Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

K S Telecom Inc.	–	–	–	–	$12K	–	–	–	–	–	–	–	–	–	–	–

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Cherrywood Elementary School	San Jose	50%	524	131	–	Urban

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Pacific Bell Telephone Company	$3K	$4K	$4K	$5K	$5K	–	–	–	–	–	–	–	–	–	–	–
Santa Cruz County Office Of Education	–	$2K	$2K	$2K	–	–	–	–	–	–	–	–	–	–	–	–
Ams.Net, Inc.	$1K	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Capsc-District Office	Santa Rosa	90%	–	–	–	—

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Recipient	City	Discount Rate	Students	NSLP	Sq Ft	Urban/Rural
Antelope Crossing Middle Sch	Antelope	60%	1,055	618	—	Urban
Antelope Meadows Elem School	Antelope	60%	678	395	—	Urban
Barrett Ranch Elementary School	Antelope	60%	627	415	—	Urban

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.
