

Ahmed Magdi

Product Designer

I deeply care about **every aspect of the product's life cycle**, from the product strategy, business goals, branding, content strategy and user research to a final polished working solution that is usable and emotionally engaging.

I worked on **various projects** (branding to illustration, research to product launch) since I started my career back in 2009. With my added UX Writing skills, I can see the **whole picture of the digital product** and give the assistance needed at any stage.
