

# AdBlue®

## Diesel Exhaust Fluid

### Packaged and Bulk Supply

Premium quality AdBlue® from TRT is a cost effective and reliable option for your business. From small portable units and 1000L IBC's to bulk delivery and on-site bulk tank installation options for fleet supply, we have the right AdBlue® solutions for your operation.

AdBlue® is a diesel exhaust fluid automatically injected into your trucks exhaust system. It helps to help reduce oxides of nitrogen emissions from your vehicle. Made from pure urea and deionised water, TRT AdBlue® is high quality, non-hazardous, non-toxic, and non-polluting.

TRT AdBlue® meets the high standard and purity requirements of ISO 22241 and meets all industry OE requirements. Using inferior or diluted products, can affect engine performance and even emissions requirements. Make sure your AdBlue® is right for your business.

## Portable Units

TRT offer a range of standard portable Adblue® options:

- 10L and 20L Portable Units
- 210 Litre Drum
- 1000 Litre IBC

We also have a range of dispensing equipment and a free pick up service when reordering IBC's.

Onsite 5,000L Self Bundled AdBlue Tank

5,000L Industrial Single Skin AdBlue Tank

5,000L Slim Line Single Skin AdBlue Tank

## Bulk AdBlue® ...for the long haul!

TRT can provide bulk supply of AdBlue® at very competitive prices, nationwide. If you have 4 or more trucks in your fleet, then Bulk AdBlue® supply can reduce your overall business cost.

Our bulk tanks are industrial strength, made specifically for the storage of AdBlue® and designed for NZ conditions.

We have a number of bulk supply options, with fully funded\* tanks available for installation on your sites.

- No calling and follow-up on orders required with tracked use.
- You are only supplied when you need it.
- We unload it into your tank(s) - handling risks are eliminated.
- Designed to help improve your overall fleet efficiency.

Talk to us about your fleet requirements - we are committed to help you make savings on AdBlue supply!

## Dispensing Equipment

TRT has a full range of dispensing equipment available including:

- Hand operated transfer pumps
- Gravity feed kits
- Pumps and nozzles
- Digital flow metres
- IBC Covers
