

## PIMAG MICROJET® SHOWER SYSTEM

PRODUCT CODE: HAND HELD 1466 | WALL MOUNT 14662

### CLEAN, CHLORINE FREE SHOWERS

The PiMag MicroJet® Shower System effectively reduces chlorine exposure and makes your shower water comparable in quality to the water you drink. Advanced filtration helps provide the cleanest and most refreshing shower experience!

The PiMag MicroJet® uses a reduction/oxidation process to neutralize free-radical chlorine ions while also reducing most other contaminants. The Air-Induction feature injects air into the shower stream to increase the electronegative potential of the water for even more effective filtration and creates a higher air-to-water ration, creating a soft but effective water stream.

The nozzle releases streams of microbubbles within the water flow to provide an effective gentle cleansing, skin softening and muscle relaxing action. Advanced magnetic technology helps reduce clumping in the water flow to decrease mineral buildup.

- PiMag® Water Filtration Technology
- Reduces chlorine for healthier skin
- Air-Induction Technology
- Advanced Magnetic Technology
- Adjustable nozzle control with five spray settings
- Replacement filter

### COMPONENTS

Handheld model: 80 inch/203 cm stainless steel hose

Wall mount model: mounting bracket

### FILTER REPLACEMENT

PiMag MicroJet hand held model: Every 5,000 gallons or 3 months

PiMag MicroJet wall mount model: Every 10,000 gallons or 6 months

(Based on average use)

### MATERIALS

Natural redox process media (nontoxic), pi ceramic material, two ring magnets (1,200 gauss), stainless steel, polymer

### WARRANTY

1-year standard limited warranty
