Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Recipient Demographics (latest profile)

Recipient	City	Discount Rate	Students	NSLP	Sq Ft	Urban/Rural
Christa Mcauliffe Middle School	Jackson	60%	665	385	—	Urban
Crawford-Rodriguez Elementary School	Jackson	60%	718	459	—	Urban

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Subsidies by E-Rate Service Provider (top 10) (continued)

Service Provider	2025	2024	2023	2022	2021	2020	2019	2018	2017	2016	2015	2014	2013	2012	2011	2010
Verizon Network Integration Corp.	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Recipient	City	Discount Rate	Students	NSLP	Sq Ft	Urban/Rural
Administrative Building	Montclair	40%	—	—	—	—
Bradford Elementary School	Montclair	40%	388	33	—	Urban
Buzz Aldrin Middle School (Fka. Mount Hebron)	Montclair	40%	618	107	—	Urban

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Grunin Performing Arts Academy	Toms River	60%	285	39	—	Urban

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Service Provider	2025	2024	2023	2022	2021	2020	2019	2018	2017	2016	2015	2014	2013	2012	2011	2010
At&T Corp.	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Dyntek Services, Inc.	–	$45K	–	$34K	$64K	$6K	$14K	$48K	–	–	–	–	–	–	–	–

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Recipient Demographics (latest profile)

Recipient	City	Discount Rate	Students	NSLP	Sq Ft	Urban/Rural
Betty Maddalena Early Learning Center	West Orange	60%	38	17	–	Urban

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.
