PITCH DECK 2022

# ABOUT US

## VULCANO

Welcome to Vulcano's metaverse! Discover a unique and intriguing NFT fighting game between light and darkness. These spheres engage in fierce battles to constantly gain more power... power so pure it is able to erase a rival forever.

Also, it features rubicons: groups of species with growing power fighting against those who dare to face them.

Will Astrophel, the everlasting light-sphere, be able to defend itself? Or will Vulcan I, the eternal dark-sphere, be able to dominate the infinite and achieve the building rights of the potential galaxy VULCANO?

Players can choose their faction

and compete against the environment to obtain \$VULC in return. Which side are you on?

GAMING INDUSTRY

# EVOLUTION

2022

Years ago, in order to play a video game it was a requirement to purchase it. Recently there has been a shift towards the free-to-play model, with games like Fortnite and Call of Duty Warzone, to name just a few, becoming the most played videogames. Currently the model on the rise is Play to Earn.

## PLAY TO EARN

**“Earn money while playing”** Such is the case of Axie Infinity, setting the example and the new trend in Gaming.

# DEVELOPMENT

## Traditional Games

Pay to Play

## NFT Games

Allow players to earn money while playing  
("Play to Earn")

Nowadays we are in the presence of a similar revolution where NFT games are reshaping the current industry rules. In consequence, we are facing a unique opportunity with great prospects for future growth.

## Global Game Market Revenue (1970 - 2022\*)

Access the Gaming Industry without considering NFT Games

ABOUT THE GAME

# 3D ASSETS

# 3

Vulcano is a 3D RTS (Real-Time Strategy) multiplayer video game. The game consists in building a team and position it in the battlefield where players will engage in three-character versus three-character 3D battles using artificial intelligence (AI).

We will be the first NFT project on developing its own mini-series.

## GAMEPLAY

**MINI-SERIES** Watch the trailer here: [youtu.be/TwxjbAEIOsg](https://youtu.be/TwxjbAEIOsg)

# ABOUT THE GAME

## NFTs

Players will be able to access the Vulcano game through different categories of NFT:

**Characters, Weapons, Spaceships and Lands**

DARKNESS

LIGHT

Each NFT will have specific attributes that will determine its own rarity: Common, Rare, Legendary and Mythic. Furthermore, there will be different NFT Generations. The first one will be Generation 0 and will grant exclusive benefits to those who acquire NFTs during the early stage of the game.

WHY VULCANO?

# OUR POTENTIAL

## WHERE CAN YOU INVEST IN VULCANO?

Within the Vulcano ecosystem you can currently invest in the following aspects, on the one hand, through the acquisition of NFTs, the sale of Generation 1 NFTs is still active, through boosters with NFTs. On the other hand, NFTs can be purchased individually through our native Marketplace.

Vulcano will have a scholarship system for users. Differential NFT prices can be offered to Guilds that would like to invest in the project. Such investment will also have the benefit of access to a private sale of the next token in the future (date TBA). These NFT's can be used for staking and receive \$VULC in return as well as to receive Play2Earn rewards through the game.

**The \$VULC token was launched in Q1, 2022. By adopting it you will be able to:**

- Play on Vulcano.
- Buy and sell NFTs in the Marketplace.
- Staking and governance.
- Buy boosters with NFTs.

The staking of the token offers different returns depending on the staking period stipulated. You can choose up to a profit rate of 202% APR.
