1. Using small screws (a) attach the sides of the jail, (B) and (C) to the door (A). It is important that you do not fully tighten all the screws. The jail components will need to shift slightly during assembly in order to fit together properly and the loose screws will make this easier.

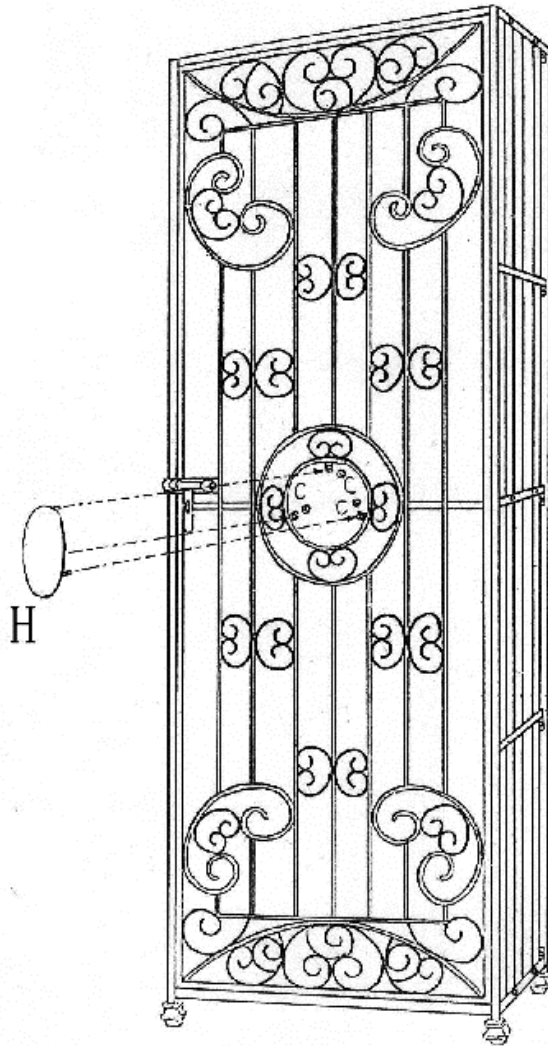

2. Once the sides of the jail are attached to the door, attach the bottle rack (D) to the sides using larger screws (b). Remember not to fully tighten all the screws.

3. Attach the back of the jail (E) to the sides using small screws (a). Once again, do not fully tighten all screws.

4. Attach the top and bottom pieces (F) using small screws (a). Once the top and bottom pieces are attached, you should now fully tighten all screws on the rack.

5. The final step is to attach the badge. You can either use the blank badge that was included in the box, or you can order a personalized letter at www.wineenthusiast.com.
