Technology Shifting ®

Point of Sale

A Point-of-Sale (POS) system holds immense significance for restaurants and cafes as it plays a crucial role in efficiently managing various aspects of food and beverage businesses. This system enables seamless order management, menu organization, seating arrangements, and even offers the flexibility to design custom dashboards that display menu items in multiple languages. Moreover, it facilitates capturing customer signatures, handling breakfast operations, accepting payments, and managing other essential tasks through a unified portal.

Administrators can conveniently create and organize promotional campaigns, provide waiter instructions, and maintain client menus by accessing a centralized repository. Furthermore, managers can gain valuable insights into orders and sales, categorized by groups or locations, through comprehensive reports. The system also supports integration with diverse food and beverage-related systems like ERP, Mobile Apps, and Operations and more, ensuring a streamlined and cohesive operation.

Technology Shifting

Enterprise Resource Planning "ERP"

ERP Systems are software that helps you run your entire business, supporting automation and processes in finance, CRM and sales, human resources, inventory, fixed asset management, project management, manufacturing, supply chain, services, procurement, and more.

With an ERP system, businesses can streamline their processes, reduce errors, and improve efficiency.

trustangle ®
Technology Shifting

Accounting Systems

An accounting system holds immense importance for businesses, regardless of their scale. It serves as a software solution that facilitates the effective management of financial aspects such as bookkeeping, invoicing, payroll, and financial reporting.

By employing an accounting system, companies can meticulously track their expenses, income, and profits, thereby enabling them to make well-informed and educated financial decisions.

