FAST TRACK PROJECTS NEED FAST TRACK SOLUTIONS

Underground infrastructure solutions from 

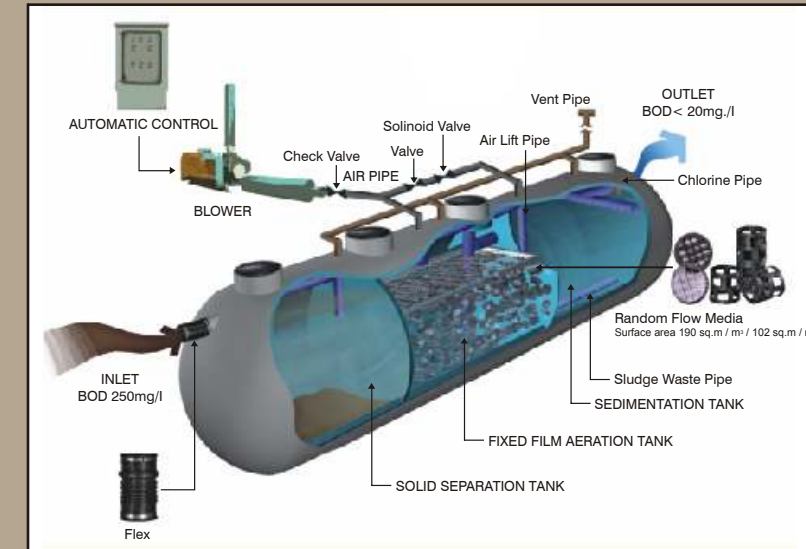

In line with its innovative past, Sintex is now pleased to bring to you wide range of underground products and solutions. Civil construction of underground infrastructure is both expensive and time consuming, which leads to delay in implementation of various infrastructure and building projects. By judicious use of state-of-the-art machines we have created several products that are time saving, cost saving and durable.

In underground infrastructure, Sintex offers extensive package in the form of FRP Underground Water Storage Tanks, FRP Manholes, Decentralized Wastewater Treatment Systems and Anaerobic Septic Tanks. These solutions are ideal for Infrastructure Development Companies, Corporates, Builders, Colonies, PWDs, Municipalities, Nagarpalikas, Gram Panchayats, and other such Civic Authorities, NGOs, Hospitals, Townships, SEZs, Industrial Complexes, Institutional Complexes etc.

Sintex Decentralized Wastewater Treatment Systems (DEWATS)

NBF series

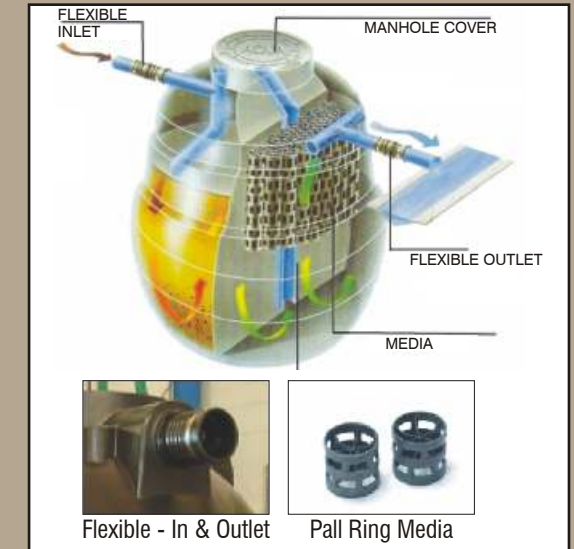

Applications

NBF series is ideal for malls, hospitals, office buildings, institutions, townships/colonies, high rise buildings etc.

Capacity: 10 cu.m/day to 150 cu.m/day

Unique Features 100% eco friendly | Rust proof | Leak proof | Durable | Light weight | Easy-to-install

PWTS-AM series

Applications

PWTS-AM series is ideal for individual bungalows, low rise apartments, restaurants, offices, small factories etc.

Capacity: 800 to 6000 liters

Sintex FRP Manholes

Quick & easy to install

Unique Features

100% Corrosion free | Readily available (Minimum lead time) | Easy & fast installation | Leak proof
Light weight | Can take traffic loads

Height: 3 ft. to 42 ft.

Diameter: 4, 5, 6 & 8 ft.

As per ASTM D-3753

Applications

- Ideal for municipal and industrial water / sewer / storm water lines
- Catch pits for storm water lines
- Townships
- Resorts
- Inspection chambers for cables and ducts

Sintex FRP Underground Water Storage Tanks

In technical collaboration with M/s. Containment Solutions Inc., USA.

Unique Features

- 100% rust proof and leak proof
- Can be re-installed
- Extremely quick installation and ready to use as compared with long construction time taken by conventional RCC underground sumps / steel tanks
- Can be installed for under the traffic loads which saves space

Applications

- Large scale applications in residential complexes/buildings, hospitals, resorts & schools for rain water harvesting, waste water storage, irrigation, sewage & fire fighting water storage

Capacity: 10 KL to 50 KL
