

EXPERIENCE

Performance Arts & Coding Educator | Various Locations

Sep 2014 - Present, Metro Vancouver, BC

- Establish strong relationships with students and guardians in order to design a stimulating learning environment in and out of classes
- Design tailored engaging curriculums by recontextualizing complex concepts while leaving room for individual student creativity
- Implement research-backed exercises to optimize students' performance via spaced-repetition technology in order to improve students' absorption of complex ideas into their long-term memory

Secretary & Coordinator | Vancouver Street Dance Association

Jan 2016 - Present, Vancouver, BC

- Design user flows for competitors, judges, organizers, and audiences for our virtual festival during the pandemic
- Execute four 3-day free festivals attracting over 9000 attendees
- Spearheaded several fundraisers—each generating over \$1000

Vice President | UBC Unlimited Dance Club

Apr 2018 - Present, Vancouver, BC

- Architecting club organization tools and procedures to streamline tasks and empower the club to restart from scratch when needed
- Coordinate a 25-member international team virtually and in-person to elevate club, personal, community goals

EDUCATION

BrainStation | Diploma Candidate, User Experience Design

Jul 2021 - Present, Vancouver, BC

University of British Columbia | BA Cognitive Systems—Linguistics & Computer Science

Sep 2016 - Present, Vancouver, BC

PROJECTS

Elimin8Hate Redesign | UX Researcher & Designer

Aug 2021, BrainStation Design Sprint

Exercised a comprehensive 4-day sprint to redesign the mobile landing and donation page that improves transparency, usability, and appearance. Working with Elimin8Hate organizers to incorporate new designs to increase funding for their anti-Asian hate campaigns.

HappyHour | Front End Developer

Sep 2020 - Apr 2021, UBC LaunchPad Project

A Vue-Typescript web app that helps users efficiently align meetings with others. Worked closely with designers in user research and interface building to effectively architect the front-end components' codes.
