

Capital Area Pediatrics is excited to announce that we have received our first small shipment of COVID Vaccine for 5-11 year olds! As we receive more supply, we will continue to add vaccine clinics. Currently, we are ONLY administering at COVID 5-11 year old vaccine clinics. We will NOT be administering at well visits due to supply and will NOT be administering with 12+ year olds to avoid dosing errors.

We know that many of you have been anxiously awaiting vaccination for your child. We are doing our best to accommodate you as we can. When we are able to add more visits, we will message you again. We encourage you to schedule with us or with anyone in the community. Please visit vaccinate.virginia.gov, vaccines.gov, or [CDC VAMS](https://www.cdc.gov/vams/) for locations in the community. Please check with major pharmacy chains, such as CVS and Walgreens, that book on their own site. Please check with [INOVA](#) who plan to add more appointments as supply allows. Loudoun families, check [here](#).

Please subscribe to our [website](#) to receive urgent pulses and always come back to check for [appointment availability](#) as we add more visits or patients make cancellations.

Please click [here](#) to check for our COVID vaccine 5-11 year old availability. You may go to any CAP site that is available. Every child in your family needs a separate appointment. Your 2nd dose will be scheduled on the day of dose 1 at the office.
