Auroboros

voxelarchitects.com

STUDIOS

metajuici

Auroboros

Auroboros was looking to create a futuristic concert hall and cyber couture space in Decentraland during the Metaverse Fashion Week event.

Our objective was to construct a visually impactful building that could elegantly complement the client's identity and the futuristic-styled wearables exhibited in the gallery.

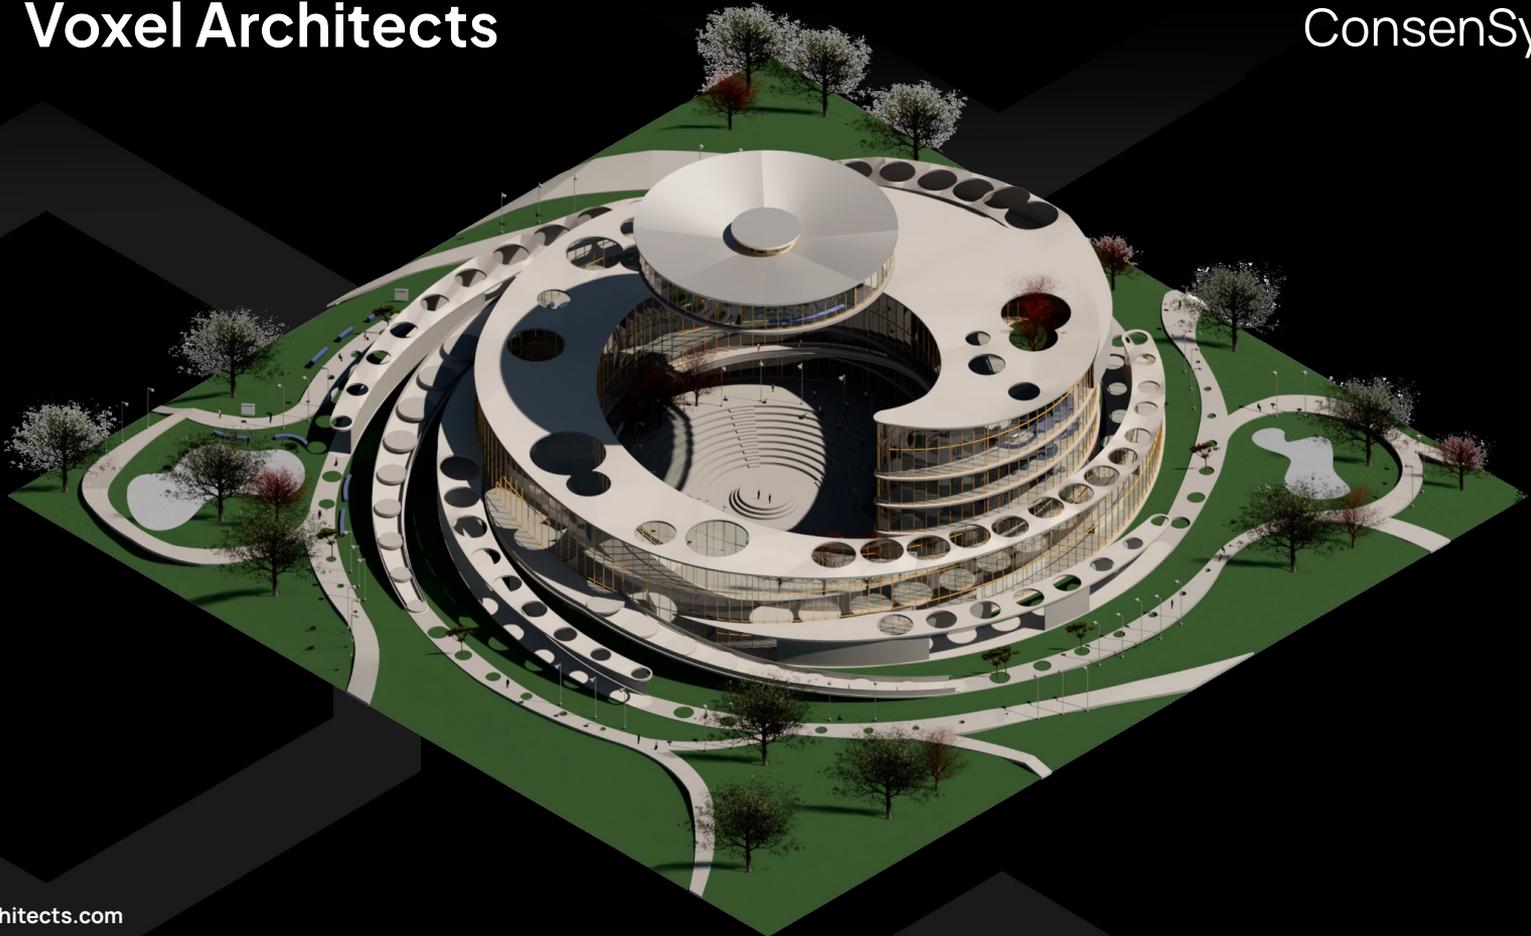

On top of that, the building needed to also function as a stage for Grimes' closing show, where the Canadian artist had prepared an exclusive DJ set.

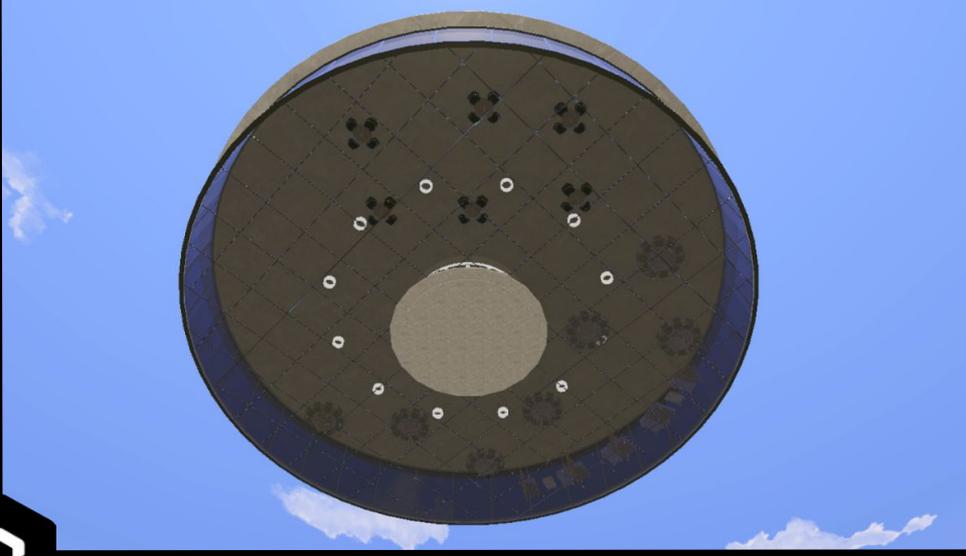

Voxel Architects

ConsenSys HQ

ConsenSys HQ

ConsenSys is one of the biggest building in Decentraland, built on a whopping 160 x 160 meters area. Not only that, but is regarded as one of Decentraland's architectural marvels. The building shape it's inspired by the logo of the brand, a spiral extending both horizontally and vertically, on top of which sits a floating bar with a glass floor from where you can see the building in all of its might. In the heart of the building you will find the big open amphitheatre Metamask forest in which the famous Metamask fox is hiding.

