

GDPR Compliance

Implement fit-for-purpose compliance and breach mitigation solutions

What is the challenge?

European Union's General Data Protection Regulatory (GDPR) will come into action on May 25, 2018. Penalties of non-compliance will result in maximum fine of €20M or 4% of global turnover. 52% of companies believe they will be fined for non-compliance with GDPR.

Vizru platform's Watchdog is a workflow-based process intelligence that continuously monitors against a set of GDPR criteria and enforces conformity to those rules. It alerts and reports compliance anomalies and stops errant processes.

Benefits

1. Vizru's Docker based *infrastructure agnostic* deployment ensures 100% data autonomy and localization
2. Vizru Watchdog will monitor and audit all activities across Vizru apps and provide real-time feedback on data breaches and impact assessment as per GDPR requirements
3. Vizru workflows and apps ensure that data is stored securely and encrypted end-to-end
4. Vizru offers unprecedented flexibility when it comes to data management including data portability, caching, programmatic erasing and archival

Design compliance and Governance baseline

No-touch Continuous Monitoring

AI-based compliance negotiation & enforcement

Anomaly Insights and reporting

Real-time, 2-way notification over SMS or Chat

Self Scaling Architecture
