

Rapid Pilot Environment (RPE)

Build, Test, Refine, Tear-Down, Build Again at Lightning Speed

What is the challenge?

Enterprises need to rapidly acquire or imitate high-value initiatives, while showing tolerance of failures in trials. Enterprises often struggle with this trial-and-test culture which is elementary to the “agile delivery” model.

Vizru’s ZEOS Platform comes equipped with capabilities that allow enterprises to build to handle compliance requirements including GDPR, HIPAA, PCI standards.

Benefits

1. With Zero-code business teams can deliver a fully functional solution stack that is production ready.
2. Vizru’s RPE contains version control that allows users to run simultaneous what-if scenarios.
3. The RPE allows you to invoke services from existing systems and then combine with emerging services in the market to accelerate time-to-value.
4. Significantly reduce cost of change management and new product introductions.