Voxel Architects

Infinity Gallery

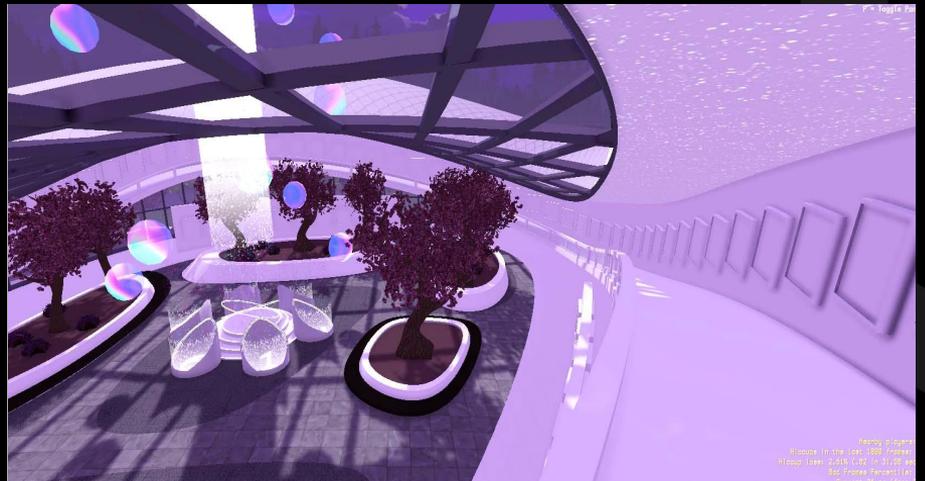

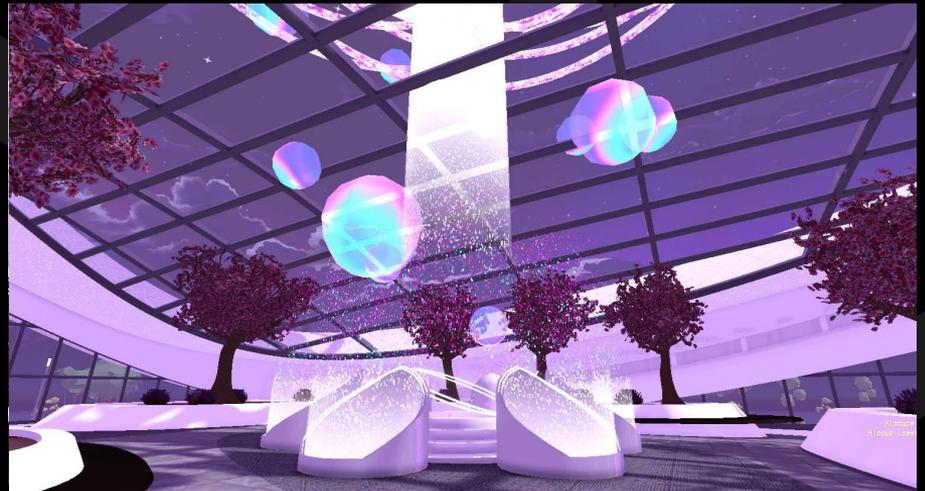

Infinity Gallery

The shape of the building is inspired by the infinite sign which symbolizes eternity. The build is open space, airy; and it follows an indoor-outdoor concept. The exterior shell is white and is covered in glowing stars that you can see at night in Decentraland. The ceiling is open to allow you to look up to the sky and see a floating planet on top of the building, surrounded by balls of energy. In the main planet, events can be hosted and each surrounding energy ball hosts a 10 piece gallery space.

Voxel Architects

BitBuzz

The Bitbuzz gallery is one of the first galleries we have built in Decentraland and was commissioned by Steve Wand, a big collector and crypto enthusiast, to showcase his latest NFT collection. The building got a lot of attention because of its particular architectural style, its blocky shape contrasted by the curvy organic lines, both in the exterior and interior. Its design is minimalist, white, with subtle accents of green and yellow to highlight the artworks on the wall. This building was featured on Good Morning America.

Voxel Architects

Max Stealth Galleries

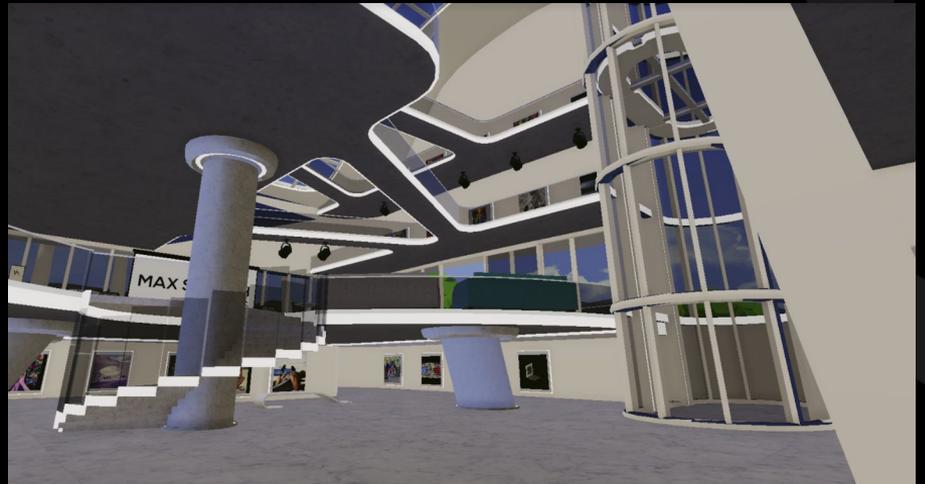

voxelarchitects.com

MaxStealth Gallery

Early in 2021, Max Stealth Galleries was commissioned by the collector with the same name with the aim of housing his personal art collection. It is a part of the significant NFT art district known as 100x Art, which included other galleries similar to this one. The client chose the moodboard, drawing influence from the well-known Zaha Hadid architecture's curved, sensible, organic forms. The gallery eventually developed its own personality and rose to prominence as one of Decentraland's most valued structures. The facade is reminiscent of Heydar Aliyev, one of Zaha Hadid's most well-known structures, and is matched by the four-story interior's organic lines, which includes a glass elevator and an outstanding atrium space.

MCBA

Voxel Architects

MCBA

MCBA is a build commissioned by Ogilvy in New York and its purpose was to tell a story: the story of technological and computational development. The construction is divided into three separate structures, each with a unique design that pieced together, resemble a university campus. The styles were influenced by some of the most recognizable structures of the 20th and 21st centuries, built by well-known architects such as IM Pei and Mies van der Rohe. The floating, revolving glass pyramid at the entry and the park with a proudly positioned replica of a computer chip in its center are by far the most remarkable aspects of the construction. Alongside its impressive features, the build also features a server room, classrooms, a library, and a full-sized amphitheatre for hosting events.

Voxel Architects

Sotheby's

One of the biggest auction houses in the world wanted to transition in the metaverse. This building, built at 1:1 scale, is a detailed reproduction of their site in London.

Hosted: Natively Digital, Jay-Z, Bored Apes Yacht Club, Banksy.

