

5th Ward Alderman Candidate

Steve Weber

Pride of the Fox

This rings so true and I am so proud of the fact that I have a chance to represent the 5th ward to maintain this motto as well as to enhance the meaning behind it. I am running to serve the residents of the 5th ward that me and my family have lived in for the past 16 years. There is no better feeling than to be able to improve the city that helps raise your family and will provide happiness and support for multiple generations to come. I have been married to my wife Nicole for 23 years and have 3 beautiful children Alana, Franky & Tommy. I have served my country as a veteran, I have served my county as a board member and now I hope to serve St. Charles as an alderman.

I feel as though I am uniquely qualified for this position based on both professional as well as current political experience. Professionally I deal with tough decisions all day that can have long term effects both our business as well as our employees. I do this with thoughtful consideration of all factors, some of which might not always be popular. Currently my role as an elected Kane County Board commissioner has taught me how to not only represent the 22,500 residents that make up the 13th district but also understanding that my decision also affects the 532,000 total residents that make up Kane County. By serving on multiple committees and having been to over 240 public meetings in the past couple years I have learned how government works.

Past and Current committees-

Executive

Energy & Environmental-co chair

Jobs-chair

Legislative

Development

Transportation

Health

Forest Preserve

Planning & utilization

Priorities- First and most important we need to help our citizens and businesses get through the current challenges they face and there is many.

We can't look to far ahead if we can't keep what we currently have. We can't conquer them all at once but we need a go forward plan to be able to accomplish this. There is current development that needs to be finished meaning the first street development project. I think the final touches can and need to be accomplished by a public/private partnership. St. Charles was built on public/private partnerships from the Library to the Baker community center as well as many other buildings in town. It doesn't always need to be on the dime of the tax payers. We need to make sure that any future development by the river needs to be family friendly so all residents of St. Charles can benefit from it. We have wonderful natural features that need to be used more especially by the river front. I want every resident to be comfortable approaching all members of the city council and to have a voice in the community.
