligned with our corporate philosophy.
2. We aim to reduce our environmental impact on the planet and on local communities through prevention of environmental pollution in our supply chain. We do this by engaging in environmentally-friendly practices and education, and raising awareness of eco-friendly practices with our suppliers.
3. We apply the principles of Lean Manufacturing in our operations and aim to eliminate "MURI", "MURA", and "MUDA" * in our operations through the engagement of all our Group members. In this way, by striving for energy savings, reducing waste and through effective use of resources, we can contribute to the creation of a low-carbon society.
 * "MURI", "MURA", and "MUDA" mean irrationality, irregularity, and waste.
4. We comply with all applicable domestic and international environmental laws and regulations as well as agreements and standards defined by our Group.
5. We maintain an Environmental Management System covering all our operations. We regularly review and continuously improve this system in line with new requirements and changes in our operations.

Teijin Frontier Group Environmental Strategy

We support the society of the future, support environment-friendly manufacturing and systems under the corporate message "Life Evolves with Fibers."

Environmental Strategy and Goals

Our 3 Priority Goals

<p>Committed to the use of environment-friendly materials</p> <p>To conserve our planet's limited resources, we will remain proactive in using raw materials from recycled sources. We will also develop materials that make use of resources available in the natural world.</p>	<p>Committed to maintaining the purity of our oceans and atmosphere</p> <p>In our manufacturing operations, we will protect the oceans and atmosphere by minimizing the use of, and preventing the release of, environmentally harmful chemical substances.</p>	<p>Committed to an energy-efficient lifestyle</p> <p>We will focus on minimizing our energy consumption attributable to manufacturing. Moreover, we will offer products with functions that enhance energy efficiency and other aspects of an eco-friendly lifestyle.</p>						
<p>Products made with environment-friendly raw materials</p> <table border="0"> <tr> <td>Recycled</td> <td>Plant-derived</td> </tr> <tr> <td>50%</td> <td>10%</td> </tr> <tr> <td>minimum</td> <td>minimum</td> </tr> </table> <p>Products that can be manufactured with environment-friendly materials: 100% (by FY 2030)</p>	Recycled	Plant-derived	50%	10%	minimum	minimum	<p>Products that protect the environment</p> <p>100%</p> <p>Percentage of our products that contribute to a cleaner environment when in use: More than 10% (by FY 2030)</p>	<p>Products amenable to resource-efficient manufacturing</p> <p>100%</p> <p>Percentage of our products that are energy-efficient when in use: More than 10% (by FY 2030)</p>
Recycled	Plant-derived							
50%	10%							
minimum	minimum							

Social activities

Promoting CSR procurement

Teijin Frontier brings stability to its operations and enhances its corporate value by promoting CSR procurement and actively engaging in corporate initiatives that encourage responsible conduct through activities that impact social and environmental issues. We continuously apply PDCA cycles when conducting supply chain management and, when we detect issues, we work out improvement measures with our suppliers and provide ongoing support. In addition to additional policies and standards, we have established a set of CSR procurement standards (guidelines) for our suppliers that act as a foundational document governing all CSR procurement activities. These CSR procurement standards are in full compliance with the laws and regulations of each country in which we operate, as well as international guidelines, such as the UN's Guiding Principles on Business and Human Rights, which requests that all corporations and nations elevate their protection of human rights and improve their labor environments. To acquire understanding concerning the actual conditions at our suppliers, we require them to fill out self-assessment questionnaires that allow us to confirm their conditions in terms of labor, safety and health, environmental and quality. Based on the results of these questionnaires, we draft on-site inspection (audit) plans. We also conduct fact-finding surveys (audits) that examine the labor conditions and work safety of our suppliers.

Environment, Safety and Health (ESH) management

We are building and implementing environment, safety and health (ESH) management systems within our own company and at group company factories, in addition to conducting quality control as a manufacturer. We are also requiring ESH management at our partner factories. In accordance with our environmental policy, we are engaging in environmental conservation initiatives and are working to prevent environmental pollution. In terms of safety and disaster prevention, we are working to eradicate occupational accidents by actively engaging in ongoing preventative activities aimed at eliminating unsafe operations and conditions. These include "5S activities" (sort, set in order, shine, standardize and sustain) near-miss-related safety activities (sharing experiences that had the potential to cause, but did not result in, accidents) and safety patrols. With regard to health, our activities are grounded in the provision of healthy work environments for employees. With this in mind, we are working to shorten long working hours, improve mental health and reduce occurrences of lifestyle-related disease.