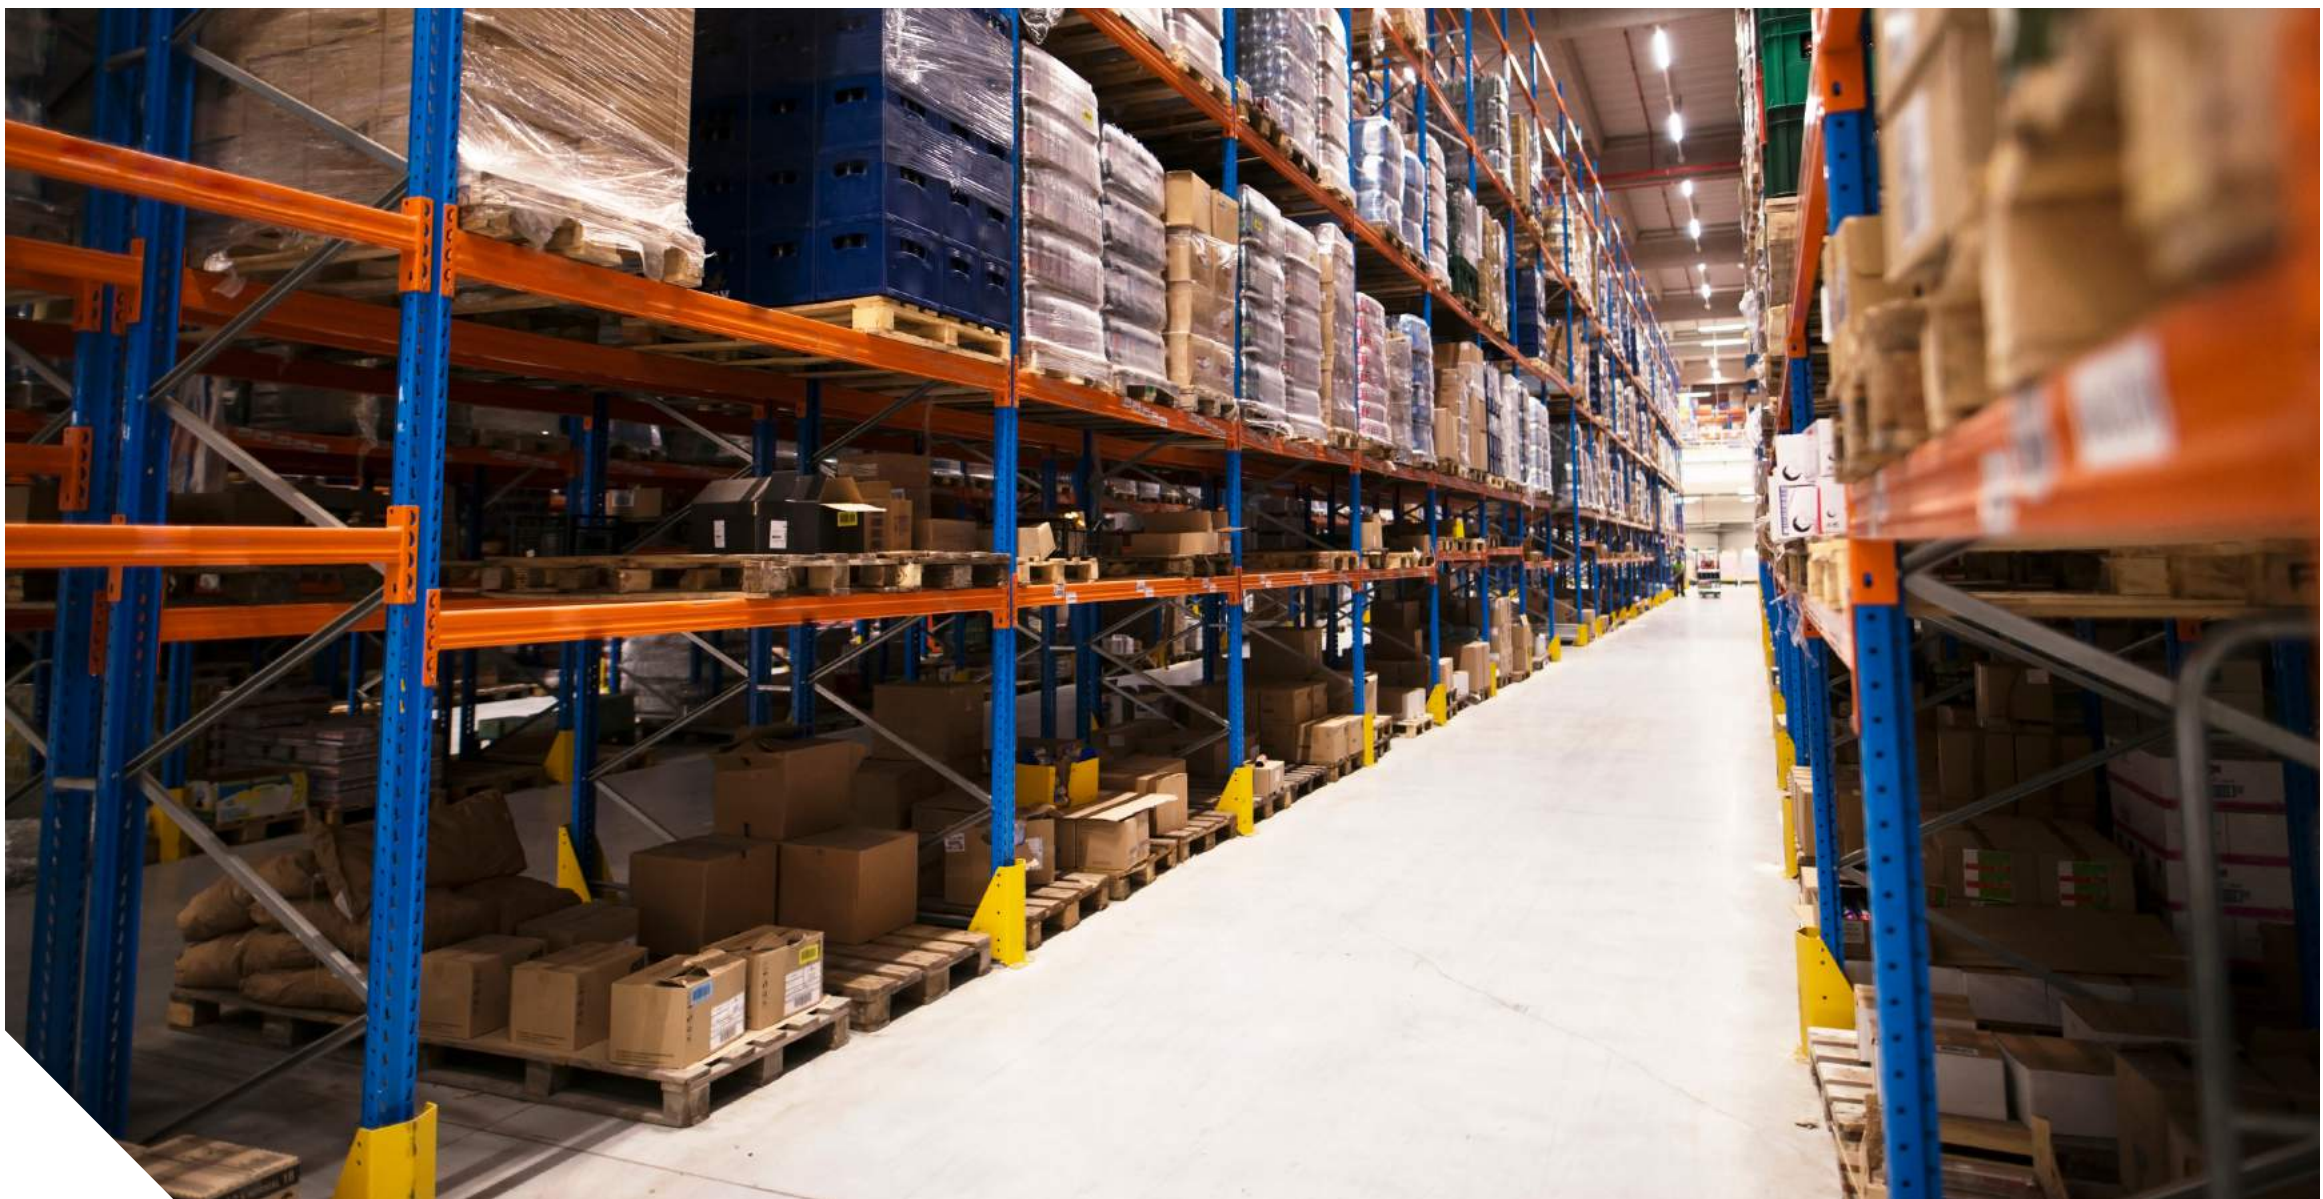

trustangle®
Technology Shifting

Inventory Management System

An Inventory Management System is a software solution designed to assist businesses in effectively handling their inventory-related tasks, such as ordering, receiving, stocking, and tracking.

By utilizing an inventory management system, businesses can efficiently minimize waste, optimize inventory levels, and enhance their overall financial performance.

