

Virtune Staked Polygon ETP

Virtune Staked Polygon ETP is a physically backed Exchange Traded Product (ETP) that seamlessly combines exposure to Polygon with the benefits of staking. With staking incorporated, this ETP enables investors to generate additional yield on their Polygon investment. All this is being made through a transparent and physically backed structure with institutional grade security.

Key benefits

Polygon

Polygon (formerly known as Matic Network) aims to address some of the most common issues with traditional blockchains like Ethereum, including scalability, transaction speed, and cost. By providing a multi-layered architecture supporting the development of diverse dApps, Polygon enables developers to create scalable and user-friendly applications without compromising on security. The core of Polygon's solution is its sidechains, running in parallel with the Ethereum main chain, enabling high-performance and cost-effective transactions.

2% extra annual return through staking

Staking allows an additional yield on your Polygon investment while actively supporting the blockchain network. By including staking, you receive 2% additional annual return on your Polygon investment on the same time as you are contributing to decentralization.

Non-custodial staking for increased security

Non-custodial staking enhances security and control by allowing staking directly from cold storage, eliminating the need and risk of transferring cryptocurrencies to a third party.

Product Statistics

Assets under management	N/A
Units outstanding	N/A
NAV per unit	\$0,92
Inception Date	2024-04-10

Product information

Fee	1,95%
