WORK EXPERIENCE

Primero Systems
Jan 2021 — Present

Fullstack Software Developer

I am part of a team as a full-stack developer, working for Midwest Lab company. The project its built-in React and .Net Core using Postgresql as DB.

Follow Oz
Sept 2018 — Dic 2019

Fullstack Java Software Developer

I was part of the development team of an application called SandDollar for the Royal Caribean. The project has several modules with the main characteristics of the management of all the commercial activities of an island in the Bahamas where Royal Caribbean houses its passengers. Among the technologies that are handled are: Java, Android, Angular, Spring, Hibernate, Gradle.
The development and management of the SandDollar App are done through agile methodologies.

Crucijuegos
Nov 2016 — Dic 2017

Software Analyst and Developer

Worked on a 4 people team, developing a stand desktop system with magnetic cards in order to monitor employee working hours. Also worked in web technologies developing

a web admin system to configure all sell stands and make commercial financial reports. We use Java technologies, like Spring MVC, Hibernate, JSP. For front-end Jquery, HTML and Bootstrap, MySQL as database and Debian 5 and 8 as Servers.

Globant   Oct 2015 — Nov 2016

Java Developer

Worked as staff augmentation resource in a project with EMC company. Developing the website: www.emc.com, adopting Java EE and CMS Adobe Experience Manager technologies, taking part of the back end team, using agile methodologies.