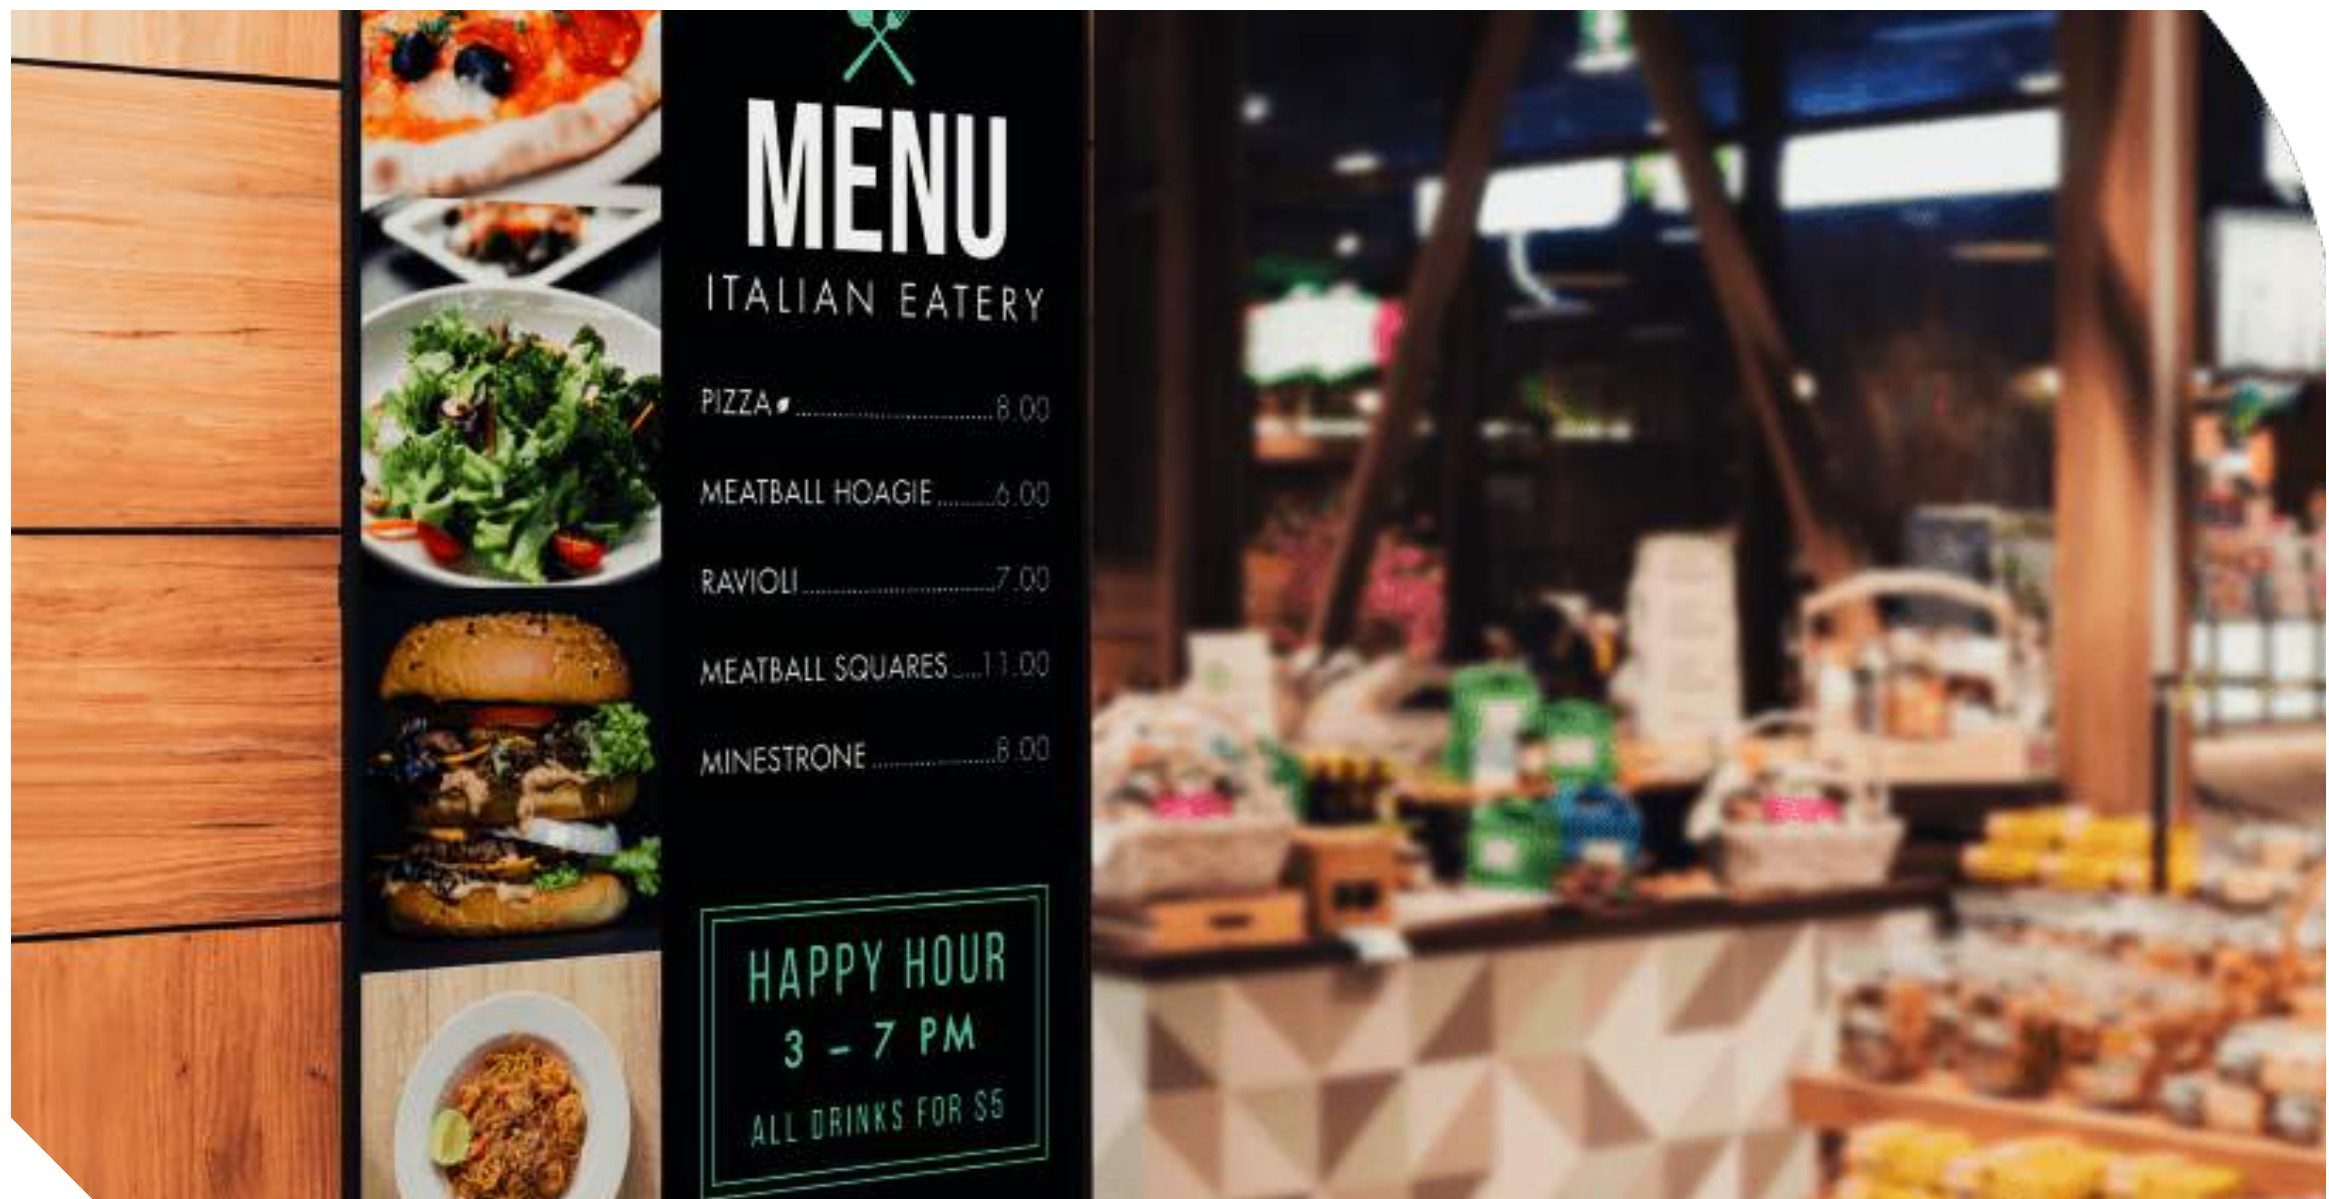

trustangle
Technology Shifting

Digital Signage Solution

Digital Signage is a centrally controlled system. A