ABOUT ME

UX Designer from a Speech Therapist background, bridging my years as a communications specialist to design. I'm well-versed at implementing research to validate ideas that create seamless experiences. Conducted interviews and assessments and recommended holistic solutions in a collaborative team environment while empathizing and advocating for the clients' perspectives and presenting to all stakeholders involved.

PROJECTS

2021 CareerFoundry

Student

- Intense project-based coursework, with mentor guidance, learned the methodology, fundamentals, and current trends of UX Design with additional UI Design coursework
- Developed a veterinarian app aimed at quickly and easily connecting pet parents and veterinarians virtually, therefore eliminating obstacles of in-person visits
- Created a community-based fitness app focused on making workouts anywhere convenient and increasing the likelihood of maintaining scheduled exercise

EXPERIENCE

2022 Hack for LA

Freelance UX Designer

- Develop design solutions for LA TDM Calculator (civic tech project for city of LA) in collaboration with project managers, developers, UXRs, and stakeholders to address new features and user issues

2018- Livingston County Special Services Unit

2021 Speech-Language Pathologist (Elementary - High School)

- Specialized in serving clients with complex social-emotional needs, created communication systems to meet individual needs
- Led end-to-end projects from concept through completion, continuously reevaluated user needs, and drove meaningful impact to the organization
- Researched and identified needs and goals, evaluated progress and organized data, resulting in increased clients' metric progress
- Problem-solved as new concerns arose and advocated for clients' individual needs and issued personal journey maps

2017- PPR Healthcare Staffing

2018 Speech-Language Pathologist (Preschool - Junior High)

- Addressed clients' needs through evaluation, diagnosis, and structured treatment plans to improve outcomes
- Interpreted quarterly data and adjusted goal plans as needed

2017 Park Pointe Healthcare and Rehabilitation Center

Speech-Language Pathologist (Skilled Nursing Facility)

- Consulted with clients in a medical setting to understand their goals and explained research results
- Identified target user groups and carried out interviews to help understand user needs
- Managed cross-functional projects in a setting focused on client advocacy

2014- Kids On The Grow

2017 Speech-Language Pathologist (Early Intervention: 0-3 years-old)

- Guided and advised parents in the creative process to foster stronger working relationships and solutions for their child
- Provided guidance on the implementation of testing activities to assess user behavior of verbal and non-verbal clients
- Tested prototypes to analyze their accessibility, usability, and intuitiveness to provide feedback on what did and did not work
