

August 25, 2020

Greetings everyone,

All residents in our skilled nursing facility were retested on Friday August 21. We received the results on Saturday August 22nd and **all were negative, including the individual who had tested positive earlier.** At this point, **we believe the original positive test result was a false positive**, but will continue to comply with all Vermont Dept. of Health protocols. Access to Linden Health Center will be restricted to residents and staff only. The individual who originally tested positive will remain in quarantine for two weeks. Staff of skilled nursing are being retested today and tomorrow, and skilled nursing residents will be retested again next week.

Independent Living restrictions that were imposed on Friday were lifted on Saturday evening.

If anyone has any questions, please direct them to Nicole Ravelin at 802-324-0029 or nicole@junapr.com
