

TLB Rooms - if HDMI not Displaying

If you are experiencing no image displayed on the LG Monitor from the HDMI connection on your laptop, the following instructions may help.

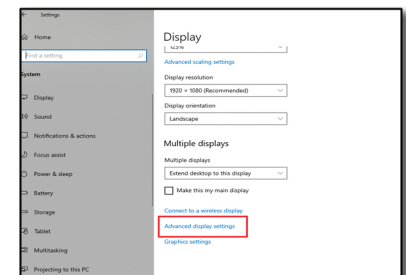

1: Navigate to the **Settings** page in the **Windows Start** menu and click the **Settings Cog**.

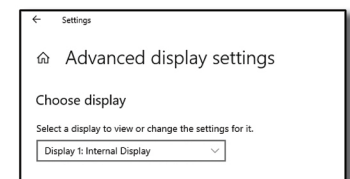

2: On the **Settings** page, enter the **System** section.

3: On the **Display** tab, enter the **Advanced Display Settings**.

4: Select the **LG Screen** in the **Choose Display** menu which would appear here.

5: Select the **60Hz (interlaced)** option in the **Refresh Rate** menu

The actual options to select cannot be screenshotted due to the Smart TV having copyright protection.
