

MAXIMIZE YOUR TBI CASE VALUES

The Smart Scan & Brain Mapping Solutions Partnership Advantage

Definitive Neurological Evidence
for Wisconsin Attorneys

THE GAME-CHANGING PARTNERSHIP

Smart Scan Medical Imaging is the exclusive Wisconsin imaging partner of Brain Mapping Solutions, delivering the most advanced TBI diagnostic capabilities available to Wisconsin attorneys. This exclusive collaboration combines Smart Scan's award-winning imaging quality with Brain Mapping Solutions' cutting-edge Diffusion Tensor Imaging (DTI) technology—creating an unparalleled advantage in proving brain compromise.

WHY THIS PARTNERSHIP MATTERS

Definitive Neurological Evidence for Wisconsin Attorneys

Unlike standard MRI scans that often appear "normal" in TBI cases, our DTI technology provides measurable, objective data that definitively demonstrates neurological damage. This quantitative approach transforms subjective symptoms into concrete medical evidence that increases case settlements and jury awards.

National Expertise, Exclusive Wisconsin Access

Brain Mapping Solutions operates in over 125 imaging facilities nationwide, but Smart Scan Medical Imaging is their **only authorized partner in Wisconsin**. This exclusive arrangement brings their proven track record of helping plaintiff attorneys win TBI cases directly to Wisconsin attorneys through our partnership.

Expert Witness Support Included

Both Dr. David E. Buechner and Dr. Jeffrey L. Rosengarten are available to serve as expert witnesses, providing authoritative testimony that strengthens your case presentation.

WHEN YOUR CLIENTS NEED DTI IMAGING

Post-Concussive Syndrome Indicators:

- Persistent headaches and dizziness
- Cognitive deficits and memory loss
- Difficulty concentrating
- Balance problems
- Fatigue and lethargy
- Altered emotional state
- Behavioral/personality changes
- Irritability and insomnia

The Hidden Truth: Standard imaging often fails to detect the microscopic axonal damage that causes these debilitating symptoms. DTI reveals what conventional scans miss.

THE SCIENCE THAT WINS CASES

Diffusion Tensor Imaging (DTI) Technology

DTI measures the variable diffusion of water molecules to quantitatively assess the physical properties of white matter and estimate axonal health. This advanced neuroimaging technique:

- **Detects microscopic brain damage** invisible to standard MRI
- **Provides objective measurements** that replace subjective symptom reporting
- **Creates compelling visual evidence** that juries understand
- **Establishes clear causation** between trauma and neurological symptoms

YOUR EXCLUSIVE WISCONSIN ADVANTAGE

The Only DTI Partnership in Wisconsin

Smart Scan Medical Imaging is Brain Mapping Solutions' exclusive Wisconsin partner, meaning no other imaging facility in the state can offer this proven combination of advanced DTI technology and expert witness support.

Higher Settlement Values

Cases supported by DTI imaging consistently achieve higher settlements because the evidence is irrefutable. Insurance companies can't dispute quantitative neurological data.

Stronger Jury Presentations

Visual DTI results create powerful courtroom moments. Color-coded brain maps clearly show damaged areas, making complex medical concepts accessible to jurors.

Expert Medical Testimony

Our radiologists don't just provide reports—they serve as compelling expert witnesses who can explain the technology and defend the findings under cross-examination.

MEET YOUR EXPERT WITNESSES

Dr. David E. Buechner - Brain Mapping Solutions

Specializing in TBI screening and diagnosis using advanced neuroimaging techniques. Dr. Buechner brings years of experience helping attorneys prove brain compromise in complex cases.

Dr. Jeffrey L. Rosengarten - Diaspora Radiology & Smart Scan Medical Imaging

Expert in imaging quality and forensic radiology with extensive courtroom experience. Dr. Rosengarten's testimony has been instrumental in securing favorable verdicts nationwide.

THE PARTNERSHIP PROCESS

1. Case Evaluation

We review your case details to determine if DTI imaging will provide beneficial evidence for your client's specific symptoms and circumstances.

2. Advanced Imaging

Your client receives DTI scanning at Smart Scan's state-of-the-art facility using the latest AI-enhanced technology for optimal image quality and diagnostic accuracy.

3. Comprehensive Reporting

Detailed analysis and reporting that translates complex neurological findings into clear, legally-supportive documentation.

4. Expert Witness Support

Our radiologists provide deposition testimony and courtroom appearances to defend the findings and educate the jury about the significance of the results.

PROVEN RESULTS ACROSS THE NATION

Brain Mapping Solutions has helped attorneys nationwide secure significant wins in TBI cases by providing the definitive neurological evidence that standard imaging cannot deliver. Now Wisconsin attorneys have exclusive access to this same proven advantage through Smart Scan Medical Imaging—the only authorized Brain Mapping Solutions partner in the state.