Social contribution activities

Outdoor recycling events

We are working to raise awareness regarding environmental issues by providing and introducing recycled products as we conduct cleanup activities aimed at reducing marine plastic waste and collect used plastic bottles at event venues.

Disaster support activities made possible through our products

As one of our disaster support activities, we provide fabrics used to make the paper tubes and cloth used in privacy-guarding partitions for evacuation shelters.

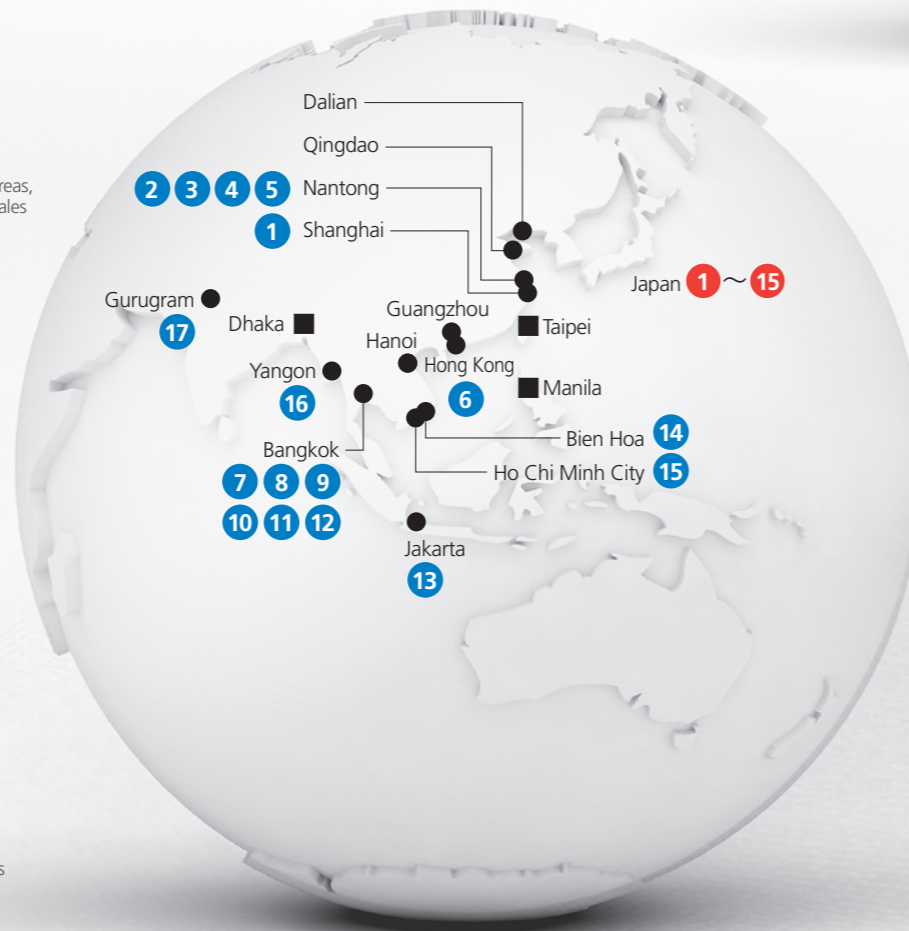

The Teijin Frontier Group is a global manufacturer and seller.

The Teijin Frontier Group includes diverse group companies that are responsible for various functions, including the development, manufacture and sale of textiles, and are located around the world. We are building a global network that allows us to respond to a wide range of needs through efforts ranging from local production to sales and distribution.