content distribution platform by which to playback digital content to one or many displays or screens.
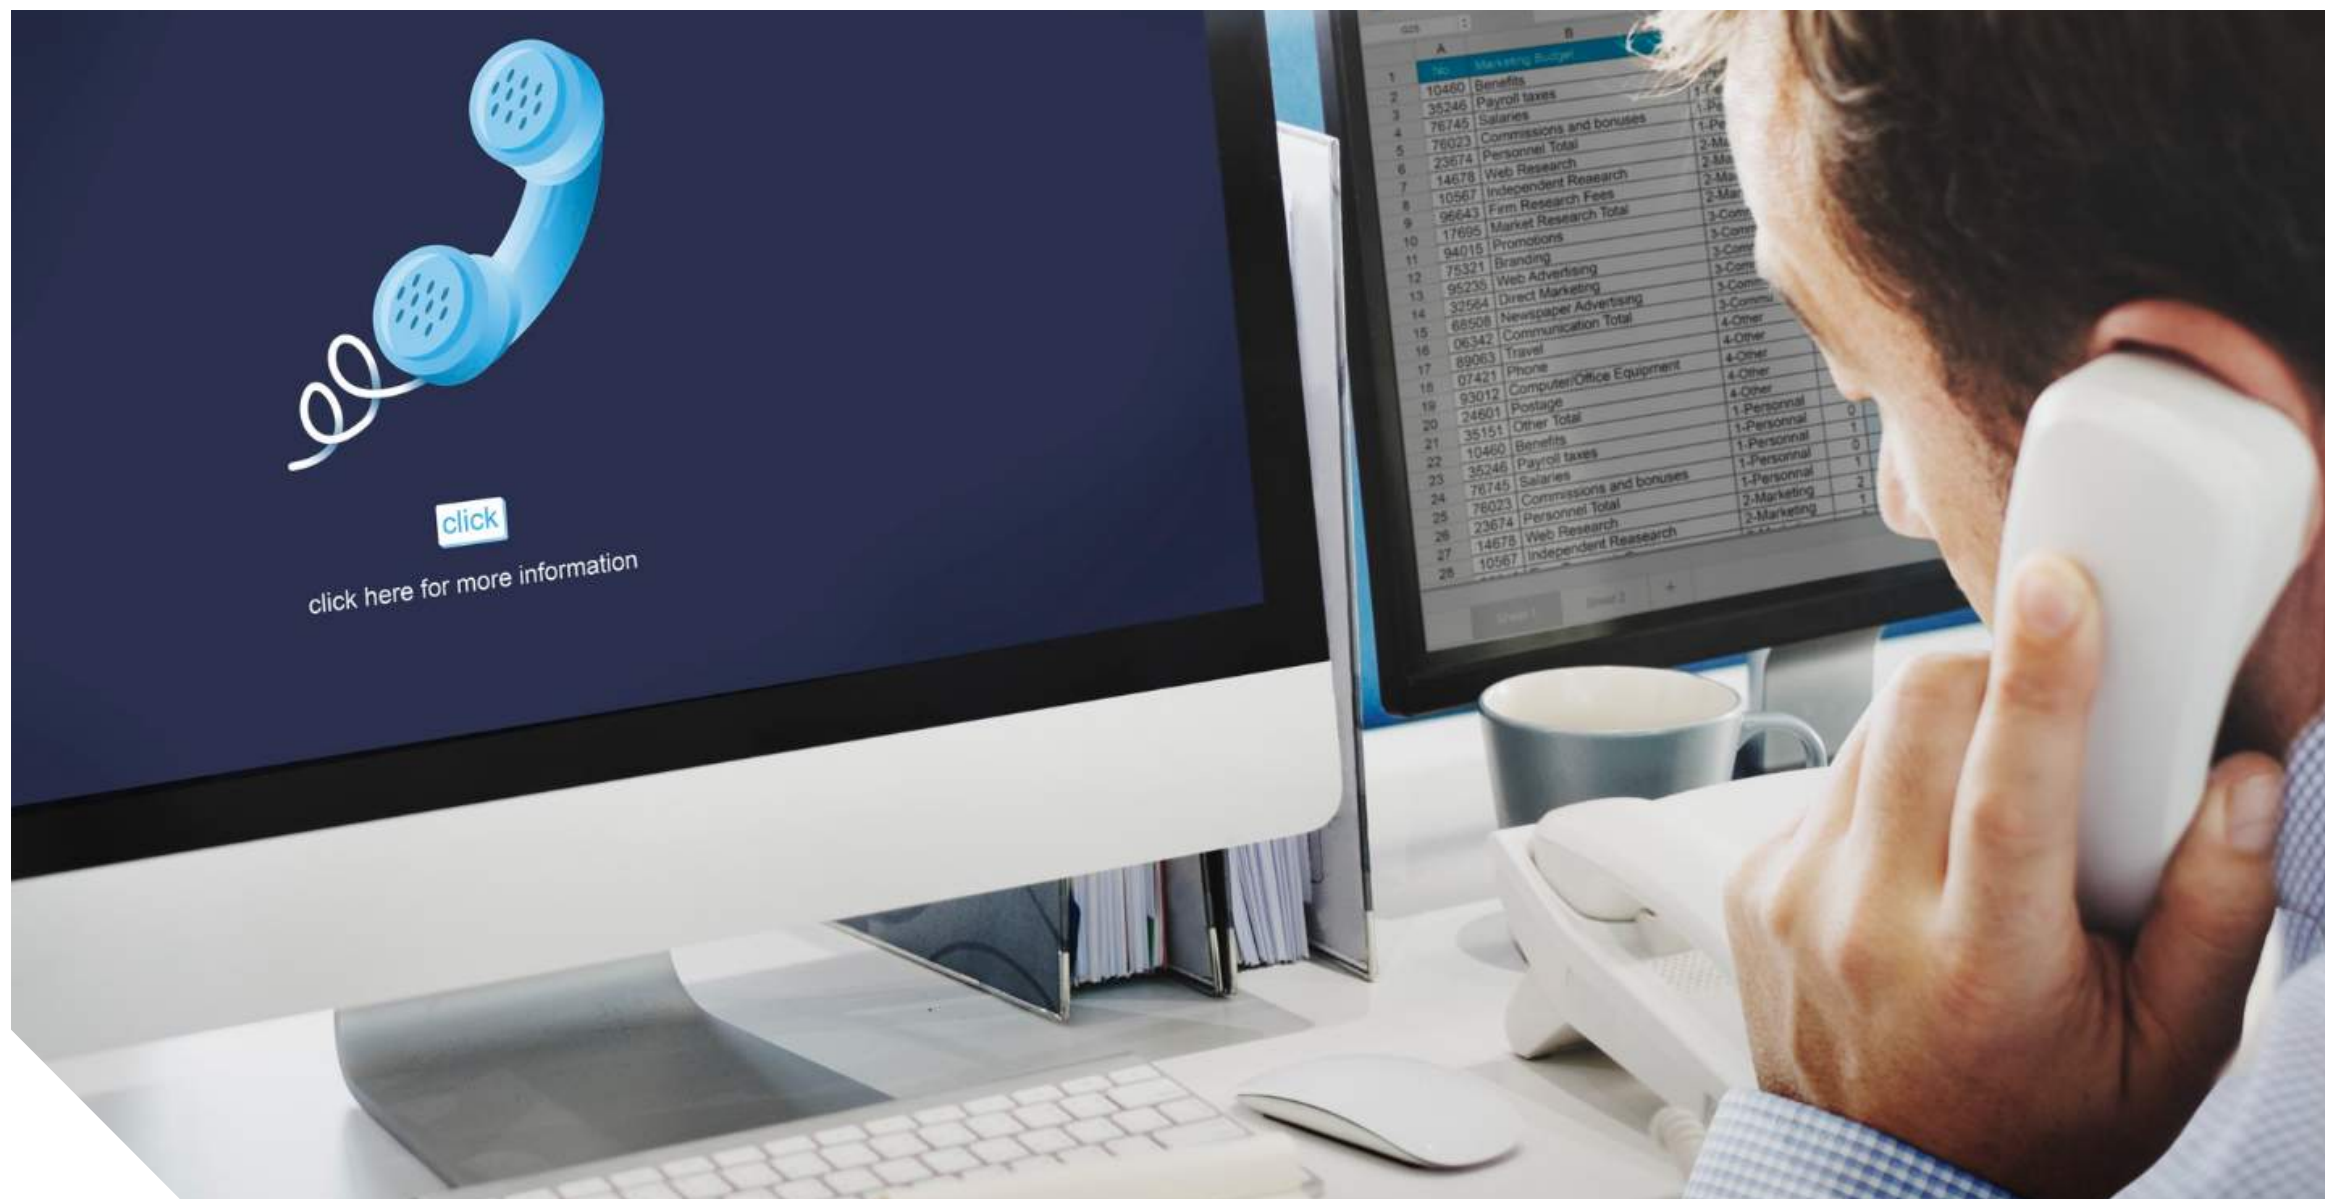

