Summary

Weekly energy market analysis for the period Jul 27 – Aug 2. Covers four distinct markets: Day Ahead and the different Intraday rounds: price and energy evolution, inter-market dynamics, and forecast comparison.

Energy (MWh)

Price (€)

Weekly Evolution Analysis

Day-over-day variation within the current week. Each bar is the absolute change from one trading day to the next, where positive bars represents an increase and negative bars a decrease.

Day-on-Day Analysis

Comparison of daily averages between the current week and the previous week. Each pair of bars shows the same weekday across both weeks, for direct week-over-week observation.

Inter-market Analysis

Cross-market comparison of daily averages. Each day shows one bar per market, enabling direct visual comparison of Day-Ahead vs Intraday rounds across both dimensions.
