Dual-View X-ray Baggage Inspection System

Ai-Scan-DV

The Ai-Scan-DV X-ray security inspection system is a new generation X-ray security inspection system that integrates multi-functions such as intelligent detection, baggage connection, High-Resolution display, etc. This model is applicable to be deployed in scenarios such as customs, office buildings, large events, courts, prisons, embassies, factories, schools, hospitals, public places, etc. The size of the tunnel is suitable for boarding suitcase, small parcels, backpacks, envelopes, handbags, etc.

- **Material Classification:** Advanced material discrimination technology to recognize different materials and assign different colors (3 or 6 colors).
- **Intelligent Recognition:** Integrated with the advanced detection algorithm, which could detect more than 35 major types of target objects and alarm on them automatically.
- **HD Image:** Integrated with the new generation of image processing system, which could provide with a clearer X-ray image with high resolution.
- **Variable Speed:** One-click to switch the conveyor speed to fit different application scenarios.
- **Remote Management:** Network integration supported real time status, X-ray images, videos, alarm information can be viewed remotely through internet, and report can be viewed and downloaded remotely for better management process.
