

ERCCI

Empowering Residential Child Care
through Interprofessional Training

**Let's
Empowering
Residential Child
Care (RCC)!**

**More information
about ERCCI:
ercci.turkuamk.fi**

What's ERCCI?

ERCCI studies and compare the RCC systems and practices in **Finland, Germany, Italy, Lithuania** and **Spain** to strengthen the professionalism in RCC and find out the competency requirements of the qualified RCC practitioners. Based on this knowledge the on-a-job training for workers in foster care will be launched in 5/2021.

ERCCI project offers 'best practice' and updated knowledge for the RCC staff and child welfare workers to develop their work performance.

Go on a journey to explore and develop your competences in:

- ▶ *Building educative relationship with a child*
- ▶ *Creating a safe RCC growing community*
- ▶ *Working with families of origin*
- ▶ *Practicing multi-professional collaboration*
- ▶ *Ethical reporting and documentation*

Strengthen your professional approach

The most vulnerable children and young people are living in institutions. These young people deserve a best expert support to uphold their rights and stable guidance on their pathway to the future. ERCCI study module is easy to access in internet for RCC professionals with different training background in social-, health and education field.

Studying in online platform

Project's corner stone is an open access MOOC offered free of charge. MOOC is a competence based module which is divided in 6 learning sessions running over 6-12 weeks through a combination of videos, reading materials, reflective questions, quizzes and suggested practice activities. We welcome all interested to study the materials independently or as guided studies to accumulate your study credit.
