- Designed the data mining workflow to facilitate a more efficient map data update

UX DESIGN

User Research
Prototyping
Usability Evaluation
User-centric Design

DESIGN TOOL

Figma
Sketch
Illustrator
Photoshop

PROGRAMMING

JavaScript
Java
Python
C++
R

LANGUAGES

English (fluent)
Chinese (native)

AWARDS

EIT Digital Master School

Merit Scholarship in 2020
Dean's Scholarship
Secondary Acceptance Scholarship

Wuhan University

First&Seconde Prize of Scholarship
Merit Student

Product Development Project — *UX Designer*

09/2019 - 05/2020, Collaborated with ABB Marine and Aalto Design Factory

- Conducted user research for challenges in the bridge environment of cruises
- Designed a centralized system for alarm and task management aiming at different user groups throughout the entire crew
- Tested and iterated the design in collaboration with stakeholders

Research Project in HCI — *UX Researcher*

03/2020 - 05/2020, course work solving real research problems

- Drafted up a thorough evaluation plan for a web layout optimization platform
- Designed and implemented the testing application for collecting quantitative user data
- Conducted a piolet user testing and iterated the testing application

Campus navigation App development — *Android Developer*

06/2017 - 11/2017

- Took charge of UI/UX design
- Implemented client functions based on Location-Based Service using Java