 [Back](#)

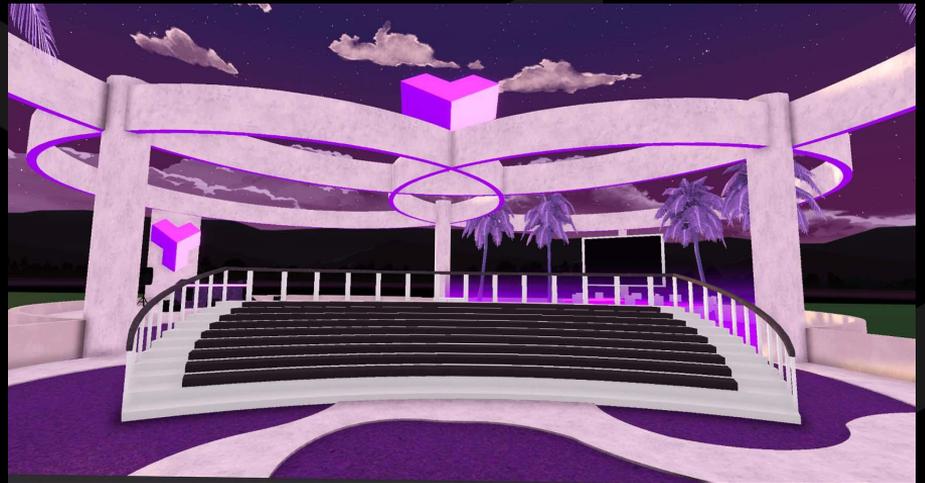

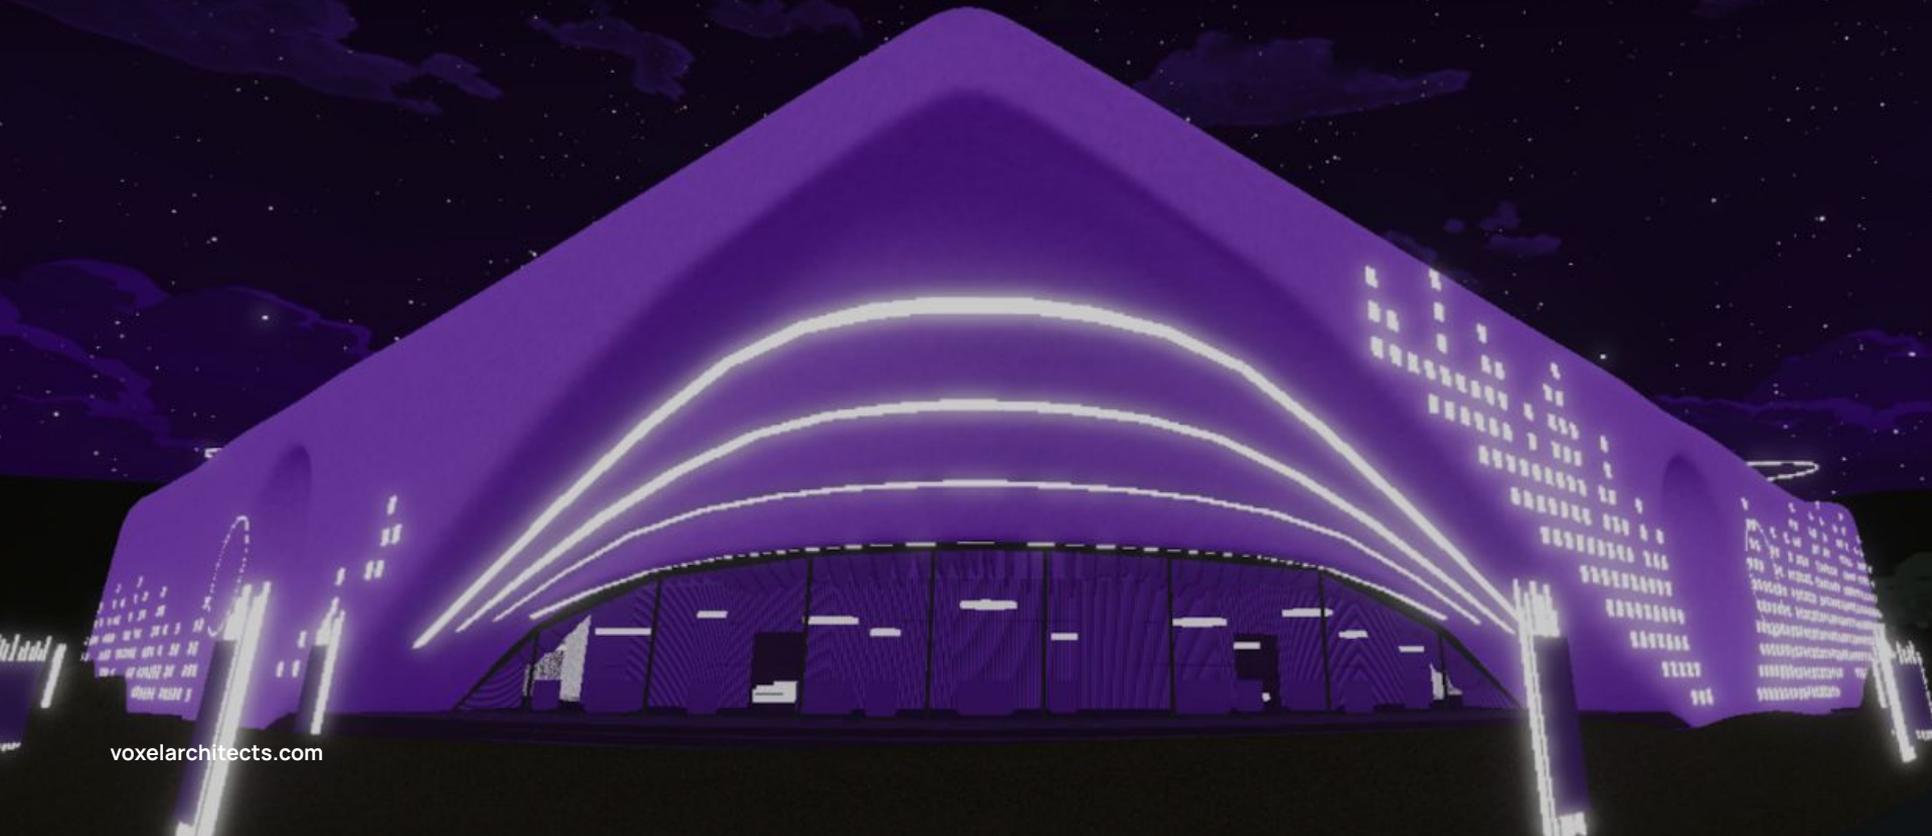

TerraZero

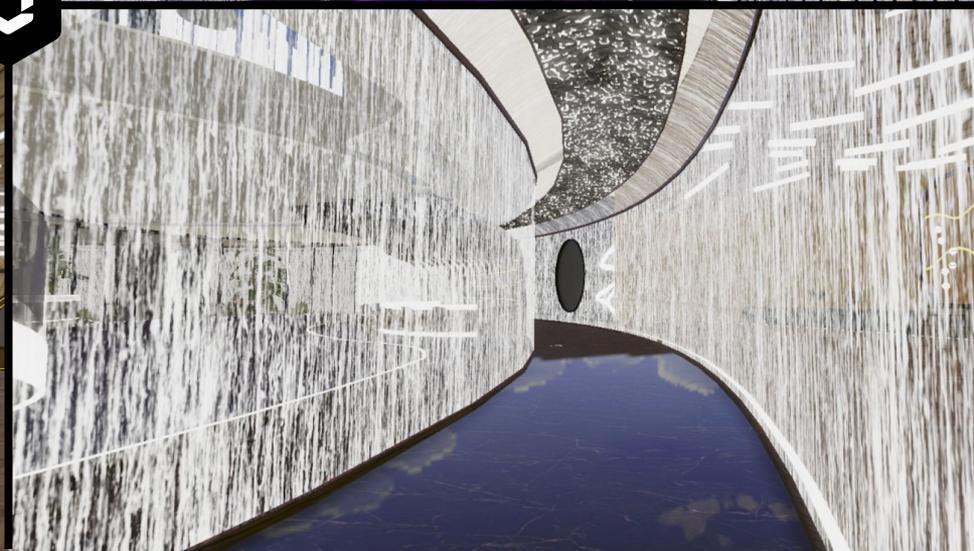

TerraZero was commissioned in late 2021 by the company with its same name, and the aim was to serve as the entry point of the company into the Metaverse. The purpose of the build was to serve as an office space, with rental spaces for different tenants and various events. The design keyword for this building was trinity, and every piece design choice as tailored to represent the TerraZero brand identity. The building features an art gallery, 3 floors (for rent to tenants), and a rooftop were parties, and meetings can be hosted. There are no stairs in this building, and the only way to get up is to take the elevator which will guide you through the impressive 40m tall structure.

