FACT SHEET 6 OCTOBER 2026

Virtune Bitcoin Prime ETP

Virtune Bitcoin Prime ETP is a physically-backed exchange-traded product (ETP) designed to offer investors a secure and cost-effective way to gain exposure to Bitcoin (BTC). This is made possible through a transparent and physically-backed structure with institutional-level security.

Key benefits

Bitcoin

Bitcoin is the world's largest cryptoasset and was introduced in 2009 by an anonymous individual or group known as Satoshi Nakamoto. By utilizing a decentralized blockchain, Bitcoin enables secure transactions without intermediaries. With a limit of 21 million Bitcoins, Bitcoin can now be seen as a hedge against bank risks and inflation worldwide. Its blockchain technology offers a revolutionary and transparent way to transfer value over the internet without relying on third parties.

Trade as easily as a stock

This product allows you to invest in Bitcoin in as straightforward a manner as trading a stock through your online broker. Your investment in Bitcoin is managed alongside your other securities investments. Additionally, the product can be held in your ISK (Investeringssparkonto) or capital insurance, potentially providing tax advantages.

A regulated investment product

Virtune Bitcoin Prime ETP provides exposure to Bitcoin through a 100% physically backed and regulated investment product listed on regulated European markets. Coinbase, the global leader in institutional custody solutions, serves as the custodian for securely storing Bitcoin in cold-storage.
