

Virtune Avalanche ETP

Virtune Avalanche ETP is a physically-backed exchange-traded product (ETP) designed to offer investors a secure and cost-effective way to gain exposure to Avalanche. This is made possible through a transparent and physically-backed structure with institutional-level security.

Key benefits

Avalanche

Avalanche is a high-capacity blockchain with fast transaction finality designed for decentralized applications regardless of scale. It excels through its unique architecture that allows users to create their own blockchains tailored to their needs. These can operate in parallel, optimizing both scalability and performance for the entire network.

Trade as easily as a stock

This product allows you to expose yourself to Avalanche in as straightforward a manner as trading a stock through your online broker. Your investment in Avalanche is managed alongside your other securities investments. Additionally, the product can be held in your ISK (Investeringssparkonto) or capital insurance, potentially providing tax advantages.

Regulated investment product

Virtune Avalanche ETP provides exposure to Avalanche through a 100% physically backed and regulated investment product listed on Nasdaq Stockholm. Coinbase, the global leader in institutional custody solutions, serves as the custodian for securely storing AVAX in cold-storage.
