Name the intervals: major or minor

Now name the quality too. Every interval here is a 2nd or a 3rd — write **M2, m2, M3 or m3**. Count the half steps: m2 = 1, M2 = 2, m3 = 3, M3 = 4 (Handout 05). Warm up with Exercise 52.

Hint Watch for accidentals — a ♯ or ♭ changes the half-step count but never the letter count. E–F and B–C are the built-in half steps. By ear: Exercise 65 and Handout 375.
