

CHRISTOPH FOULGER

Sr Product Designer

📞 801 520 7345 ✉ iamxoph@me.com 🌐 iamxoph.com

Designer with a dash of developer and an experienced leader. I love nudging pixels, flicking switches, and tuning dials to better humanize creative strategies that excite customer loyalty.

As a Graphic Designer turned Production Team Manager turned Product Designer. I've been a design team of one for 6 years. Currently in search a design team working toward common goals. A mature design environment that values design methods and finding unexpected solutions that delight users.

💡 I AM EXPERIENCED IN

Defining experiences using UX principles and diagrams, flows, and wireframes

UI interaction design and prototyping

Establishing product vision using research-driven human-centered design thinking.

Leading products from ideation to shipping for applications, web sites, marketing, fulfillment, and print

Visual design for applications, web presence, search & social marketing, email, display ads, and branding

🛠 I AM SKILLED WITH

Figma, Sketch

InVision + Studio + DSM, Flinto

Design Systems, Storybook

Photoshop, InDesign, Illustrator

Miro, Mural, workshop whiteboard and ideation

HTML, CSS, SASS, JavaScript, React JS, PHP, GIT

WordPress

Premeir, Audition

🔗 I AM ALSO A

Fin-Tech designer experienced in payment facilitating systems and developing reporting

Designer aligned with Dev in an Agile framework

Team leader with employee recruiting and hiring experience

Manager with department budgeting and forecasting experience

Public speaker and presenter

Video editor (when times are tough)

Audio engineer for studio recording and live mixing

• **Sr Product Designer** Gravity Payments — Seattle, WA

Gravity Payments is a passionate merchant-focused payment processing solution offering software API integrations, POS payment hardware, and payment solutions. As the principal Sr Product Designer in an agile engineering team, I oversee user experience and design working directly with engineers through product launch.

- Re-imaged products and vision to recreate and launch customer payments transactions portals
- Developed, and maintained Gravity's first Design System using Atomic Design principles
- Developed adaptive color system for use on all products and website to meet WCAG for contrast ratios across the color spectrum
- Architect information and user flow for multiple products and websites, including Gravity's premier customer payments Dashboard, increasing usage of product multi-fold over the replaced system
- Implemented design style CSS working directly in React JS side by side with engineers
- Designed virtual terminal to accept payments in Dashboard
- Designed POS software for windows-based hardware (not launched)
- Oversaw design direction for website redux
- Assisted in team event planning

• **Marketing UI/UX Design & Developer** Gravity Payments – Seattle, WA

As the principal designer and developer in a small in-house Marketing team, I refined the visual brand through direct to customer and B2B, social media, search marketing, website and other media channels.

- Reignited branding of existing under-utilized visual brand assets including design language, typography, and company imagery.
- Relaunched company website on custom WordPress CMS including custom theme architecture
- Created brand logo's, icons, and branding marks used for internal and external products
- Oversaw production facilitation of marketing materials and online vendors for SEO, web services, and hosting
