16th U.S. National Congress on Computational Mechanics

The [16th U.S. National Congress on Computational Mechanics \(USNCCM16\)](#) will be held in Chicago, Illinois July 25-29, 2021, hosted by University of Illinois at Urbana-Champaign and Northwestern University. Chicago was the host of the first U.S. National Congress in 1991 and we are looking forward to returning to this culturally rich city. Mark your calendars and plan to attend. We will be posting updates through the newsletter in the coming months.

17th U.S. National Congress on Computational Mechanics

This summer the Executive Committee voted to award the [17th U.S. National Congress on Computational Mechanics \(USNCCM17\)](#) to Albuquerque, New Mexico, hosted by Sandia National Laboratories.

Holding USNCCM17 in Albuquerque will mark 20 years since we hosted USNCCM7. Albuquerque is a culturally rich and diverse city with outstanding recreational opportunities – New Mexico alone has nearly twenty National Parks and Monuments. In addition to covering the breadth of the USACM Technical Thrust Areas, the Congress themes will emphasize current and growing research areas including data driven modeling and machine learning, advanced manufacturing, and exascale computing. Sandia National Laboratories is excited to be hosting USNCCM17 and we look forward to seeing you in Albuquerque in 2023!