Voxel Architects

Unpaired Club

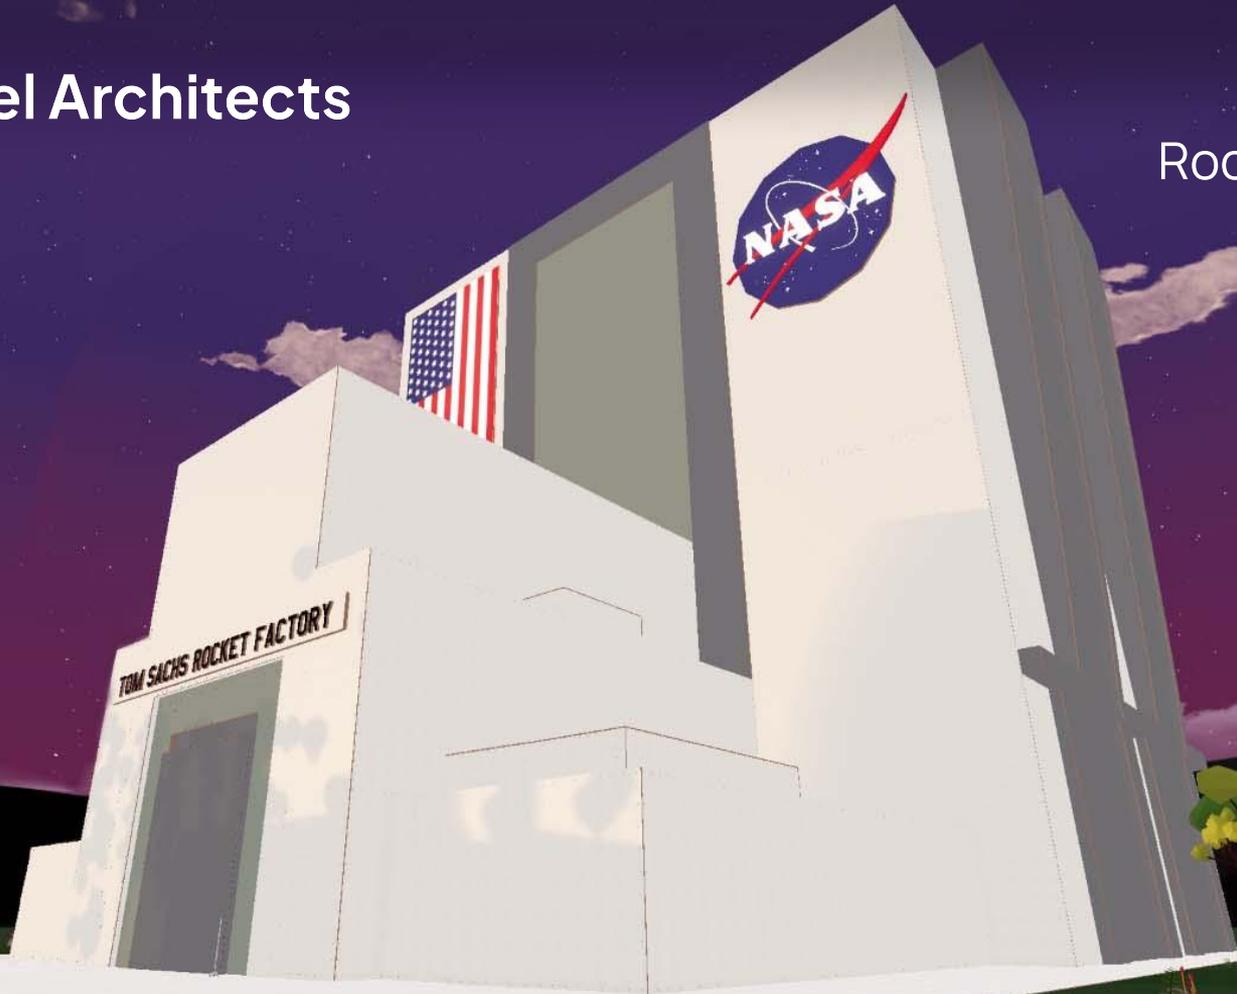

The Metaverse top club is Unpaired. It was commissioned by Party Degenerates with the intention of becoming the largest club in Decentraland. Unpaired does this with more than 5 distinct clubs, each with their own music, an art gallery, a meeting room, and a massive main stage perched atop a water mirror. Its organic architecture and exterior, which are given life by the lively, dancing sound waves, are by far one of its most outstanding elements. Unpaired will serve as the host of recurring events including well-known DJs and major performers.

