2025-07-1/

Virtune Polygon ETP is a physically-backed exchange-traded product (ETP) designed to offer investors a secure and cost-effective way to gain exposure to Polygon. This is made possible through a transparent and physically-backed structure with institutional-level security.

Key benefits

Polygon

Polygon (formerly known as Matic Network) aims to address some of the most common issues with traditional blockchains like Ethereum, including scalability, transaction speed, and cost. By providing a multi-layered architecture supporting the development of diverse dApps, Polygon enables developers to create scalable and user-friendly applications without compromising on security. The core of Polygon's solution is its sidechains, running in parallel with the Ethereum main chain, enabling high-performance and cost-effective transactions.

Trade as easily as a stock

This product allows you to expose yourself to Polygon in as straightforward a manner as trading a stock through your online broker. Your investment in Polygon is managed alongside your other securities investments. Additionally, the product can be held in your ISK (Investeringssparkonto) or capital insurance, potentially providing tax advantages.

A regulated investment product

Virtune Polygon ETP provides exposure to Polygon through a 100% physically backed and regulated investment product listed on Nasdaq Stockholm. Coinbase, the global leader in institutional custody solutions, serves as the custodian for securely storing Polygon in cold-storage.
