Entrepreneurial Coaching Lab

Get ready for team coaching

E-Lab is a hands-on, 3-month program where you learn how to guide project teams on their innovation or startup journey. We equip you with all the tools for great team coaching, and you practice with up to three teams in our ecosystem or your Venture Lab for three months.

5 days of education, 65 hours of practice

Acquire coaching skills, practice team coaching with real project teams, deepen your prototyping-driven approach to innovation, become an active part of the UnternehmerTUM eco-system, and celebrate your entrepreneurial coach certificate at the end.

Target Group, Requirements & Start

We take on a maximum of 30 participants with a passion for innovation who have high commitment, startup or innovation background, and a prototyping attitude. E-Lab is run in English, although coaching in German might be possible. It starts twice a year, in April and October, and takes three months in total.

Learn, apply, improve

Learn how to shape your role as a coach and establish trust. Practice various coaching techniques and prepare yourself for conflict situations. Dig deeper into team retrospectives, 1:1 coaching, user-centric exploration, and prototyping. Reflect your journey in retrospectives with a senior coach, and try things out in peer to peer coaching.

Your dates

14.10. - 16.10.2021 full-time kickoff workshop
02.11. - 03.02.2022 team coaching, reflections,
