

dsj
German School
Jakarta

**Deutsche Schule
Jakarta** is one
of the most respected
international schools
in Indonesia and your
child's ticket to any
study- and career- path
anywhere worldwide

The education advantage

What is the most important gift parents can offer their child?

Many would likely answer:

"The best education we can afford."

Here are the 5 key reasons why **Deutsche Schule Jakarta** might be the best choice for your child's education path:

01

> Educational excellence

DSJ is a German government supported school abroad (A-accredited SPK) providing world-class education from Kindergarten up to the University entrance qualification

02

> Worldwide accepted curriculum

The **German 'DIA' curriculum certification** ('Deutsches Internationales Abitur') is your child's ticket to any study and career path ANYWHERE worldwide

03

> All nationalities welcome

We welcome students from any nationalities and native tongues and offer a special program for children **without any prior German language skills**

04

> German Universities among the best

While the DIA certification is accepted around the world, **studying for free (without tuition fees)** at one of Germany's world-class Universities is a compelling choice

05

> Reasonable school fees

Due to our non-profit nature and the financial assistance of the German Government, DSJ is one of the **most affordable, internationally recognised schools** in Indonesia

[01] Advantage

The much acclaimed German International 'DIA' curriculum is more comprehensive compared to other curricula (e.g. *IB, Cambridge*) so students become capable of studying in all disciplines.

There is no too-early-specialisation, **a plus from an educational-science perspective.**

Our highly qualified teachers embark with your child on a learning journey which engages **MIND, BODY** and **all the SENSES**. This way, we nurture curious and independent personalities and the development of strong life skills.

[02] made in Germany

High-quality education is one of the core values of German schools abroad.

This **prestigious global network** of 140 German Government supported schools is known for high academic standards and excellent educational support. Their trademarks are the internationally recognized German school diplomas, such as the 'DIA' / Deutsches Internationales Abitur.

With their 'DIA' degree DSJ students are allowed and very **welcome to study at any University worldwide**, regardless the chosen field of study.

[03] multi cultural

As '**Begegnungsschule**' - a school of encounter - we believe in building bridges between cultures and promoting international understanding.

We provide a friendly, multi-cultural environment, promoting respect for everyone's roots, values, and traditions. The result: happy, well-mannered students with the **cultural preparedness** to take their place in tomorrow's global communities.

SPECIAL ENROLMENT PROGRAM

For the new Academic Year 2021 / 22 we offer a unique Program for Indonesian and any other nationality children from grade 1 up to grade 6 - **WITHOUT prior German language skills** - that will enable your child to successfully graduate the German DIA certification.

APPLY NOW as seats are limited.

