

Virtune Staked Ethereum ETP

Virtune Staked Ethereum ETP is a physically backed Exchange Traded Product (ETP) that seamlessly combines exposure to Ethereum with the benefits of staking. With staking incorporated, this ETP enables investors to generate additional yield on their Ethereum investment. All this is being made through a transparent and physically backed structure with institutional grade security.

Key benefits

Ethereum

Ethereum is the world's leading smart contract platform and can revolutionize the way we interact with technology and finance. With its robust ecosystem, Ethereum enables developers to build decentralized applications (dApps) that can reshape industries, eliminate middlemen, and bring greater transparency and efficiency to global systems.

Staking for increased return

Staking allows an additional yield on your Ethereum investment while actively supporting the blockchain network. By including staking, you receive around 3% in additional annual return on your Ethereum investment at the same time as you are contributing to decentralization.

Non-custodial staking for increased security

Non-custodial staking enhances security and control, through staking being made directly from cold storage, eliminating the need and risk of transferring cryptocurrencies to any third party.