Asia

- 1 TEIJIN FRONTIER (SHANGHAI) CO., LTD.**
Import and export, transactions both within and outside bonded areas, intermediation and transit trade, simple processing and domestic sales
- 2 NANTONG TEIJIN CO., LTD.**
Manufacture and sale of woven and knitted goods made with synthetic fibers, with a focus on polyester filament fiber
- 3 N.I. TEIJIN AIRBAG FABRIC (NANTONG) CO., LTD.**
Manufacture, sale and export of textile products for the automotive industry
- 4 NANTONG TEIJIN AUTOMOTIVE FABRICS FINISHING CO., LTD.**
Manufacture and sale of high value-added fabrics and high-grade synthetic leather used in automobile interiors
- 5 TEIJIN PRODUCT DEVELOPMENT CHINA CO., LTD.**
Fiber-related research and development
- 6 TEIJIN FRONTIER (HONG KONG) LIMITED**
Import and export, domestic sales, and third-country trade
- 7 TEIJIN FRONTIER (THAILAND) CO., LTD.**
Domestic sale, import and export of textile products and others
- 8 Teijin Polyester (Thailand) Limited**
Manufacture and sale of polyester filament and staple fibers, as well as industrial fibers
- 9 Teijin (Thailand) Limited**
Manufacture and sale of polyester filament and staple fibers
- 10 THAI NAMSIRI INTERTEX CO., LTD.**
Manufacture and sale of fabric made from polyester filament fibers
- 11 Teijin FRA Tire Cord (Thailand) Co., Ltd.**
Manufacture of fabric used for tire cords
- 12 Teijin Cord (Thailand) Co., Ltd.**
Manufacture and sale of material reinforcing cords, including those used for industrial transmission belts and hoses
- 13 PT. TEIJIN FRONTIER INDONESIA**
Import, export and mediation services in Indonesia that are centered on textile products
- 14 TEIJIN FRONTIER (VIETNAM) CO., LTD.**
Production, sale and export of apparel, as well as the domestic sale, import and export of products related to industrial materials
- 15 TEIJIN FRONTIER SHONAI CO., LTD.**
Apparel production
- 16 TEIJIN FRONTIER MYANMAR CO., LTD.**
Production control and new factory development, as well as general investigation and data collection in the Myanmar market
- 17 TEIJIN FRONTIER INDIA PRIVATE LTD.**
Sales and trading of fiber, apparel and industrial products

- Domestic Group companies
- Overseas Group Companies
- Bases of Overseas Group Companies
- Overseas Representative Offices

North America

- 18 TEIJIN FRONTIER (U.S.A.), INC.**
Import and export of textile products, domestic sales and off-shore trade
- 19 TEIJIN FRONTIER MEXICO, S.A. DE C.V.**
Import, manufacture and sale of textile products, leather products and relevant materials

Europe

- 20 TEIJIN FRONTIER EUROPE GMBH.**
Import and export, domestic sales agency services and off-shore trade
- 21 J.H. Ziegler GmbH**
Development, manufacture and sale of components of nonwoven fabrics used in automobiles

Japan

- 1 TEIKEN LIMITED**
Manufacture and sale of products for healthcare, comfort, disaster prevention and safety
- 2 FOLKNER LIMITED**
Production, sale, inspection, adjustment and distribution of apparel
- 3 TEIJIN FRONTIER KNITTING CO., LTD.**
Development, manufacture and sale of knitted fabrics and manufacture of special textured yarns
- 4 TEIJIN LOGISTICS CO., LTD.**
Trucking, freight forwarding and warehousing
- 5 TEISHO SANGYO CO., LTD.**
Collection and sorting of bobbins and packaging materials; transportation and storage of yarn and woven fabrics; and manufacture and sale of reclaimed wool products
- 6 TEIKYO LACE CO., LTD.**
Knitted fabric production and manufacture of top-dyed and piece-dyed fabric
- 7 FRONTIER TEX LTD.**
Manufacture of synthetic fabric
- 8 TEXET LIMITED**
Design, development and sale of products related to household consumer goods
- 9 TEIJIN FRONTIER APPAREL INDUSTRY CO., LTD.**
Production, processing and sale of apparel
- 10 KANSAISHIZAI CO., LTD.**
Textile processing
- 11 UNISEL CO., LTD.**
Manufacture and sale of nonwoven fabric
- 12 TEIJIN CORDLEY LIMITED**
Manufacture, processing and sale of artificial and synthetic leather, as well as related research and development
- 13 TEIJIN TEDY CO., LTD.**
Manufacture and cord processing related to polyester filament and staple fibers
- 14 TEIJIN FRONTIER SENSING CO., LTD.**
Development and sale of wearable products
- 15 TEIJIN FRONTIER DG CO., LTD.**
Design, manufacture and sale of synthetic woven fabrics

Corporate Information

Corporate Profile (As of July 1, 2021)

Name of Company	TEIJIN FRONTIER CO., LTD.
Establishment	October 1, 2012 / originally founded in 1869
Paid-in Capital	¥2,000 million
Net Sales	¥314.9 Billion (Teijin Limited Fibers & Products Converting Business Group net sales in FY2020)
Number of Shares Issued	20,002,000
Shareholders	100% owned by Teijin Ltd.
Business Description	Sales and import/export of yarns, textile materials and clothing products, technical materials, industrial materials, automotive products, interior products, living articles, resins, films, industrial products, packaging materials, construction materials, synthetic leather, cleaning products, and various machinery, etc.
Number of Employees	871 (As of March 31, 2021)
Head Office	Nakanoshima Festival Tower West, 2-4, Nakanoshima 3-chome, Kita-ku, Osaka 530-8605, Japan Telephone: +81-6-6233-2600 Facsimile: +81-6-6233-5144
Domestic Offices	Tokyo, Nagoya, Gosen (Niigata Prefecture), Hokuiku (Fukui), Matsuyama Office
Oversea Business Bases	New York, Los Angeles, Mexico City, Hamburg, Achern, London, Paris, Vercelli, Hong Kong, Nantong, Shanghai, Dalian, Qingdao, Guangzhou, Bangkok, Jakarta, Ho Chi Minh City, Bien Hoa, Hanoi, Yangon, Gurugram, Manila, Taipei, Dhaka

