

To our families of 5-11 year old patients:

We know many of you are anxiously awaiting approval and distribution of Pfizer's COVID vaccine. Some fast facts about COVID vaccine administration at Capital Area Pediatrics:

- We do not yet have vaccine supply or confirmed shipment.
- We are not currently scheduling appointments.
- We do not have a waitlist.
- While vaccine supply will be abundant across the country, we are limited by what the health department distributes locally.
- Once we have confirmed vaccine supply in hand, we will be sending another email communication with a self-schedule link for our limited clinics.
- After the initial supply, we will add more appointments once we confirm we will receive more supply from the health department.
- Please do not call the office, send a portal message, or send a portal appointment request about vaccine supply and appointments.
- We encourage you to read our emails and check our website regularly. We will also be pulsing out from our website more urgent information. Please subscribe to our [website](#) to receive these updates!
- We want all our eligible patients to get immunized. If we do not have an appointment that works for you, please visit [vaccinate.virginia.gov](https://vaccinate.virginia.gov) in the coming days. Our community partners will also be adding clinics as they receive vaccine.

Thank you for your patience.

Capital Area Pediatrics