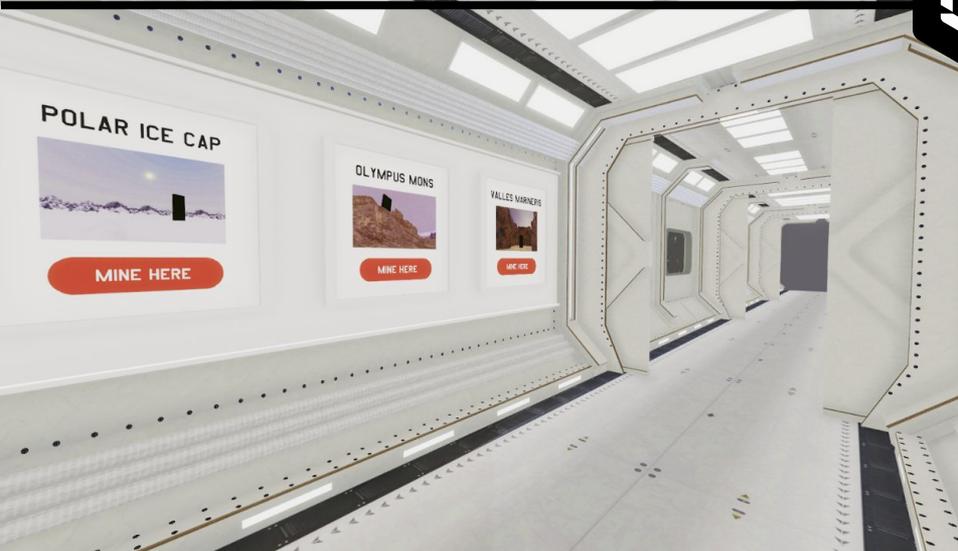

Voxel Architects

Tom Sachs
Rocket Factory

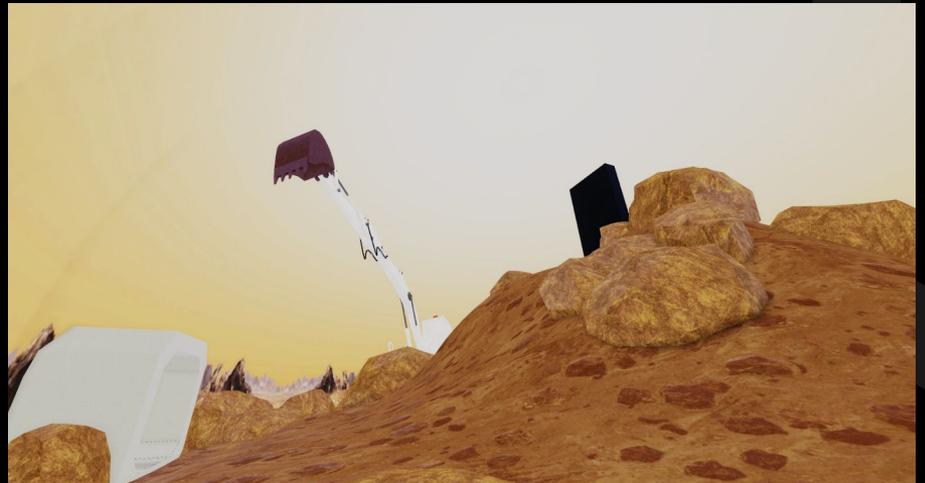

Tom Sachs: Rocket Factory

Tom Sachs: Rocket Factory is a trans-dimensional manufacturing plant. The Rocket Factory uses NFTs to build new NFTs.

Phase II of the Tom Sachs Rocket Factory is on Mars, through Decentraland's metaverse, where users will go to Mars, pick one of three mining locations and mine martian rocks.

Not Fungible Arts Complex

Voxel Architects

Not Fungible Arts Complex

This colossal architectural project features two fifteen-story high towers linked by a glass bridge. Inside the Not Fungible Arts Complex, there's a major NFT art gallery that can hold up to a total of 442 artworks.

There's a library at the top of both towers where artists can teach and present their crafts to students. The building also includes a vast meeting space where players can gather up and attend exclusive events.

One of the most iconic features of this building is the double floor glass bridge that links the twin towers together.

Voxel Architects

Lot 555

voxelarchitects.com

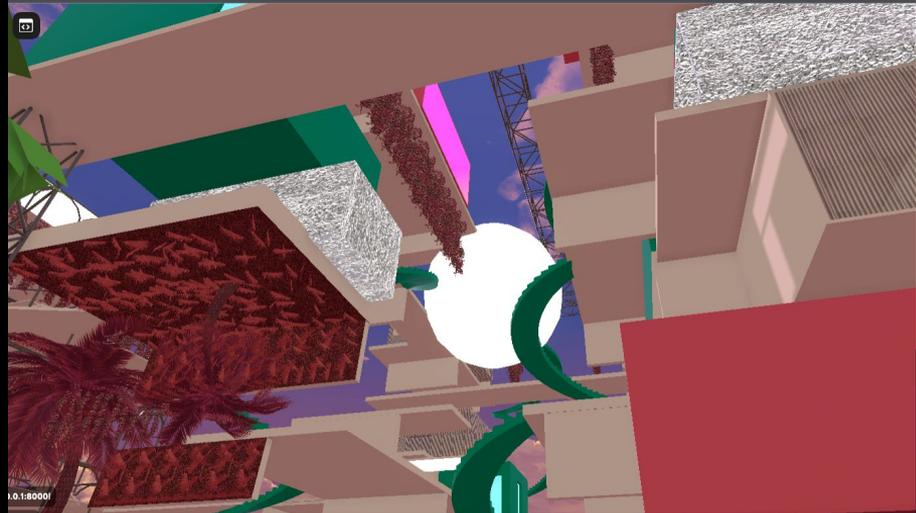

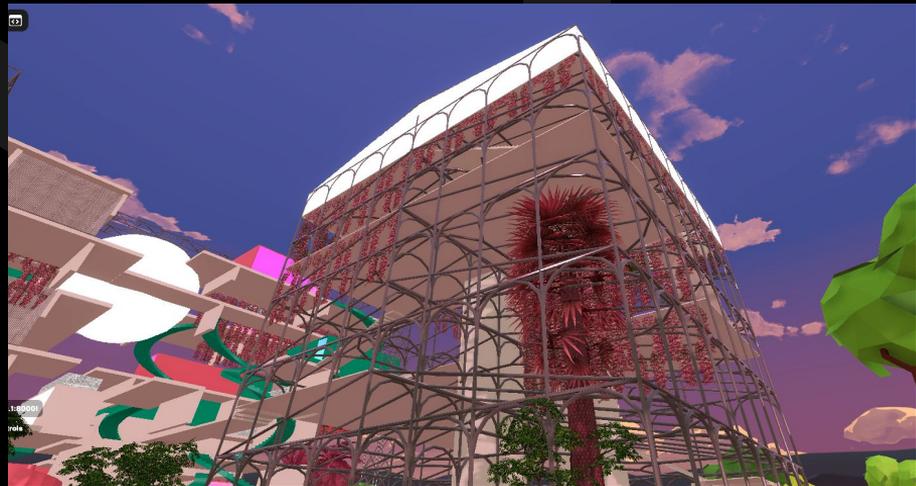

Voxel Architects

Lot 555

The structure has an ethereal quality to it, like you're in a dream state, with winding hallways and twisted staircases leading to chambers with vibrant colors where famous artworks are hosted. The player is surrounded by purple-hued gardens and hanging foliage along its roads. On the 24 parcel lot, there are two main buildings that are joined by floating cross bridges. The building achieves its ultimate goal, for the player to become engrossed in its mesmerising atmosphere.

Voxel Architects

Frida Kahlo

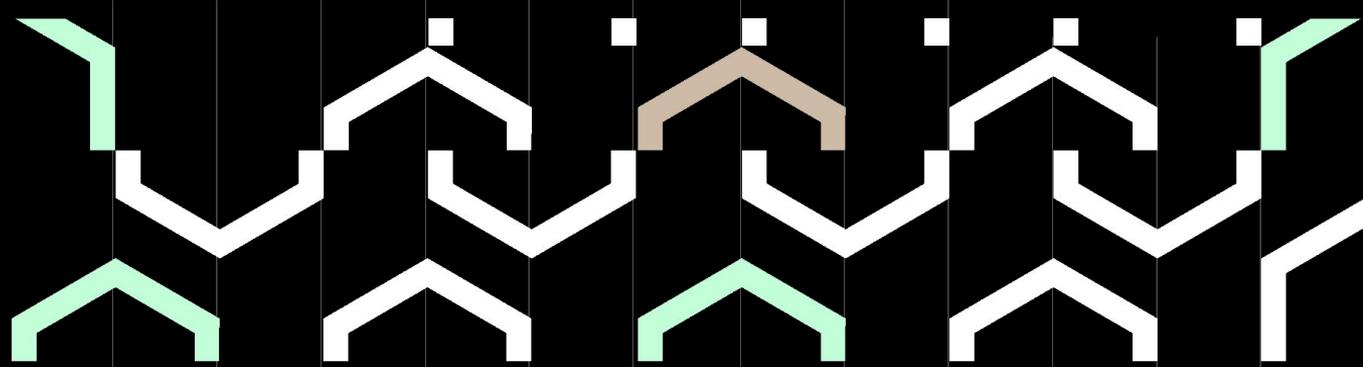

Between the walls of the Red House, located in the emblematic neighborhood of Coyoacan in Mexico City, priceless untold memories and stories of Frida Kahlo and her family reside.

