Add the Barlines

the barlines vanished — use the time signature to put them back

Someone erased every barline! Read the time signature, then **add up note values from the left**: each time you complete a full measure's worth of beats, draw a vertical barline. The last measure keeps its final barline as a gift. Check your work: every measure between your lines must add up to exactly the top number.

LINE 1 — IN 4/4 (DRAW 3 BARLINES)

LINE 2 — IN 3/4 (DRAW 3 BARLINES)

Check Line 1 groups as 4 + 4 + 4 + 4 beats (the whole note fills the last measure alone); line 2 groups as 3 + 3 + 3 + 3 (the dotted half fills the last). If a barline splits a note in half, back up — notes never straddle a barline (that job belongs to the tie). Then scan the code to check by ear: after a bar of clicks, each line starts on a high click, and **every high click after that marks a barline**, just before the note it lands on.