Domestic Offices

Tokyo Branch	NBF Comodio Shiodome Bldg., 2-14-1 Higashi-Shimbashi, Minato-ku, Tokyo 105-0021, Japan Telephone: +81-3-6402-7001 Facsimile: +81-3-6402-7070
Nagoya Branch	Urbanet Fushimi Bldg., 1-10-20 Nishiki, Naka-ku, Nagoya City, 460-0003 Japan Telephone: +81-52-220-4868 Facsimile: +81-52-220-4939
Gosen Branch Office	3-4-45 Minami-honcho, Gosen City, Niigata, 959-1836 Japan Telephone: +81-250-43-3175 Facsimile: +81-250-43-3100

History

1869	Takemura Toubei Shoten (Kyoto City) opened its Osaka branch, which began to trade raw cotton, cotton yarns and cotton fabric	1990	Teijin Shoji Co., Ltd. took over its four subsidiaries, i.e., Teisho Kikai Hanbai Co., Ltd., Okayama Teisho Co., Ltd., Kansai Teisho Tent Hanbai Co., Ltd. and Kanto Teisho Tent Hanbai Co., Ltd.
1902	Iwajiro Suzuki founded Suzuki & Company in Kobe	1993	Nissho Iwai Iryou Co., Ltd. changed its name to Nissho Iwai Apparel Co., Ltd.
1912	Bunsuke Iwai founded Iwai & Company	2000	Nissho Iwai Textile Materials Corp. and the Textile Department of Nissho Iwai Corp. transferred their respective goodwill to Nissho Iwai Apparel Co., Ltd.
1918	Teikoku Rayon Co., Ltd. founded	2001	Nissho Iwai Apparel Co., Ltd. consolidated Nissho Iwai Textile Co., Ltd.
1918	Takemura Toubei Shoten changed its name to Takemura Shoten Co., Ltd.	2001	Teijin Shoji Co., Ltd. and Nissho Iwai Apparel Co., Ltd. merged to form NI Teijin Shoji Co., Ltd.
1928	Suzuki & Company founded a new company in the name of Nissho Company	2002	Teijin Fibers Ltd. founded
1936	Takemura Mengyo Co., Ltd. was founded	2012	N.I. Teijin Shoji Co., Ltd. and an apparel SBU of Teijin Fibers Ltd. merged to form Teijin Frontier Co., Ltd.
1943	Iwai & Company changed its name to Iwai Sangyo Company Ltd.	2017	In April, Teijin Frontier Co., Ltd. consolidated the polyester fibers business of Teijin Limited's High Performance Fibers Business Unit.
1952	Teijin Shoji Co., Ltd. was founded and began to sell rayon, staple fibers and textiles made of them	2021	In April, Teijin Frontier Co., Ltd. took over its subsidiary, Toho Textile Co., Ltd.
1953	Upon taking over Tosabori Sangyo Co., Ltd., Teijin Shoji Co., Ltd. succeeded to its brokerage business in the Osaka Chemical Fiber Exchange / Upon taking over Sanyo Kosan Co., Ltd., Teijin Shoji Co., Ltd. succeeded to its lumber sawing, casemaking and construction material production businesses		
1954	Teijin Shoji Co., Ltd. succeeded to the operation of the textile trading section of Nozaki & Co., Ltd. and set out on its textile export business		
1958	Teikoku Rayon Co., Ltd. started producing Tetoron® at the Matsuyama Factory		
1960	Teijin Shoji Co., Ltd. and Takemura Mengyo Co., Ltd. merged to form Takemura Teisho Co., Ltd.		
1962	Teikoku Rayon Co., Ltd. changed its name to Teijin Ltd.		
1964	Takemura Teisho Co., Ltd. changed its name to Teijin Shoji Co., Ltd.		
1968	Nissho Company and Iwai Sangyo Company Ltd. merged to make a new debut as Nissho Iwai Corp.		
1975	Nissho Iwai Textile Co., Ltd. was founded		
1980	Nissho Iwai Iryou Co., Ltd. was founded		
1982	Nissho Iwai Textile Materials Corp. was founded
