

Digital Services Act (DSA) Transparency Report

In accordance with the **EU Digital Services Act (DSA)**, we are committed to providing a transparent and safe online environment for our users. As part of our regulatory obligations, we provide the following information regarding our content moderation practices and the nature of our services.

Our Role as a Search Platform

We operate as a **search platform**. This means we facilitate your search for travel offers by scanning the web to provide a comprehensive overview of available options from third-party providers.

Because we serve as a bridge between you and these external partners, we **do not host or store** the travel offers, descriptions, or booking processes ourselves. Consequently, we do not host user-generated content (such as reviews or comments) on our interface, which significantly limits the scope of content moderation on our platform.

Transparency Reporting Data

The following table summarizes our activities related to content moderation and legal orders within the current reporting period.

Section	Value	Reason
User Notices	0	We do not host user-generated content for flagging.
Content Removals	0	We do not host or store the travel offers displayed.
Human Moderators	1	There is no hosted content requiring human oversight.
Legal Orders	0	No legal orders from EU authorities were received.

How We Rank Travel Offers

We aim to help you find the most relevant travel offers through an automated ranking system. Our primary goal is to match you with the best options based on the criteria you provide. Our ranking logic follows a hierarchy:

1. **User Inputs:** Foremost, results are filtered by your specific requests, including dates, destinations, and quantities.
2. **Relevancy:** We prioritize results that most accurately match the parameters of your search.
3. **Pricing:** Among relevant results, we emphasize the **best available price** provided by our partners to ensure value for our users.

Reporting period covered - 2025.