In this experience you can explore Frida's earliest years, discussing gender equality, women's rights, bravery, and art to unite the world around one of the world's most influential artists.

Projects for **THE**
SANDBOX

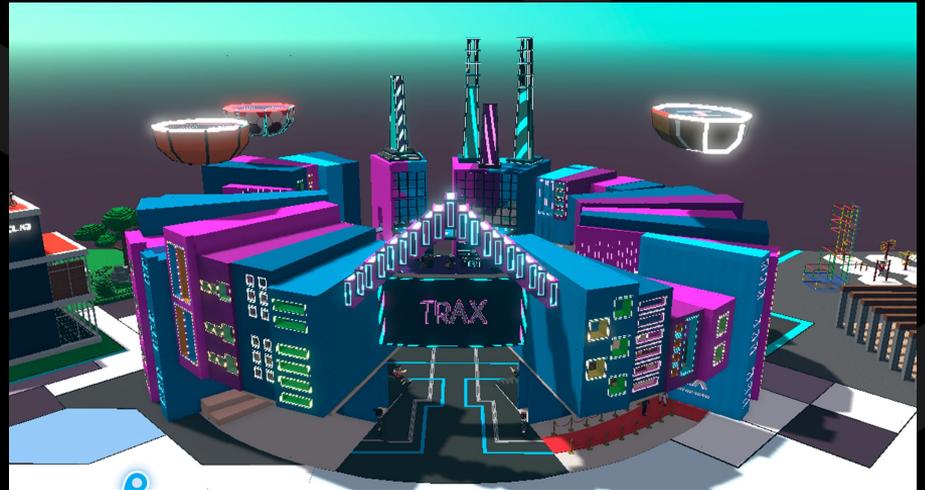

OliveX

OliveX is a digital health and fitness company delivering unique user experiences through fitness gamification. The OliveX fitness metaverse provides platforms that enable real-world fitness to merge with the digital universe, and to reach our goal we designed their Social Hub in The Sandbox metaverse.

Explore the fitness metaverse and enjoy a good time in this fantastic experience!

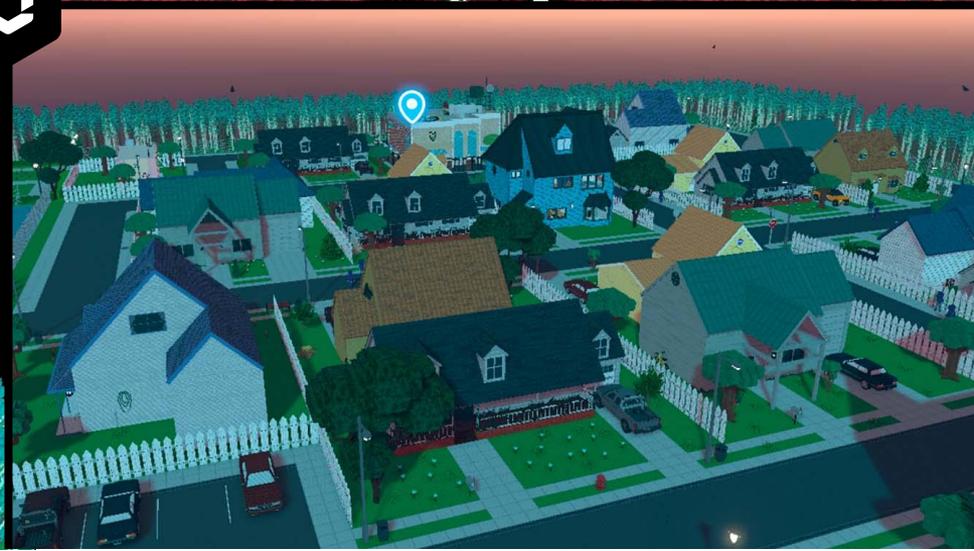

Voxel Architects

Hellgate

voxelarchitects.com

Hellgate

In this Harrowing experience in Sandbox You must discover where your friend Lake went missing, save her life, destroy endless members of the occult and defeat the Lovecraftian behemoth before life as we know it is destroyed!

Voxel Architects

Sierra Mansion

Sierra Mansion

ONE Sotheby's International Realty and Voxel Architects, along with general contractor and NFT collector Gabe Sierra, are introducing the first ever 'MetaReal' mansion. A real-world, new construction home in Miami, FL that includes a digital twin in the Metaverse. The virtual counterpart is built on the Sandbox platform and the package will be offered via NFT auction on the Ethereum blockchain.

