Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Encore Technology Group. Llc	–	–	–	–	–	–	$197K	$162K	$162K	–	–	–	–	–	–	–

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Charter Communications Operating, Llc	–	$2K	–	–	–	–	–	–	–	–	–	–	–	–	–	–

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Recipient Demographics (latest profile)

Recipient	City	Discount Rate	Students	NSLP	Sq Ft	Urban/Rural
Bailey Station Elementary School	Collierville	50%	801	121	—	Urban

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Rutherford Elementary School	Rutherford	70%	243	105	—	Rural

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Charter Advanced Services (Ca), Llc	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Kipp Memphis Collegiate Elementary	Memphis	90%	386	386	–	Urban

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Recipient Demographics (latest profile)

Recipient	City	Discount Rate	Students	NSLP	Sq Ft	Urban/Rural
Baker Elementary School	Athens	80%	286	234	—	Rural
Calhoun Elementary School	Calhoun	80%	286	170	—	Rural
Englewood Elementary School	Englewood	80%	532	242	—	Rural

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Comcast Business Communications	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Comcast Business Communications	–	–	–	$288	$252	$252	$252	$252	$467	$359	–	–	–	–	–	–
Iglou Internet Services, Inc.	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.

Sources: USAC Open Data — E-Rate Recipient Details and Commitments (avi8-svp9), funded FRNs only; FCC Form 471 FRN Status (qdmp-ygft); USAC legacy commitments for FY2010–2015 (BEN level). Billed-entity figures are total authorized disbursements (entity-wide, exact). Per-recipient figures are a back-of-envelope estimate: each funding request line item's post-discount cost divided equally among the line's recipients. FY2026 omitted (funding year in progress). Note: the last year or two in any disbursement series always looks artificially low (FY2025 invoices are still being paid), which is why the history charts dip at the end — that's the real state of USAC's data, not an error. Technology Policy Institute, 2026-06-10.