Digital screens are used for relaying any number of types of information such as automated check in, real time welcome information, dine in services, personalized concierge service, wall arts, events, emergency notices, advertising and more.

trustangle®
Technology Shifting

Digital Contact Center

Digital contact center is a software solution that enables businesses to effectively handle customer interactions across multiple communication channels, such as email, chat, social media, and phone.

By utilizing a digital contact center, businesses can deliver timely and efficient customer service, resulting in enhanced customer satisfaction and increased customer loyalty.

trustangle
Technology Shifting

Human Resource Systems
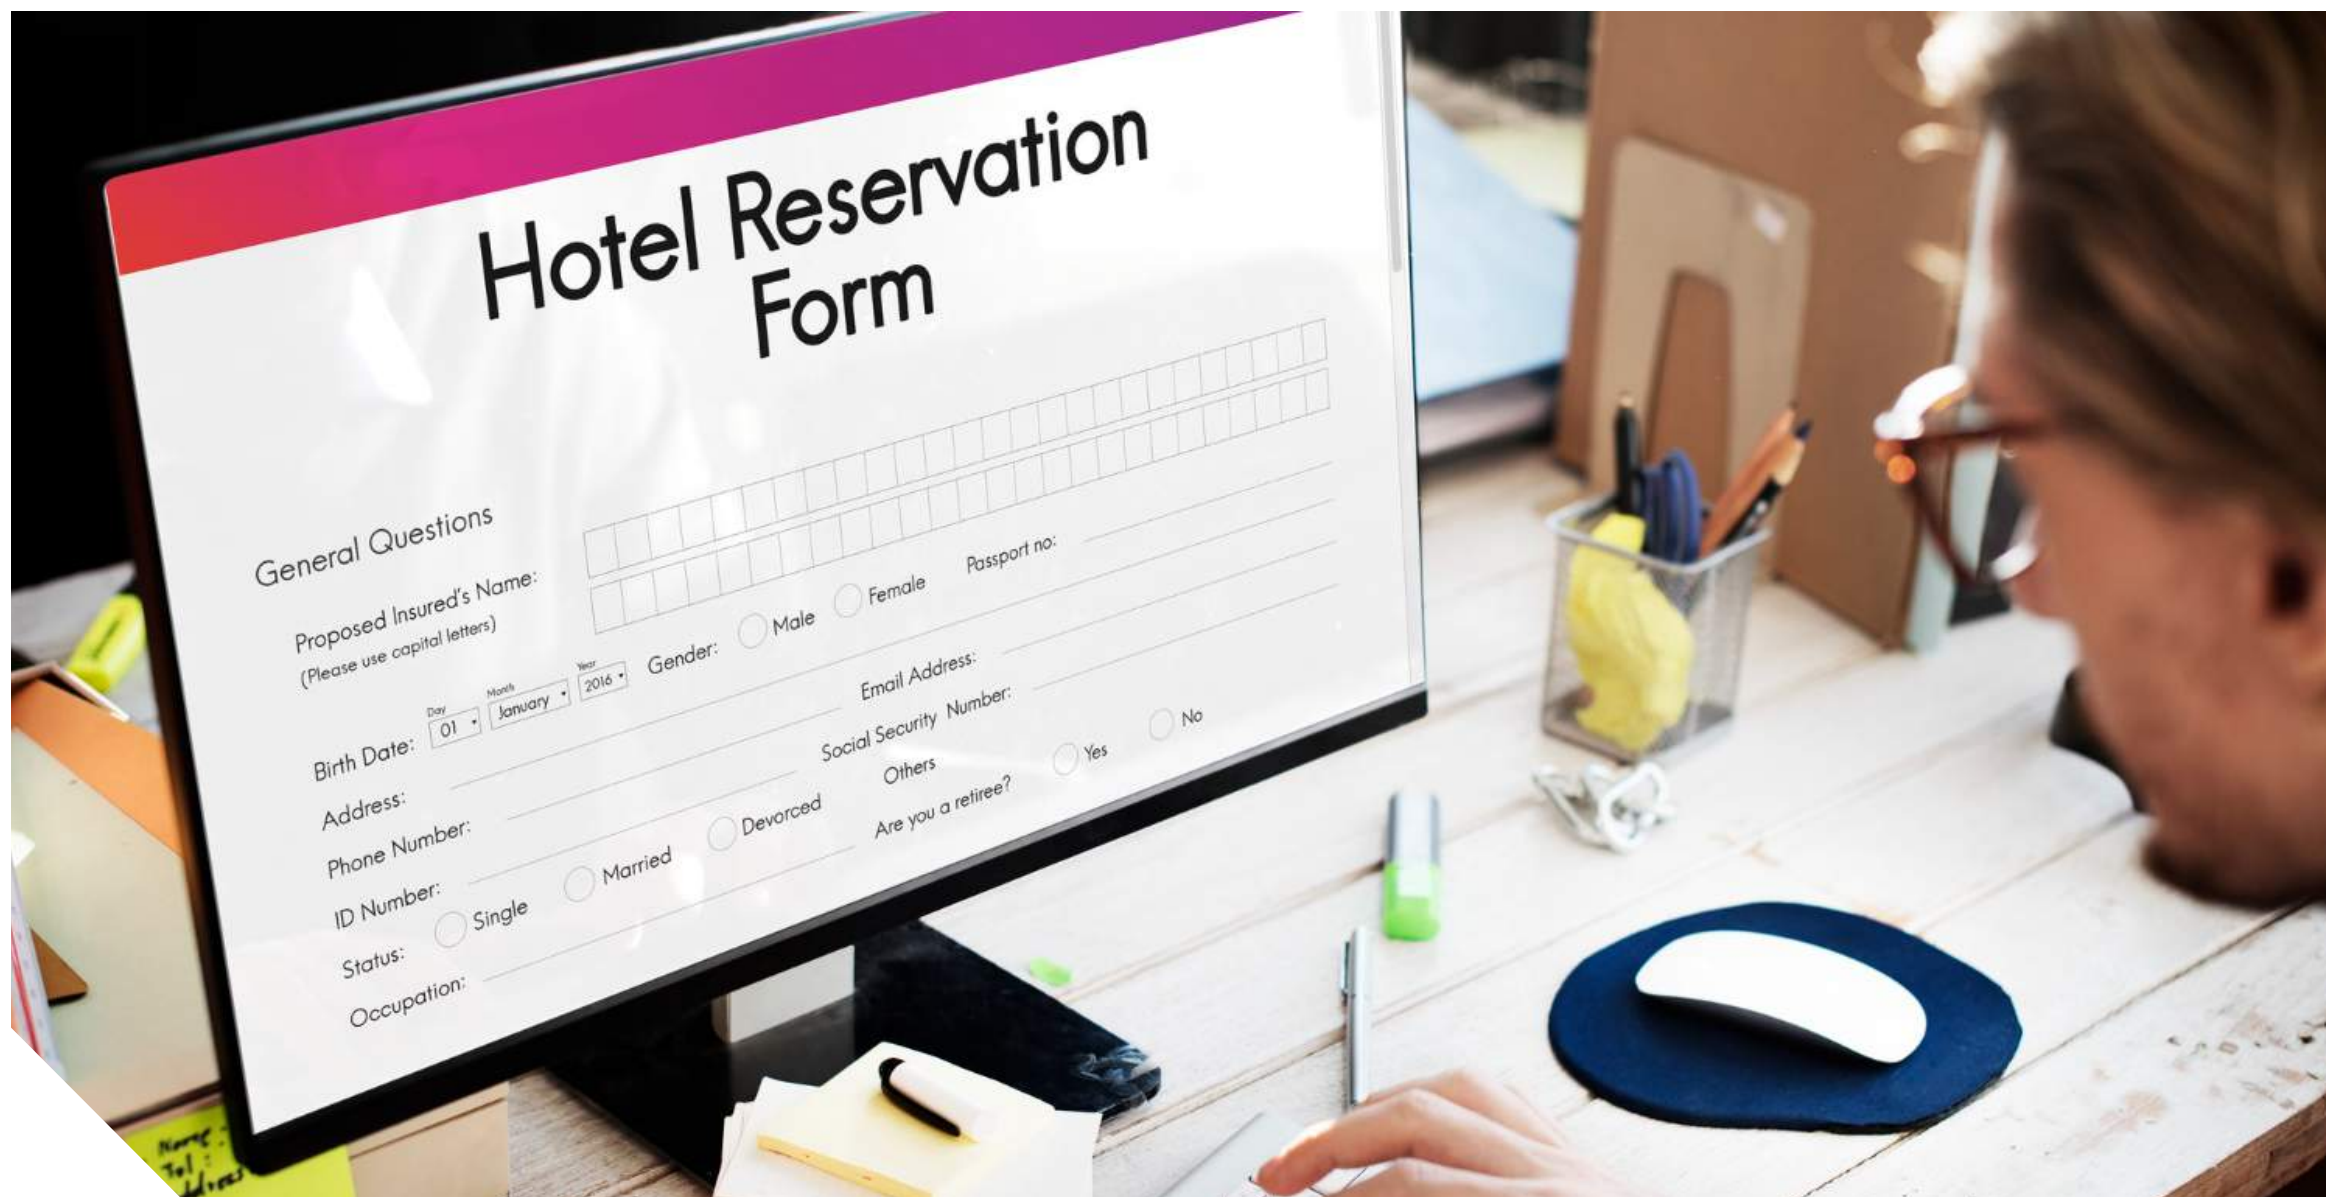

HR system is a powerful tool designed to assist businesses in efficiently managing their workforce, encompassing various aspects such as recruitment, onboarding, training, performance evaluation, and more. By leveraging