

Due to the Coronavirus COVID 19 Pandemic, any patients with flu-like symptoms should call our office before coming to your appointment. Common symptoms can include fever, cough, shortness of breath, headache, and intestinal symptoms in some cases. If you have these symptoms, you should consult with your Primary Care doctor or seek evaluation in an Urgent Care or Emergency Center. The physicians and staff of Somerset Gynecology and Obstetrics are working to confront this infection, and our practice patterns will likely change in response to this Pandemic.

Due to a high volume of patient concerns about this virus, please refer to www.cdc.gov/coronaavirus for up-to-date information about this infection, as we will not be able to respond directly to all requests for information. Our physicians receive our information from the CDC.