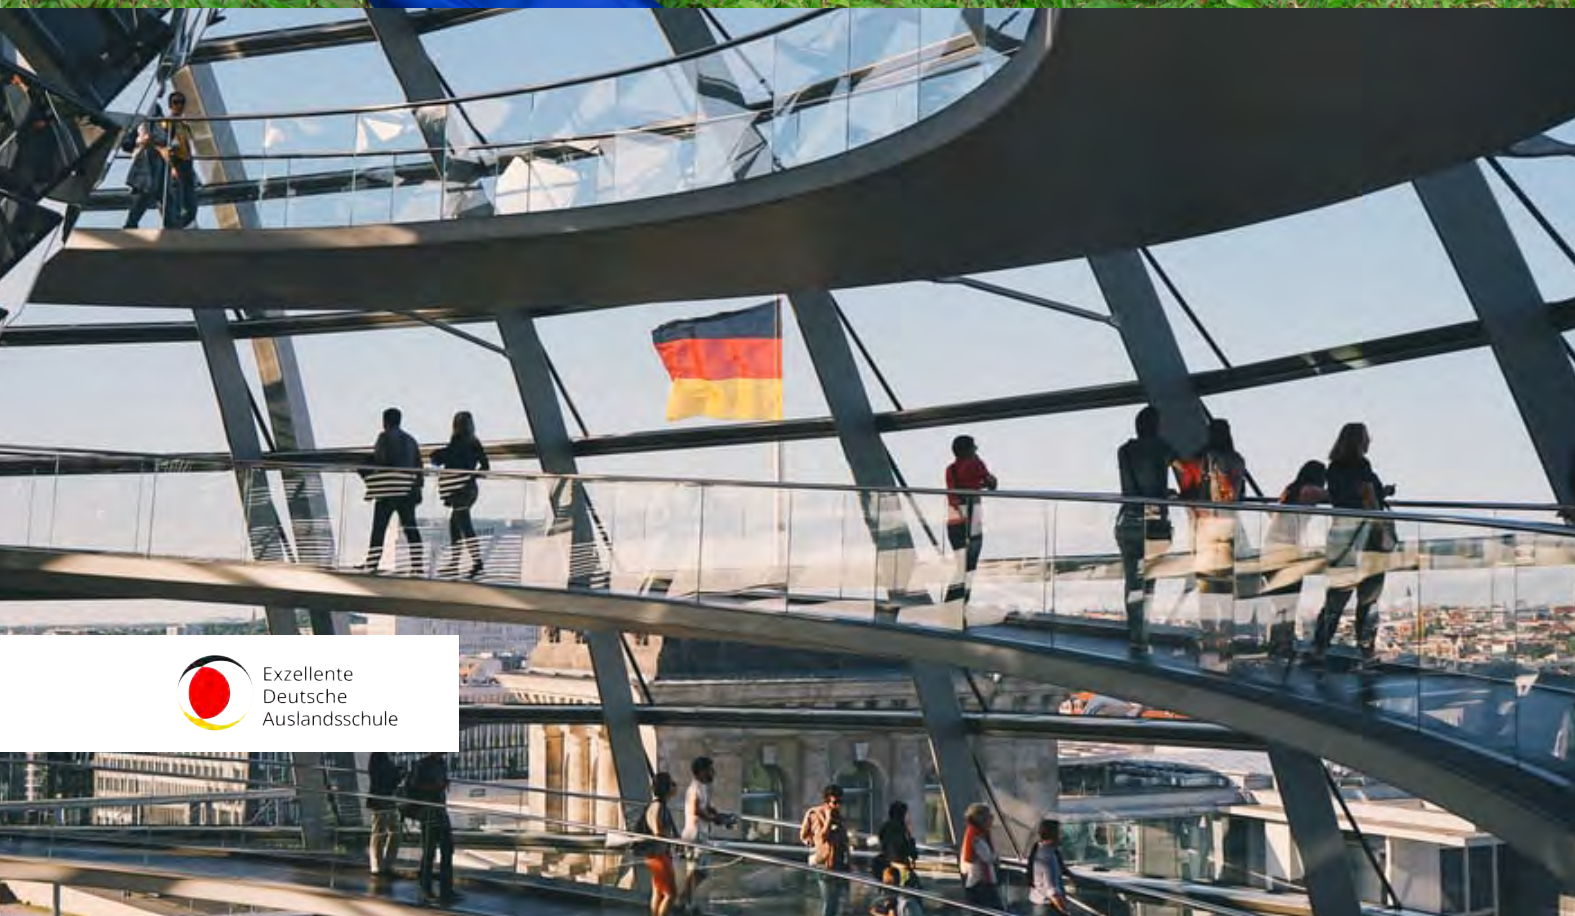

[04] study for 'free'

Germany enjoys a remarkable reputation for its higher education sector, offering more than 400 world-class institutions.

In 2021, **21 of these Universities have made it into the top 200** (THE / Times Higher Education, World University Rankings) - making Germany the third-best represented country in the world.

Key reasons for Germany's attraction of over 400k students each year - besides its outstanding Universities - are the leading position as a science and industry location, the diversity of its study options and the fact that **no tuition fees are charged** (at public Universities).

[05] reasonable fees

The DSJ does not focus on making profits.

We focus on our students.

Good schooling has its price. And although the German School Jakarta provides highly professional staff and outstanding infrastructure for learning, we succeed in keeping the school fees significantly lower than other schools with a comparable offer.

Due to our non-profit nature and the financial assistance of the German Government we are one of the ...

... most affordable, internationally recognised schools in Indonesia.

[06] our green campus

Since 1998 we are strategically nestled right in the heart of BSD, in a safe and green residential neighbourhood.

We call **4.2 ha our own, mostly park-like grounds** with plenty of large trees and outstanding facilities which include -

a state-of-the-art, bright and spacious school building, 300 seats auditorium, sports hall, 25m swimming pool, tennis courts, an officially sized grass football field, extensive playgrounds and a spacious **Kindergarten outdoor play-park** with a special, secure children pool area.

This school does not only support the students in achieving academic success, it also teaches them how to adapt and survive regardless of where they are. Furthermore, their Abitur credentials are accepted at every well-known university. *(read full review)*
