Titik Pintar Offers an Educational Alternative During COVID-19

Best way for kids to learn for free during the virus pandemic

Jakarta, Indonesia - With the recent COVID-19 outbreak putting most of the world's activities into a halt, the Indonesian government takes a crucial step in temporarily closing schools as a method of prevention. How do we keep education of children going? Some kids would probably ask for more screen time at home by now. However, using gadgets only for entertainment could become an addiction that hinders their development. As a company, Titik Pintar continued to think about how they can help the education sector - and the answer was simple.

As an alternative, Titik Pintar will be available for FREE, while schools temporarily close. Titik Pintar is the gamification of the elementary school curriculum. Available in Bahasa Indonesia and in English. It offers Math & Science topics for all grades. After each quiz answered, kids can entertain themselves with a mini game. Parents can simply download 'Titik Pintar' on their phones and use the referral code 'Corona' upon registering to get a FREE access.

Titik Pintar's CEO Robbert Deusing stated "I am more than happy to help all Indonesian children that need to stay at home due to the COVID-19 pandemic. It is important for them to stay safe, healthy, and properly educated in the spare time they have. With Titik Pintar, I'm convinced that we can help parents teach their children at home in a fun way".

Supported by the Dutch Government and Embassy in Jakarta, Titik Pintar is an EduTech company aimed at elementary school children. Its application has been used and contributed to several schools and educational institutions. Not everything has to stop in these trying times. Life will go on; education will go on. Developing the youth's bright minds must continue to go on, now within the safety of their homes.