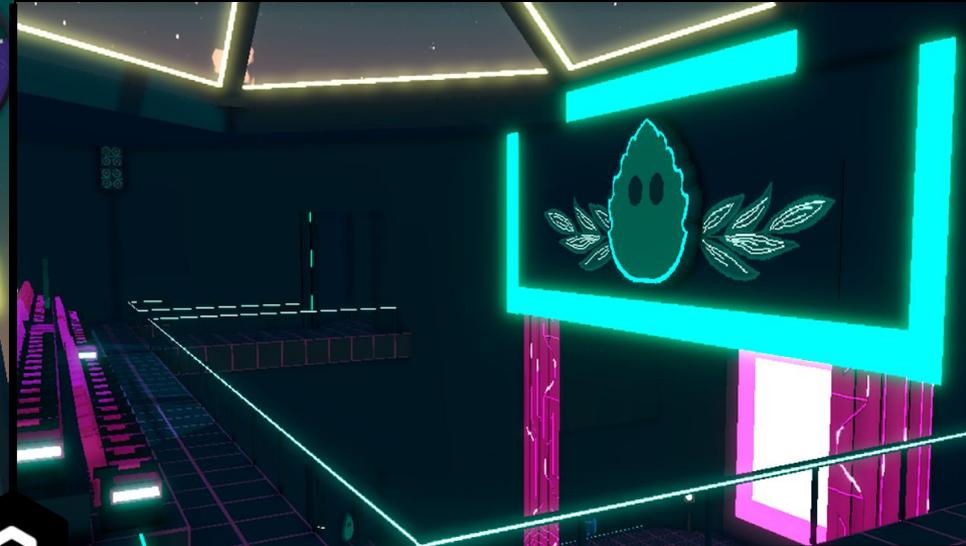

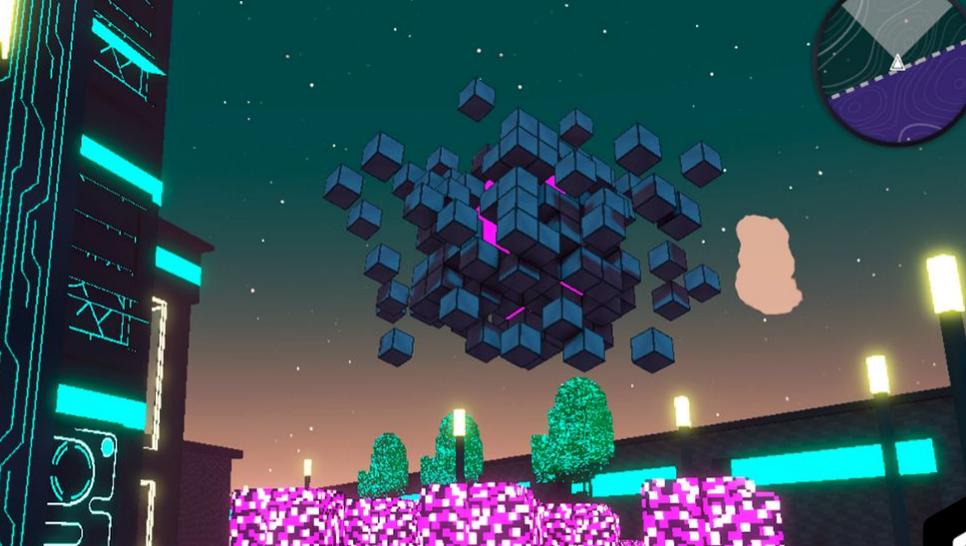

Voxel Architects

MintySwap HQ

MintySwap HQ

As their headquarters in Sandbox, this building provides a virtual space where MintySwap's community could gather and they could host special events, showcase their NFT art collection, and offer interactive experiences.

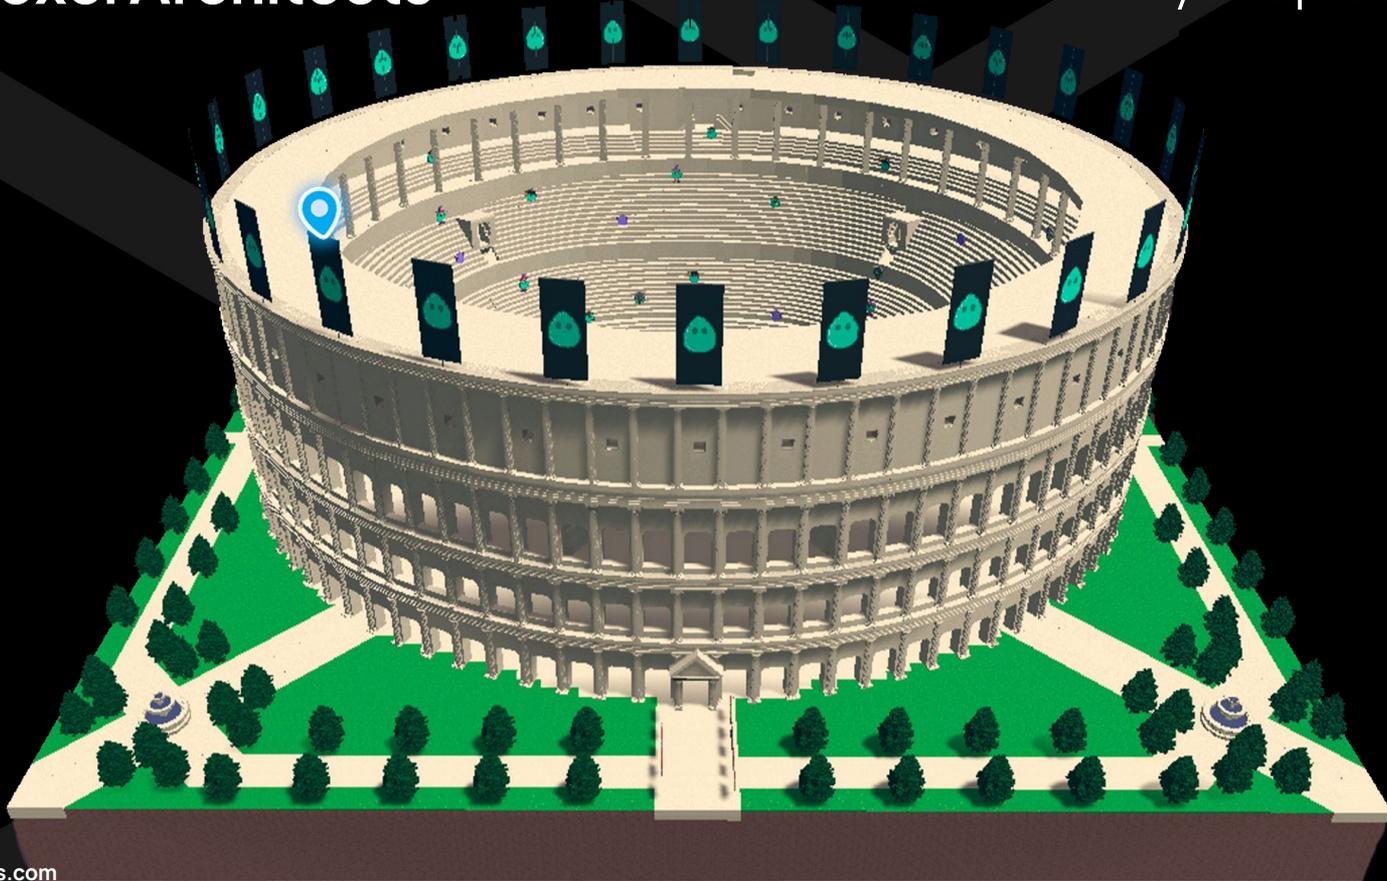

The architectural style of the structure is influenced by futuristic design. Inspired by the cyberpunk creative movement, the structure is filled with neon lights and high contrast, eye-popping hues.