HR software, businesses can streamline their HR processes, minimize paperwork, and enhance both employee satisfaction and retention rates.

trustangle
Technology Shifting

Reservation Management System

A Reservation Management System is a software solution designed to assist businesses in effectively managing their reservations and bookings, fostering guest loyalty, collecting guest data, and streamlining operations through a guest experience platform.
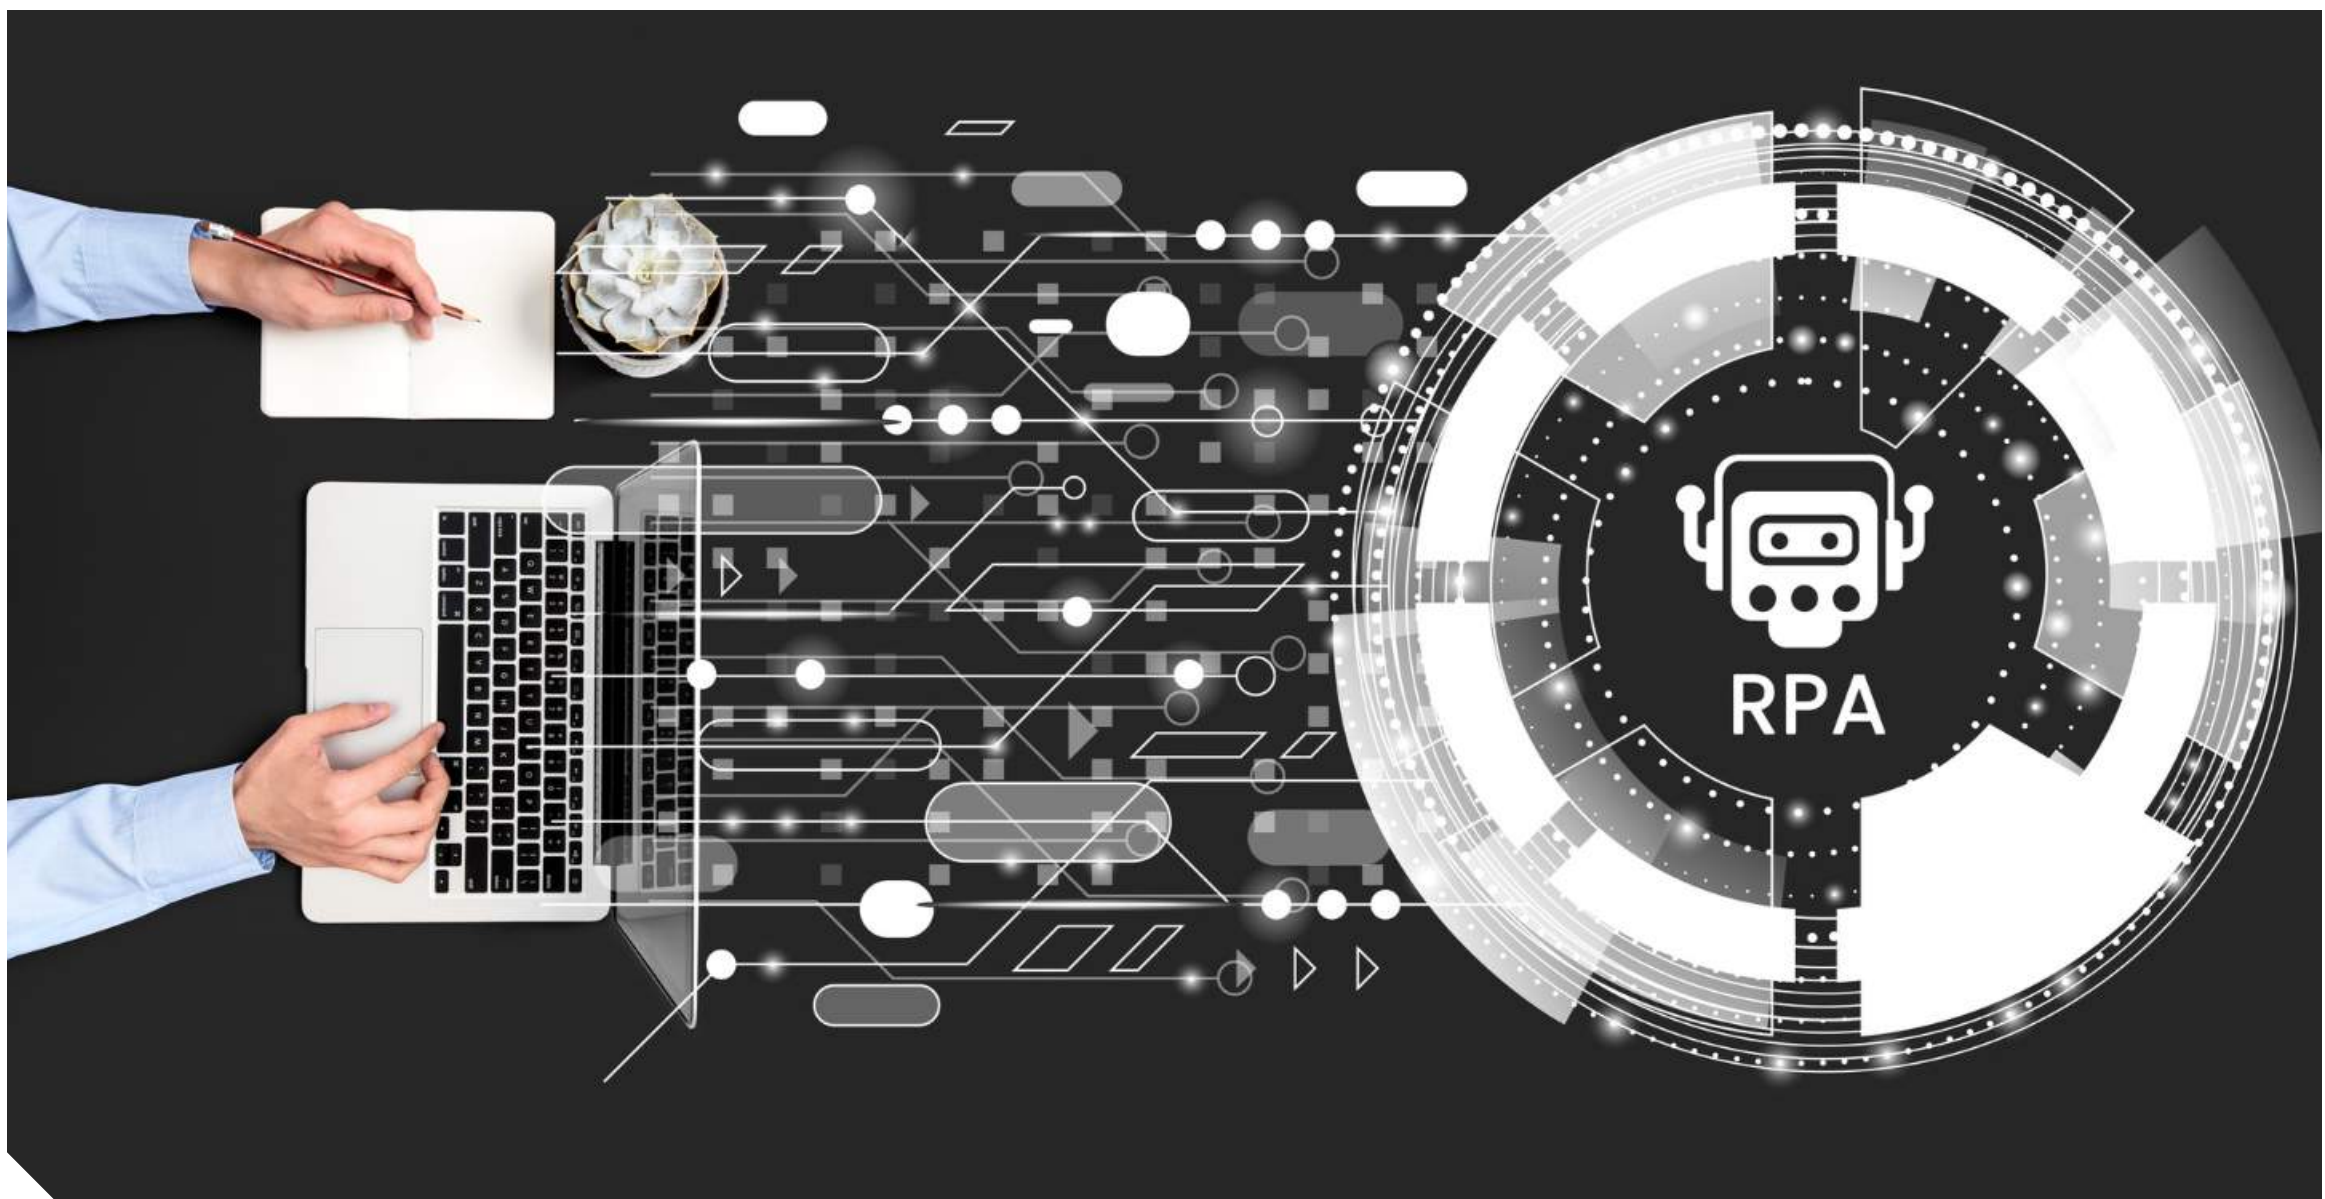

