

# New Years News & Skincare Specials

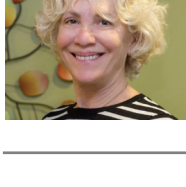

## Happy New Year!

Another year has passed. But do you look another year older? If you've been following our advice on sensible face and skin care, you should be glowing even in the middle of winter.

Your skin is a reflection of how you care for it. Your skin care routine needn't change in the winter. Continue to gently use a mild, fragrance-free soap, moisturize, drink plenty of water, and wear sunscreen every day. There's no magic to it, just common sense.

If you're seeing signs of aging, don't simply assume that nothing can be done about it. There have been remarkable improvements and breakthroughs in the formulations of anti-aging products in recent years and great advances in the science for successfully treating skin disorders that weren't thought possible years ago.

Even better news is that we now offer those products and the very latest technologies. It's very likely we have a solution for a skin issue you may have once thought or been told there was no remedy for. Now would be the perfect time to make an appointment for a complimentary skin care analysis and take advantage of our winter specials.