Voxel Architects

MintySwap Colosseum

Voxel Architects

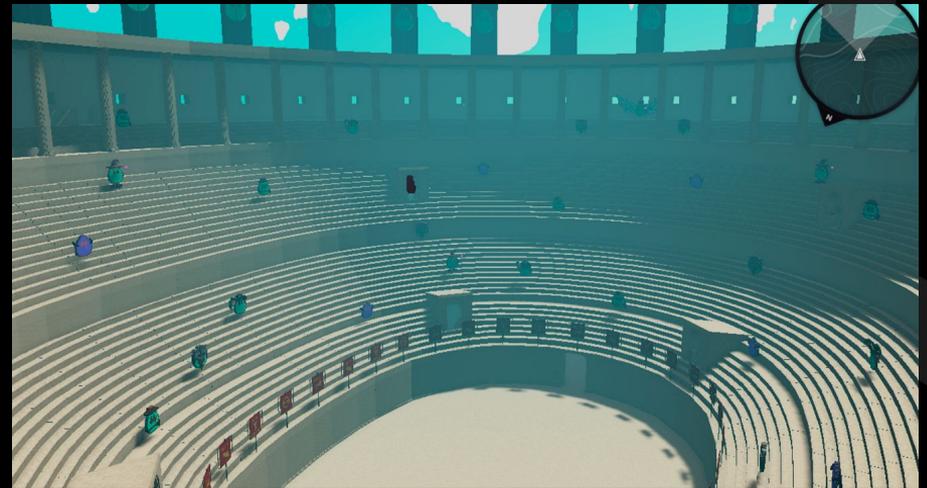

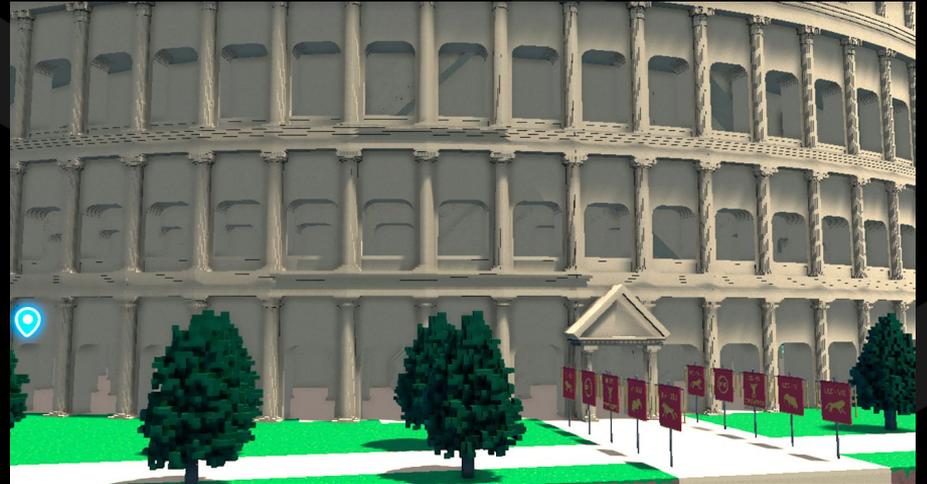

MintySwap Colosseum

MintySwap offers a one-of-a-kind metaverse experience: fight as an ancient gladiator in The Sandbox!

This spectacular voxel Colosseum is ideal for putting yourself in the shoes of a fighter. Not only can you enjoy a good fight in the arena, but the entire structure is filled with details that will astound you.

Travel through time and metaverse, welcome to MintySwap Colosseum!

Voxel Architects

E1337

Voxel Architects

E1337

E1337 is a clothing store made by gamers for gamers. Its distinctive appearance is inspired by a real desktop computer, with a custom made motherboard wall and water cooled components, that actually work and all users can see.

It also has a custom-built 5v5 gaming arena for those who enjoy taking on new challenges. And, if you're only interested in fashion, this store has a wide selection of high-end luxury clothing.

House of M

voxelarchitects.com

Voxel Architects

House of M

Luxurious. Ostentatious. Unique.
These are the three traits that define the house of M. With over 1000 voxel models placed, 3 weeks of work and inspired by the most luxurious mansions in the world built in Baroque style, this build is sure to catch the attention of the public. Come in, take a sip of wine and enjoy all the unique and expensive artworks that this building houses!

Voxel Architects

One BC & One BC Galleries

Inspired by the architectural style of the great architect I. M. Pei, this building is meant to bring modernist architecture to the Voxels universe and bridge the gap between the real and digital world. Display your art on the marble walls, book a private meeting, or enjoy a relaxing time in the zen garden, it's all up to you! And, if you want to party and just have a good time, the bamboo garden on the rooftop is the perfect place to do so!

Voxel Architects

Project Pagoda

Voxel Architects

Project Pagoda

The Project Pagoda stands proud as one of Voxels biggest architectural feats, and it's the only building that would rival the likes of House of M, in terms of detail. Built for the Whale Chinese community, this building features 5 different levels, each level having a different thematic. From the bottom up, the lobby is represented by the water element, surrounded by a bamboo balcony which represents the wood element. Moving up we have the fire element in the gong room, followed by the earth element with the zen garden, and finally, standing proud atop of the pagoda, the golden buddha statues that touches the sky.

VOXEL ARCHITECTS

voxelarchitects.com

Westcoast Bill: Space Age

Westcoast Bill Space Age is part of the Westcoast Bill complex, right in the heart of cryptovoxels, together with the Stone Age, Glass Age and the Tomb of Flat. Through their different architectural styles, the buildings are meant to highlight the most important achievements of the human kind. The Space Age is meant to showcase the future of space exploration and limitless boundaries of human imagination. As a good friend of Elon Musk, Bill wanted to create an elegy to SpaceX, one of the pioneers of space travel and exploration.

The HUB

voxelarchitects.com
voxelarchitects.com

2ND FLOOR

The HUB

The HUB was built as part of a collaboration between the biggest artists in the metaverse, where over 40 parcels of land were developed by individual artists, forming a neighbourhood now known today as Pranskyland. The building is supposed to serve as a meeting space and as a VR cinema. Its architectural features make it stand out from the rest, the most important feature of the build being the entrance which presents with a big open lobby in the shape of a diamond, with narrow hallways complemented by white neon stripes.

Dark Junction - Jedi temple

Dark Junction - Jedi Temple

On the same alley as the Sanctum Sanctorum, you will find the Jedi Temple, the second building part of the Dark Junction. The Jedi temple does feature a few NFTs, and its purpose is to serve as more of a gathering space for important crypto events. The temple has 4 levels: On the first level you will find the double floor meeting area and the balcony. On the level under you will a more calm space, isolated from the world, build for meditation. On the opposite spectrum, right on top of the temple sits the watchtower from which you can oversee the vastness of Voxels world.

Voxel Architects

Dark Junction - Sanctum Sanctorum

Dark Junction - Sanctum Sanctorum

The Sanctum Sanctorum is a digital version of the famous Dr.Strange Headquarters. It's purpose is to serve as an art gallery showcasing the latest and "strangest" NFT collections. What makes this particular build stand out from the rest is its seamless integration in Cryptovoxels universe, with an extremely high level of craftsmanship and attention to detail.

Voxel Architects

Metamuse Gallery

Voxel Architects

Metamuse Gallery

We teamed up with Minnie Muse to create a modern style NFT art gallery in Cryptovoxels called Metamuse.

This architectural project stands as an elegy to one of the greatest architects of the 20th century, Ludwig Mies van der Rohe, and his critically acclaimed Farnsworth House.

The building was commissioned by Colby Jordan Mugrabi, artist and CEO of Minnie Muse, and intends to be a virtual house and an art gallery to showcase its exclusive NFT art collection.

We went for a Modern Architecture style that allowed us to replicate the original house as faithfully as possible.

REAL VISION

RealVision Headquarters

Voxel Architects

RealVision Headquarters

Real Vision wanted to be present in the metaverse, and we were in charge to create their Headquarters. But this building is not only a simple structure, it has a lot of content and life going on inside of it, ready to be discovered by all the people at Voxels! We can find an exquisite Art Gallery, Raoul's Office with lots of youtube videos to enjoy, a fantastic amphitheatre, the Real Vision Merch Store, a lot of Real Vision Easter Eggs, and a very special Secret Room.

Architecture is disruptive with the traditional metaverse architecture.

Voxel Architects

Zonted

voxelarchitects.com

Zonted

The Zonted gallery is one of the largest galleries in Cryptovoxels. Built on more than 11 different parcels and able to host more than 100 artworks, this gallery hosts one of the largest nft collections in the space. The building architecture is inspired by the modernist current, and it is built in nuances of sandstone complemented by black accents. It is divided into 3 different structures separated by a park over which chinese lanterns are proudly hanging.
