## ABOUT

Hi, my name is Dmitri, and I am an expert at designing digital experiences, making products more accessible, and more satisfying to use.

I am a skilled design leader who helps people and organizations reach their full potential. I help businesses mature their design and processes to build better products with less time and money.

I tackle the entire range of the UX spectrum: from strategy and research through design and prototyping to testing and evaluation.

My mission is to advocate for users by creating human-centered designs and utilizing a research-driven approach, enabling businesses to connect with their users in an increasingly digital world.

## EXPERIENCE

### Optum

#### Senior User Experience Engineer

November 2021 - Present

- Responsible for designing user interactions, interfaces, and product features over a large ecosystem of micro products in multi-disciplinary, cross-functional teams.
- Utilize full-spectrum user experience design, collaborate with stakeholders and users, and advise on design best practices to produce products that are changing the healthcare industry.
- Help lead and mentor junior designers, teaching and advocating for inclusive, engaging, human-centered user experiences.

### Object Partners, Inc.

#### Senior User Experience Consultant

July 2020 - November 2021

- Advise clients on product design strategy, product management, design, and development relationship strengthening, and product design process improvement.
- Work with users and stakeholders to design and build user interactions and interfaces that meet customer expectations and business goals through full-spectrum UX design.
- Help clients and C-suite executives connect with their users and realize the immense Return on Investment (ROI) that great design brings to their business.

### Tigerpaw

#### Product Designer + UI/UX Front-End Developer

June 2019 - July 2020

- Responsible for creating and shaping the user experience through unique and captivating user interfaces, visuals, and user journeys in a complete re-design and updating of their B2B automation software.
- Led, coordinated, and conducted user research initiatives, advising the CEO and COO, and translating findings into impactful user experiences and interfaces.
- Created initial concepts and designs, wireframes, and high-fidelity mockups to communicate product vision with senior leadership and stakeholder groups.
- Collaborated with users and stakeholders throughout the product life-cycle to deliver web based applications and experiences tailored to the end-user.

### Original Zen

#### Founder + Freelance Designer and Consultant

March 2016 - Present

- Designing, crafting, and delivering modern digital products for clients that help them their businesses thrive and connect with their customers
- Design and develop websites and digital experiences that are built on various platforms, including React, WordPress, and React, for a diverse set of clients and business cases.
- Consult and advocate for great UX design and user inclusivity and accessibility in a wide variety of business verticals.

## EXPERIENCE CONTINUED

### United States Navy

#### Naval Aviator (Pilot)

April 2009 - June 2019

- Led large, diverse teams of people and managed multi-million dollar programs and assets in demanding environments.
- Assisted the Navy in fielding two of its newest platforms to service: the P-8A Poseidon and the MQ-4C Triton. Flying both aircraft in tactical operations all over the globe.
- Managed and ensured that project requirements were met. Created, managed, and oversaw programs that led to the successful implementation of both the P-8A and the MQ-4C.

## EDUCATION

### Master of Science

#### Web Design and Development

*University of Denver - Denver, CO*

August 2017 - June 2019

My focus of study was on user experience and user interface research, design, and testing.

I learned to design, develop, and deploy websites and web-based applications using best practices in information architecture, user experience, and user accessibility.

### Bachelor of Science

#### Aviation Technology

*Metropolitan State College of Denver - Denver, CO*

January 2003 - December 2008

I learned to work in demanding, high-pressure aerospace environments while remaining detail oriented and focused on providing a high-level of performance.

I earned multiple FAA flight and instructor ratings in both single and multi-engine aircraft.
