About This Report

The federal E-Rate program, administered by the Universal Service Administrative Company (USAC) under the Federal Communications Commission, provides discounts of up to 90 percent on telecommunications, internet access, and internal connections for eligible schools and libraries. This report presents an E-Rate funding scorecard for every United States congressional district.

Each billed entity is assigned to the congressional district (119th Congress boundaries, U.S. Census TIGER/Line 2024) containing the largest number of its recipient sites, located by their USAC-reported coordinates; entities without usable coordinates use the district in their USAC profile. Funding totals are total authorized disbursements (FCC Form 471 FRN Status, USAC dataset qdmp-ygft); speeds are from Recipient Details and Commitments (avi8-svp9); pre-2016 history is from USAC legacy data (1998-2015). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid) — that’s the real state of USAC’s data, not an error.

Each district receives two pages: a funding overview with total disbursements, average discount rates, participating entities and service providers, and a disbursement history covering 1998–2025; followed by rankings of the district’s largest E-Rate recipients and service providers and average contracted connection speeds.

Funding figures are total authorized disbursements; each billed entity is assigned to the 119th-Congress district containing the most of its recipient sites (Census TIGER/Line 2024). 5-yr Total and Average cover FY2021–2025; FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that’s the real state of USAC’s data, not an error.