By utilizing an appointment and reservation system, businesses can effectively minimize no-shows, enhance customer satisfaction, and

Maintenance Systems

In the food and beverage industry, a Maintenance System is a crucial framework that enables businesses to effectively manage and maintain their equipment, machinery, and facilities. It entails implementing processes, tools, and strategies to ensure the smooth functioning and reliability of essential assets.
It involves various key components, including preventive maintenance, corrective maintenance, and predictive maintenance.

The primary objectives of a Maintenance System in the food and beverage industry are to minimize downtime, optimize equipment performance, ensure food safety standards, and extend the lifespan of critical assets. By implementing an efficient Maintenance System, businesses can enhance operational efficiency, reduce production interruptions, maintain product quality, and ultimately deliver reliable and consistent products to their customers.

trustangle ®
Technology Shifting

Execution Operation Management System

An Execution Operation Management System (EOMS) is a specialized framework designed to optimize and streamline the execution of operational processes on real-time tracking and visibility of activities. It encompasses various key functions, including production monitoring, workforce management, inventory tracking, and order fulfillment. EOMS may incorporate features such as quality control checks, compliance monitoring with food safety regulations, and real-time data analytics to provide insights for decision-making and process improvement.

By implementing an EOMS, businesses in the food and beverage industry can enhance operational efficiency, improve production visibility, optimize resource utilization, and ensure seamless coordination across various operational processes.

Clients Testimonials

"

It gives me great pleasure to announce the successful launch of NetSuite ERP in "Al Jabr Soft Drinks - Rita Drinks" one of the largest companies in the Kingdom of Saudi Arabia which started operations in 1979, as a specialized beverage company, offering a wide range of FMCG merchandise, all work was done with the support of the integration company "Reachware", and managed to integrate NetSuite with "Menaitech". I would like to stress how much knowledge and determination the trustangle team has, because with such attitude and performance, they helped us grow fast as a company. trustangle has proven to be a trusted technology partner, and we recommend other companies in various sectors to try trustangle's solutions and services as a software development and digital transformation company.
