

# Virtune Arbitrum ETP

Virtune Arbitrum ETP is a physically backed Exchange Traded Product (ETP) that seamlessly provides exposure to Arbitrum. This is made possible through a transparent and physically backed structure with institutional grade security.

## Key benefits

### Arbitrum

Arbitrum is a Layer-2 token developed on Ethereum's blockchain, aimed at enhancing the scalability and efficiency of Ethereum's smart contracts while still maintaining the robust security features of the main Ethereum blockchain. It operates by processing transactions off the Ethereum main chain (off-chain) and subsequently reporting the consolidated results back to the main chain. This approach significantly lightens the load on the Ethereum network, leading to quicker transaction processing times and reduced transaction fees.

### Trade as easily as a stock

This product allows you to expose yourself to Arbitrum in as straightforward a manner as trading a stock through your online broker. Your investment in Arbitrum is managed alongside your other securities investments. Additionally, the product can be held in your ISK (Investeringsparkonto) or capital insurance, potentially providing tax advantages.

### Regulated investment product

Virtune Arbitrum ETP provides exposure to Arbitrum through a 100% physically backed and regulated investment product listed on Nasdaq Stockholm. Coinbase, the global leader in institutional custody solutions, serves as the custodian for securely storing Arbitrum in cold-storage.

## Product Statistics

Assets under management	N/A
