

Advanced Women's Care of Pittsburgh, P.C. COVID, INFLUENZA, RSV Policy 09/12/2024

Patients: Per the most current CDC guidelines for respiratory viruses

Patients testing positive with COVID, INFLUENZA or RSV, must isolate for 5 days after

testing positive, if appointment is within 10 days of any of viruses listed above of a positive

test the patients are to wear a mask for the following 5 days outside of isolation.

This is the current guideline and is subject to change going forward.

Thank you,

Dr. Peske, Dr. Turner and Dr. Harvison

Patients 9/12/24
